Mills, 2003-09-11 Cannabis Britannica explores the historical origins of the UK s legislation and regulations on cannabis preparations before 1928 It draws on published and unpublished sources from the seventeenth century onwards from archives in the UK and India to show how the history of cannabis and the British before the twentieth century was bound up with imperialism James Mills argues that until the 1900s most of the information and experience gathered by British sources were drawn from colonial contexts as imperial administrators governed and observed populations where use of cannabis was extensive and established This is most obvious in the 1890s when British anti opium campaigners in the House of Commons seized on the issue of Government of India excise duties on the cannabis trade in Asia in order to open up another front in their attacks on imperial administration The result was that cannabis preparations became a matter of concern in Parliament which accordingly established the Indian Hemp Drugs Commission The story in

the twentieth century is of the momentum behind moves to include cannabis substances in domestic law and in international treaties The latter was a matter of the diplomatic politics of imperialism as Britain sought to defend its cannabis revenues in India against American and Egyptian interests The domestic story focuses on the coming together of the police the media and the pharmaceutical industry to form misunderstandings of cannabis that forced it onto the Poisons Schedule despite the misgivings of the Home Office and of key medical professionals The book is the first full history of the origins of the moments when cannabis first became subjected to laws and regulations in Britain *Cannabis* Martin Booth,2024-09-04 Along with Eric Schlosser's *Reefer Madness* this could become a staple at neighborhood head shops the only hash book you'll ever need Kirkus Reviews To some it's the classic gateway drug to others it is a harmless way to relax or provide relief from crippling pain Some fear it is a dangerous drug with addictive properties to others still it is a legal anomaly and should be decriminalized Whatever the viewpoint and by whatever name it is known cannabis or marijuana hashish dope pot weed grass ganja incites debate at every level and the effect it has on the cultures and economics of every corner of the globe is undeniable In this definitive study Martin Booth crafts a tale of medical advance religious enlightenment political subterfuge and human rights of law enforcement and custom officers cunning smugglers street pushers gang warfare writers artists musicians and happy go lucky hippies and potheads Booth chronicles the fascinating and often mystifying process through which cannabis a relatively harmless substance became outlawed throughout the Western world and the devastating effect such legislation has on the global economy Above all he demonstrates how the case for decriminalization remains one of the twenty first century's hottest topics Amazingly informative and riveting quite intoxicating Financial Times UK Even handed adult and good humoured original and thought provoking The Sunday Telegraph UK Fascinating a clear headed and sustained case The Sunday Times UK Well researched The Seattle Times
