Northwest Sea Disasters Leif Terdal, John Keiter, 2005 Northwest waters off Oregon and Washington pose unique dangers to boaters All of the navigable bars that a boater must cross to reach the ocean such as the Tillamook Bay Bar the Columbia River and Depoe Bay are hazardous When a boat is in danger or actually sinks the Coast Guard comes to the rescue Search and rescue itself poses hazards often times compounded by delayed or inaccurate distress calls from the captain In addition the captain may fail to provide timely communication and leadership to crew and passengers during the crises This book reviews the sinking of five charter boats Four of them the Pearl C Cougar Gambler and the Taki Tooo accounted for the greatest loss of life in the charter boat industry in Oregon and Washington Survivors of

these charter boats provide vivid and dramatic accounts of the sinkings and search and rescue. We also review the sinking with the loss of life of the Aleutian Enterprise in the Bering Sea crab boats off the Oregon and Washington coast as well as the loss of the Sea King during a storm as it was being towed across the Columbia River bar. We focus on the human element in decision making during emergencies at sea and provide guidelines for boaters to consider their own experiences at sea with respect to safety. An understanding of the hazards on our Northwest waters are important to recreational boaters who go on their private boats to fish off shore.

Handbook of Bioterrorism and Disaster Medicine Robert Antosia, John D. Cahill, 2006-12-22 The Handbook of Bioterrorism and Disaster Medicine was created because we felt there was no effective handbook that covered the breadth and scope of this field. Our book incorporates concise chapters on topics and diseases with abundant web based references and careful organization. We hope that all healthcare providers interested or involved with the care of victims of bioterrorism or disaster including prehospital care providers, medical students, nurses, physicians, and those involved with public health or humanitarian aid find it indispensable. We wish to thank the numerous authors who contributed to this handbook. Throughout the book, consistency of style and depth provide the reader with easy and reliable access to the vast amount of information needed to understand, prepare for, and deal with a bioterrorist attack or disaster. The chapters in this book have been based on scientific studies and data when available. However, more research is needed to more fully understand these complex events.

Civil Liability for Accidents at Sea Sarah Fiona Gahlen, 2015-02-24 This book presents a study on civil liability for accidents at sea with a focus on the interests of parties that are not contractually participating in the maritime enterprise. Shipping and the maritime offshore industry are among the most international businesses in the world, and the operation of ships and facilities at sea can involve very different interests in a wide variety of relationships. Although there is an international legal framework that covers the most frequent types of cases, questions remain regarding the interplay of international and national legislation. Addressing those questions, the first part of this study analyses the rules and the limits of international regulation applicable at sea, namely regarding compensation for pollution damage. The second part focuses on the jurisdictional rules and conflict of law rules that may be used to deal with cases beyond the scope of international legislation in accordance with the law of the sea.

Disaster Medicine Gregory R. Ciotto, 2006-01-01 This new volume includes Individual Concepts and Events sections that provide information on the general approach to disaster medicine and practical information on specific disasters. You'll also find an exhaustive list of chapters on the conceivable chemical and biologic weapons known today as well as strategies for the management of future events or possible scenarios for which there is no precedent.

The Titanic and Beyond: The Ship, the Disaster, and the Legacy Pasquale De Marco, 2025-05-07 In the annals of maritime history, few disasters have captured the public imagination as powerfully as the sinking of the RMS Titanic. On its ill-fated maiden voyage in April 1912, this colossal
