**The Seven Big Myths about Marriage** Christopher Kaczor, Jennifer Kaczor, 2014-01-23 This work explores some of the most interesting and vexing problems in contemporary life Appealing to reason rather than religious authority the book tackles the most controversial and talked about positions of the Catholic Church on contraception on marriage on reproductive technologies on cohabitation and on divorce arguing for the reasonableness of the Church's views on these issues The book's interdisciplinary approach following the precedent of Thomas Aquinas looks to human happiness and fulfillment properly understood in seeking the answers to questions about how to live It aims to show to skeptical readers that what the Catholic Church teaches about controversial issues is rationally justified by considering evidence from psychology sociology and philosophy The foundation of Kaczor's approach is happiness We all want to be happy Every day in whatever we do we seek this goal But what exactly is happiness And how can we find it The saints and psychologists agree there can be no real happiness without authentic love erotic love friendship love and self giving love agape From this foundation of happiness Kaczor explores the nature of marriage and the love they promise to each other which is agape a selfgiving love that is the choice to do good for the other He also examines alternatives to covenant marriage such as polygamy and same-sex marriage as well as cohabitation Finally the book explores the value of children To make sense of Catholic teaching on contraception he says that we must first reconsider the value of fertility and having children Only in this perspective can one begin to understand what the Church teaches
