Manned Spaceflight Log:

Praxis Manned Spaceflight Log 1961-2006 Tim Furniss, Shayler David, Michael D. Shayler, 2007-02-22 This flagship work charts a complete chronological log of orbital manned spaceflight Included are the X 15 astroflights of the 1960s and the two 1961 Mercury and Redstone missions which were non orbital There is an image depicting each manned spaceflight and data boxes containing brief biographies of all the space travelers The main text is a narrative of each mission its highlights and accomplishments including the strange facts and humorous stories connected to every mission The resulting book is a handy reference to all manned spaceflights the names of astronauts and cosmonauts who flew on each mission their roles and accomplishments

Manned Spaceflight Log II—2006-2012 David J. Shayler, Michael D. Shayler, 2013-04-05 Manned Spaceflight Log discusses over 40 recent spaceflights from September 2006 through September 2012 a time of great change in human spaceflight history Following on from Praxis Manned Spaceflight Log 1961 2006 the authors continue the story until the end of September 2012 with new chapters detailing the development and accomplishments of human spaceflight expanded tables and additional photographs many in color throughout The book opens with a new foreword by Colonel Alfred M Worden USAF Retired NASA Astronaut and CMP of Apollo 15 which reflects on the changing history of human spaceflight and the prospects for future operations The first chapter explains how human spaceflight has approached the different challenges of exploring space and provided the hardware to meet those challenges This chapter also describes the various attempts to reach orbital flight and the often confusing distinction between ballistic sub orbital and so called astro flights of the X 15 rocket research aircraft program Chapter 2 recalls key historic moments and missions across five decades of human spaceflight Each decade has provided useful lessons for the next and a foundation for future achievement The new mission entries are collected in the third section in chronological order A review of the next steps in human spaceflight including plans to occupy the International Space Station well into the 2020s and the growth of the Chinese manned space program including a large space station and planned base on the Moon is discussed in Chapter 4 The tables provide a complete up to date overview of human spaceflight operations and experience from April 1961 to September 2012 and a selected chronology of important milestones from those years Completing the book is a comprehensive bibliography that lists all the major Springer Praxis human spaceflight titles and other important works that provide the reader with a resource to continue further research

Manned Spaceflight Log Tim Furniss, 1986 **Manned Spaceflight Log II—2006-2012** David J. Shayler, Michael D. Shayler, 2013-04-05 Manned Spaceflight Log discusses over 40 recent spaceflights from September 2006 through September 2012 a time of great change in human spaceflight history Following on from Praxis Manned Spaceflight Log 1961 2006 the authors continue the story until the end of September 2012 with new chapters detailing the development and accomplishments of human spaceflight expanded tables and additional photographs many in color throughout The book opens with a new foreword by Colonel Alfred M Worden USAF Retired NASA Astronaut

and CMP of Apollo 15 which reflects on the changing history of human spaceflight and the prospects for future operations. The first chapter explains how human spaceflight has approached the different challenges of exploring space and provided the hardware to meet those challenges. This chapter also describes the various attempts to reach orbital flight and the often confusing distinction between ballistic sub orbital and so called astro flights of the X 15 rocket research aircraft program. Chapter 2 recalls key historic moments and missions across five decades of human spaceflight. Each decade has provided useful lessons for the next and a foundation for future achievement. The new mission entries are collected in the third section in chronological order. A review of the next steps in human spaceflight including plans to occupy the International Space Station well into the 2020s and the growth of the Chinese manned space program including a large space station and planned base on the Moon is discussed in Chapter 4. The tables provide a complete up to date overview of human spaceflight operations and experience from April 1961 to September 2012 and a selected chronology of important milestones from those years. Completing the book is a comprehensive bibliography that lists all the major Springer Praxis human spaceflight titles and other important works that provide the reader with a resource to continue further research.

Spacecraft Technology Mark Williamson, 2006-02-23 This book covers the development of space technology in the late 1950s and 1960s from the launch of Sputnik 1 in October 1957 to the landing of men on the moon in 1969. The text begins by looking at the challenge of getting into space and the development of the launch of the space launch vehicle and moves on to discussion of unmanned satellites and space probes and the first capsules deployed in Earth orbit and the Apollo missions to the moon.

Gemini 5 David J. Shayler, 2023-03-07 This third book of the Gemini mission series focuses on the flight that simulated in Earth orbit the duration of an eight day Apollo mission to the Moon. After the proof of concept test flights Gemini 1, 2 and 3 as described in GEMINI FLIES and the success of the first American EVA as well as the four day U S mission GEMINI 4, NASA gained the confidence to gradually increase mission time spent in orbit. This is the first known book to focus solely on the Gemini 5 mission and its challenges with equipment failures and difficult living conditions. The mission was targeted to double the endurance of the previous one and as such was an integral stepping stone for an even more audacious mission four months later. Attempting the eight and then fourteen day durations would be an opportunity for America to gain the lead in space exploration over the Soviets. This mission pioneered the duration of a flight to the Moon and back three years before Apollo 8 made that journey without a lunar landing for the first time.

Enhancing Hubble's Vision David J. Shayler, David M. Harland, 2015-11-25 This book tells the story of the four missions to maintain Hubble's successful operation. Between 1997 and 2009 these repaired, serviced and upgraded the instruments on the telescope to maintain its state of the art capabilities. It draws on first hand interviews with those closely involved in the project. The spacewalking skills and

experiences gained from maintaining and upgrading Hubble had direct application to the construction of the International Space Station and help with its maintenance These skills can be applied to future human and robotic satellite servicing and maintenance activities as well not only in Earth orbit but at locations deeper in space A companion to this book The Hubble Space Telescope From Concept to Success relates the events of the Telescope s launch in 1990 and its rough start after a 20 year struggle to place a large optical telescope in orbit Originally intended to operate for fifteen years Hubble has just passed its 25th anniversary and there is every expectation that it will survive for thirty years Despite its early problems the Hubble Space Telescope has become a lasting legacy of the Space Shuttle program and indeed is a national treasure *Air Force Magazine* ,1984 Assembling and Supplying the ISS David J. Shayler,2017-07-20 The creation and utilization of the International Space Station ISS is a milestone in space exploration But without the Space Shuttle it would have remained an impossible dream Assembling and Supplying the ISS is the story of how between 1998 and 2011 the Shuttle became the platform which enabled the construction and continued operation of the primary scientific research facility in Earth orbit Fulfilling an objective it had been designed to complete decades before 37 Shuttle missions carried the majority of the hardware needed to build the ISS and then acted as a ferry and supply train for early resident crews to the station Building upon the decades of development and experience described in the companion volume Linking the Space Shuttle and Space Stations Early Docking Technologies from Concept to Implementation this book explores a purpose built hardware processing facility challenging spacewalking objectives extensive robotic operations undocking a unmanned orbiter The experience and expertise gained through these missions allows space planners to improve space construction skills in advance of even more ambitious plans in the future **The Greatest Adventure** Colin Burgess,2021-08-12 The Greatest Adventure explores the past present and future of the space race The space race was perhaps the greatest technological contest of the twentieth century It was a thrilling era of innovation discovery and exploration as astronauts and cosmonauts were launched on space missions of increasing length complexity and danger The Greatest Adventure traces the events of this extraordinary period describing the initial string of Soviet achievements the first satellite in orbit the first animal man and woman in space the first spacewalk as well as the ultimate US victory in the race to land on the moon The book then takes the reader on a journey through the following decades of space exploration to the present time detailing the many successes tragedies risks and rewards of space exploration **Reliability on the Move** G.B. Guy,2018-01-18 This book represents the porceedings of the 1989 Safety and Reliability Society Symposium held in Bath on the 11th and 12th of October on that topic **Stamping the Earth from Space** Renato Dicati,2017-01-10 This unique book presents a historical and philatelic survey of Earth exploration from space It covers all areas of research in which artificial satellites have contributed in designing a new image of our planet and its environment the atmosphere and ionosphere the magnetic field radiation belts and the magnetosphere weather remote sensing mapping of the surface observation of the oceans and marine

environments geodesy and the study of life and ecological systems Stamping the Earth from Space presents the results obtained with the thousands of satellites launched by the two former superpowers the Soviet Union and the United States and also those of the many missions carried out by the ESA individual European countries Japan China India and the many emerging space nations Beautifully illustrated it contains almost 1100 color reproductions of philatelic items In addition to topical stamps and thematic postal documents the book provides an extensive review of astrophilatelic items The most important space missions are documented through event covers and cards canceled at launch sites tracking stations research laboratories and mission control facilities
