Stanley, Donald J. P. Swift, 1976 A Wiley Interscience publication     *Encyclopedia of Coastal Science* M. Schwartz, 2006-11-08 Honorable Mention Award for Excellence in Scholarly and Professional Publishing Maurice Schwartz Editor of the much acclaimed Encyclopedia of Beaches and Coastal Environments Hutchinson Ross 1982 has now brought forth a new volume with a fresh interdisciplinary approach that includes geomorphology ecology engineering technology oceanography and human activities as they relate to coasts Within its covers the Encyclopedia of Coastal Science includes many aspects of the coastal sciences that are only to be found scattered among scientific literature Being broadly interdisciplinary in its treatment of coasts the Encyclopedia of Coastal Science features contributions by 245 well known international specialists in their respective fields and is abundantly illustrated with line drawings and photographs Not only does this volume offer an extensive number of entries it also includes various appendices an illustrated glossary of coastal geomorphology and extensive bibliographic listings This Encyclopedia thus provides a comprehensive reference work for students professionals as well as informed lay readers     Environmental Studies of a Marine Ecosystem R. Warren Flint, Nancy N. Rabalais, 1981-07-01 Environmental Studies of a Marine Ecosystem reports the temporal and spatial variation of both the living and nonliving resources of the south Texas outer continental shelf As the last major study to have been conducted before the Ixtoc oil spill in 1979 it is of great importance as a record of the baseline conditions and ecosystem characteristics for both biologists and chemists studying the effects of the Campeche disaster on the marine environment The book is the culmination of three years of field studies conducted for the Bureau of Land Management and contains information on the climatology hydrology and sedimentology of the region as well as data on the pelagic and benthic biota environmental hydrocarbons and trace metals and the microbiology of the area In addition to the ecosystem description the data are integrated to expose ecological relationships that exist and to identify those specific variables which are most important for the assessment and management of environmentally damaging impacts to the area     **Collected reprints** Atlantic Oceanographic and Meteorological Laboratory, 1978     Coastal Evolution R. Galloway, D. K. Hobday, 2012-12-06 The reserves or extractable fraction of the fuel mineral endowment are sufficient to supply the bulk of the world's energy requirements for the immediately foreseeable future well into the next century according to even the most pessimistic predictions But increasingly sophisticated exploration concepts and technology must be employed to maintain and if possible add to the

reserve base Most of the world's fuel mineral resources are in sedimentary rocks Any procedure or concept that helps describe, understand and predict the external geometry and internal attributes of major sedimentary units can therefore contribute to discovery and recovery of coal, uranium and petroleum While conceding the desirability of renewable and nonpolluting energy supply from gravitational wind or solar sources, the widespread deployment of these systems lies far in the future, thus the continued commercial emphasis on conventional nonrenewable fuel mineral resources, even though their relative significance will fluctuate with time For example, a decade ago the prognostications for uranium were uniformly optimistic But in the early 1980s the uranium picture is quite sombre, although unlikely to remain permanently depressed Whether uranium soars to the heights of early expectations remains to be seen Problems of waste disposal and public acceptance persist Fusion reactors may ultimately eliminate the need for uranium in power generation, but for the next few decades there will be continued demand for uranium to fuel existing power plants and those that come on stream This book is to some extent a hybrid
