economic analysis and will be of interest to shipping professionals as well as to students of the field. Current Issues in Maritime Economics addresses three major areas of interest. First, contributors discuss the rapidly changing international context. Second, the relationship between market structure and the workability of competition is analyzed. The final area concerns the decision processes of firms in the changing shipping world. Individually, these papers might have found their way into volumes on subjects as disparate as business finance, industrial structure, mathematical modelling, or political philosophy. Together, they offer a broad representation of both the issues and the style of analysis adopted by many of the world's leading maritime economists.
