which argues that the most confounding problem facing women today isn't that doors of opportunity aren't open but that not enough women are walking through them. From the boardroom to the bedroom, public office to personal relationships, she asserts that nobody is keeping women from parity except themselves. Feldt puts women's power into an historical context, showing the ways in which women have made huge leaps forward in the past only to pull back right when they were at the threshold. Feldt argues that there's no excuse, whether it's the way women are socialized or pressure to conform or work-life balance issues for women today not to own their power. Women are still facing unequal pay, being passed over for promotions, entering public office at a much lesser rate than men, and oftentimes still struggling with traditional power dynamics in their interpersonal relationships. Feldt's solution to all these places where women face inequality is the same: we need to shift the way we think to achieve true parity with our male counterparts. **No Excuses** is divided into nine chapters that organized around how women can change the way they think and therefore the way they act. These include **Know Your History** and **You Can Create the Future of Your Choice**. **Define the Terms**, **First Embrace Controversy**, **Employ Every Medium**, and other helpful ideas for using the tools and resources women already have to create the changes they want to see. **No Excuses** is a timely and invaluable book to help women equalize gender power in politics, work, and love.

The Photoromance Paola Bonifazio, 2020-09-22 A fascinating feminist reading of an often scorned medium: the storytelling cross-platform success and female fandom of the photoromance. Born in Italy and successfully exported to the rest of the world, photoromances had a readership of millions in the postwar years. By the early 1960s, more than ten million Italians read a photoromance each week. Despite its popularity, the photoromance, a form of graphic storytelling that uses photographs instead of drawings, was widely scorned as a medium, and its largely female audience derided as naive, pathetic, and uneducated. In this provocative book, Paola Bonifazio offers another perspective, making a case for the relevance of the photoromance for both feminism and media culture. She argues that the photoromance pioneered storytelling across platforms, elevated characters and artists into brands, and nurtured a devoted fan base. Moreover, Bonifazio shows that female readers condescended to by intellectuals, journalists, and politicians of both the left and the right powered the Italian photoromance industry's success. Bonifazio examines the convergence of Italian media as photoromance magazines dispersed their content across multiple formats, narrative conventions, editorial and business strategies, and platforms. The plots of photoromances often resembled the storylines of romantic films, and film stars themselves often appeared in photoromances. Bonifazio discusses the media habits of photoromance readers, the use of photoromances to promote political, religious, and social agendas, including a campaign for birth control in comics, and long-term fandom. While publishers built lifelong relationships with their readers, the readers built a common identity and culture.

The Hope and Despair of Human Bioenhancement Paschal M. Corby, 2019-12-23 The Hope and Despair of Human Bioenhancement is a virtual dialogue between Transhumanists of the Oxford School and the thought of Joseph Ratzinger Set in the key of hope and despair it considers whether or not the transhumanist interpretation of human limitations is correct and whether their confidence in the methods of human enhancement especially through biotechnology corresponds to genuine hope To this end it investigates the philosophical foundations of transhumanism in modernity s rejection of metaphysics the triumph of positivism and the universalism of the theory of evolution which when applied to anthropology becomes the materialist reduction of the human person Ratzinger calls into question this absolutization of positive reason and its limitation of hope to what human beings can produce naming it a pathology of reason a mutilation of human dignity and a facade of a world without hope In its place he offers a richer concept of hope that acknowledges our contingency and limitations
