Advances in Role and Reference

Grammar Robert D. Van Valin, Jr., 1992-01-01 This volume presents research on major issues in syntactic theory within Role and Reference Grammar This theory was first presented in detail in Functional Syntax and Universal Grammar FSUG and these papers represent both expansions and applications of the theory to a wide range of phenomena The first section contains an introduction to the theory which is the most thorough statement of it since FSUG summarizing the features of Role and Reference Grammar established there and developing new theoretical components and analyses of syntactic phenomena not discussed in the earlier work Throughout the discussion features of RRG are compared and contrasted with comparable features of other syntactic theories The remainder of the volume is devoted to detailed analyses of specific problems e g control case marking in a wide variety of languages e g Mandarin Chinese Nootka Mparntwe Arrernte and Turkish Thus the works presented here illustrate well the strong cross linguistic approach to syntactic theory and description in Role and Reference Grammar

Grounding in Chinese Written Narrative Discourse Wendan Li, 2018-02-19 In Grounding in Chinese Written Narrative Discourse Wendan Li offers a comprehensive and innovative account of how Mandarin Chinese as a language without extensive morphological marking highlights or foregrounds major events of a narrative and demotes or backgrounds other supporting descriptions Qualitative and quantitative methods in the analysis and examinations of authentic written text provide extensive evidence to demonstrate that various types of morpho syntactic devices are used in a wide range of structural units in Chinese to mark the distinction between foregrounding and backgrounding The analysis paves the way for future studies to systematically approach grounding related issues The typological viewpoint adopted in the chapters serves well readers from both the Chinese tradition and other languages in discourse analysis

Converging

Grammars Debra Ziegeler, 2015-07-01 This volume provides a much needed critical overview of the field of constructions and construction grammar in the context of Singapore English and poses the question of identifying a construction in contact when the lexicon is derived from one language and the syntax from another Case studies are illustrated in which the

possibility of a merger construction is offered to resolve such problems The book is intended for students of construction theories variation studies or any researcher of contact grammars The Routledge Handbook of Chinese Discourse Analysis Chris Shei, 2019-01-14 Chinese is a discourse oriented language and the underlying mechanisms of the language involve encoding and decoding so the language can be correctly delivered and understood To date there has been a lack of consolidation at the discourse level such that a reference framework for understanding the language in a top down fashion is still underdeveloped The Routledge Handbook of Chinese Discourse Analysis is the first to showcase the latest research in the field of Chinese discourse analysis to consolidate existing findings put the language in both theoretical and socio functional perspectives offer guidance and insights for further research and inspire innovative ideas for exploring the Chinese language in the discourse domain The book is aimed at both students and scholars researching in the areas of Chinese linguistics and discourse analysis **Chinese Middle Constructions** Jiajuan Xiong, 2017-11-14 This book defines Chinese middle constructions as generic constructions with their highest syntactically saturated argument always understood as an arbitrary one This working definition sets middle construction apart from middle voice in that it can be instantiated by various constructions in Chinese By scrutinizing these constructions in the framework of Generative Syntax the book concludes that their formation takes place at the lexical level without resorting to any syntactic mechanisms and thus that Chinese falls into the category of lexical middle languages which are in contrast to syntactic middle languages **Hybridity in Translated Chinese** Guangrong Dai, 2016-05-20 This book investigates the characteristics of hybridity in Chinese texts that have been translated from English It also explores the potential impact of translation and hybridity on written Chinese over the past 70 years It suggests that English Chinese translations have introduced more and more hybrid structures into Chinese This book can help us with understanding language change and development and it can also shed new light on the translation process and help identify translation norms **Chinese Lexical Semantics** Yunfang Wu, Jia-Fei Hong, Qi Su, 2018-01-18 This book constitutes the thoroughly refereed post workshop proceedings of the 18th Chinese Lexical Semantics Workshop CLSW 2017 held in Leshan China in May 2017 The 48 full papers and 5 short papers included in this volume were carefully reviewed and selected from 176 submissions They are organized in the following topical sections lexical semantics applications of natural language processing lexical resources and corpus linguistics **The Right Periphery in L2 Chinese** Shanshan Yan, 2022-12-29 The Right Periphery in L2 Chinese is among the first books to try to incorporate both advanced linguistic and acquisition perspectives to show how eight sentence final particles are represented in English speaking learners L2 Chinese This book will inform researchers of the general construction of the right periphery in L2 grammars Drawing on up to date theoretical frameworks and findings from advanced empirical studies it sketches the general picture of the periphery that these particles occupy in English Chinese interlanguages Readers will grasp the problems and difficulties and particularly the ambiguities which learners of Chinese must grapple with in the process of

acquiring sentence final particles Possible influential factors underlying the acquisition process are explicitly discussed as well Researchers will also find insights in the advanced methodologies and statistics that are used to study Chinese The book will be illuminating for researchers interested in SLA linguists of generative theories and educators teaching Chinese as a second foreign language *The Handbook of Chinese Linguistics* C. T. James Huang, Y. H. Audrey Li, Andrew Simpson, 2018-03-20 The Handbook of Chinese Linguistics is the first comprehensive introduction to Chinese linguistics from the perspective of modern theoretical and formal linguistics Containing twenty five chapters the book offers a balanced accessible and thoughtfully organized introduction to some of the most important results of research into Chinese linguistics carried out by theoretical linguists during the last thirty years Presenting critical overviews of a wide range of major topics it is the first to meet the great demand for an overview volume on core areas of Chinese linguistics Authoritative contributions describe and assess the major achievements and controversies of research undertaken in each area and provide bibliographies for further reading The contributors refer both to their own work in relevant fields and objectively present a range of competitor theories and analyses resulting in a volume that is fully comprehensive in its coverage of theoretical research into Chinese linguistics in recent years This unique Handbook is suitable both as a primary reader for structured taught courses on Chinese linguistics at university level and for individual study by graduates and other professional linguists

Semantics. Volume 3 Claudia Maienborn, Klaus von Stechow, Paul Portner, 2012-12-19 No detailed description available for SEMANTICS MAIENBORN ET AL BD 33 3 HSK E BOOK Case, Agreement, and their Interactions András Bárány, Laura Kalin, 2020-06-22 Differential argument marking has been a hot topic in linguistics for several decades both because it is cross linguistically widespread and because it raises essential questions at multiple levels of grammar including the relationship between abstract processes and overt morphological marking between case and agreement and between syntax and information structure This volume provides an introduction into the current state of the art of research on differential case marking and chapters by leading linguists addressing theoretical questions in a wide range of typologically and geographically diverse languages from the Indo European Sinitic Turkic and Uralic families The chapters engage with current theoretical issues in the morphology syntax semantics and processing of differential argument marking A central issue addressed by all the authors is the adequacy of various theoretical approaches in modelling different varieties of differential case marking such as those determined by topicality those driven by cumulative factors and those that involve double marking The volume will be of interest to students and researchers working on cross linguistic variation in differential marking and its theoretical modelling
