**Market Capitalism and Christianity** Jim Halteman, 1988      **Friends of the Unrighteous Mammon** Stewart Davenport, 2008-09-15 What did Protestants in America think about capitalism when capitalism was first something to be thought about The Bible told antebellum Christians that they could not serve both God and mammon but in the midst of the market revolution most of them simultaneously held on to their faith while working furiously to make a place for themselves in a changing economic landscape In *Friends of the Unrighteous Mammon* Stewart Davenport explores this paradoxical partnership of transcendent religious values and earthly pragmatic objectives ultimately concluding that religious and ethical commitments rather than political or social forces shaped responses to market capitalism in the northern states in the antebellum period Drawing on diverse primary sources Davenport identifies three distinct Christian responses to market capitalism assurance from clerical economists who believed in the righteousness of economic development opposition from contrarians who resisted the changes around them and adaptation by the pastoral moralists who modified their faith to meet the ethical challenges of the changing economy Delving into the minds of antebellum Christians as they considered themselves their God and their developing American economy *Friends of the Unrighteous Mammon* is an ambitious intellectual history of an important development in American religious and economic life      *Capitalism and Christianity* Luigino Bruni, 2023-12-12 Drawing on debates about the religious nature and origins of contemporary European capitalism this book argues for a distinction between a Northern Protestant and a Southern Catholic spirit of capitalism The first part of the book explores the history of the relationship between capitalism and Christianity Going back much further than Weber's protestant ethic arguments it looks at the early centuries of Christianity from the gospels to Augustine and follows the story through the Middle Ages with special attention devoted to the role of Monasticism and Franciscanism to modernity The second part of the book analyses the origin of the southern spirit of capitalism before and after Luther and the Calvinist Reformation It highlights the key features which demonstrate that the Catholic spirit of capitalism is in fact different from the Anglo Saxon spirit This book will be of interest to readers in history of economic thought history of capitalism economic ethics and religious history      **The Oxford Handbook of Nineteenth-Century Christian Thought** Joel Rasmussen, Judith Wolfe, Johannes Zachhuber, 2017-06-22 Through various realignments beginning in the Revolutionary era and continuing across the nineteenth century Christianity not only endured as a vital intellectual tradition contributed importantly to a wide variety of significant conversations movements and social transformations across the diverse spheres of intellectual cultural and social history The *Oxford Handbook of Nineteenth Century Christian Thought* proposes new readings of the diverse sites and variegated role of the Christian intellectual tradition across what has come to be called the long nineteenth century It represents the first comprehensive examination of a picture emerging from the twin recognition of Christianity's abiding intellectual influence and its radical transformation and diversification under the influence of the forces of modernity Part

one investigates changing paradigms that determine the evolving approaches to religious matters during the nineteenth century providing readers with a sense of the fundamental changes at the time Section two considers human nature and the nature of religion It explores a range of categories rising to prominence in the course of the nineteenth century and influencing the way religion in general and Christianity in particular were conceived Part three focuses on the intellectual cultural and social developments of the time while part four looks at Christianity and the arts a major area in which Christian ideas stories and images were used adapted changes and challenged during the nineteenth century Christianity was radically pluralized in the nineteenth century and the fifth section is dedicated to Christianity and Christianities The chapters sketch the major churches and confessions during the period The final part considers doctrinal themes registering the wealth and scope through broad narrative and individual example This authoritative reference work offers an indispensable overview of a period whose forceful ideas continue to be present in contemporary theology

*Remnant Christianity in a Post-Christian World* W. Paul Jones, 2021-11-03 The contemporary Christian church is in critical decline both in membership and finances All attempts at reversal are failing primarily because of the consuming socioeconomic secular dynamic in which society is immersed in its self destructive course Consequently Christian imagery is losing its conceivability and credibility and past motivations that once encouraged belief have lost their appeal Without these as points of contact the demise of the institutional church will be relentless despite all efforts to halt it Yet as at other crisis points in history the divine promise has been to raise a faithful remnant with sufficient promise to outlast whatever the societal demise After carefully analyzing the ingredients of our societal crisis the author develops the contours of a Remnant Church to be set in place now within the present institutional churches This necessitates distilling a vital spirituality and discerning the heart of a preservable tradition sufficient to claim both personal and communal commitment Thereby prepared for the long haul the Remnant Church can emerge as a prophetic alternative

*The Oxford Handbook of Christianity and Economics* Paul Oslington, 2014 The new interdisciplinary field of Christianity and economics deals with the important and difficult questions that cluster at the boundary of these disciplines drawing on contemporary theory and empirical findings in both fields with roots in older discourses This landmark volume surveys the field and advances the discussion It deploys historical economic and theological analysis to search for answers

*Rich Christians in an Age of Hunger* Ronald J. Sider, 2015-07-28 In an age obsessed with wealth Christians seem to have forgotten that scripture encourages believers to give to the poor Why do 1.3 billion people live in abject poverty And what should Christians do about it Despite a dramatic reduction in world hunger 34 000 children still die daily of starvation and preventable disease and 1.3 billion people around the world remain in abject poverty Dr Ron Sider a professor of theology examines the issues of poverty and hunger in modern society While the Bible is full of instructions to care for the poor and warns against being seduced by riches it's been statistically proven that the richer countries become the less they give Finding that conservatives blame what they consider to be morally reprehensible

individual choices and liberals blame what they believe to be constrictive social and economic policy Dr Sider finds himself agreeing with both sides First published in 1978 *Rich Christians in an Age of Hunger* has had an enormous impact on how believers and churches view questions of poverty and hunger Dr Sider's insights provide a compelling look at what it truly means to follow Christ This edition of *Rich Christians in an Age of Hunger* is Newly revised expanded and updated Listed as one of the 100 most influential books in religion in the 20th century A resource for Christians seeking to overcome poverty and change the economic structures of our world In this fresh look at an age old problem Dr Sider offers a detailed explanation of the causes of poverty and hunger as well as a comprehensive series of practical solutions for Christians who want to seriously pursue their faith and become better followers of Jesus **Faith in Markets** Joseph P.

Slaughter, 2023-11-14 In the first half of the nineteenth century the United States saw both a series of Protestant religious revivals and the dramatic expansion of the marketplace Although today conservative Protestantism is associated with laissez faire capitalism many of the nineteenth century believers who experienced these transformations offered different competing visions of the link between commerce and Christianity Joseph P Slaughter offers a new account of the interplay between religion and capitalism in American history by telling the stories of the Protestant entrepreneurs who established businesses to serve as agents of cultural and economic reform *Faith in Markets* examines three Christian business enterprises and the visions of a Christian marketplace they represented Shaped by Pietist Calvinist and Arminian theologies each offered different answers to the question of what a moral Christian market should look like George Rapp Associates operated sophisticated textile factories as the business side of the model community the Harmony Society which practiced communal living in pursuit of a harmonious workforce The Pioneer Stage Coach Line provided transportation services only six days a week to keep Sunday sacred attempting to reform society by outcompeting less pious businesses The publisher Harper Brothers sought to elevate American culture through commerce by producing virtuous products like lavishly illustrated Bibles Drawing on a wide range of sources *Faith in Markets* explores how the founders and owners of these enterprises infused their faith into their businesses and in turn how distinctly religious businesses shaped American capitalism and society *Encyclopedia of Christianity in the Global South* Mark A. Lamport, 2018-06-01 Christianity has transformed many times in its 2 000 year history from its roots in the Middle East to its presence around the world today From the mid twentieth century onward the presence of Christianity has increased dramatically in Asia Africa and Latin America and the majority of the world's Christians are now nonwhite and non Western The *Encyclopedia of Christianity in the Global South* traces both the historical evolution and contemporary themes in Christianity in more than 150 countries and regions The volumes include maps images and a detailed timeline of key events The phrases Global Christianity and World Christianity are inadequate to convey the complexity of the countries and regions involved this encyclopedia with its more than 500 entries aims to offer rich perspectives on the varieties of Christianity where it is growing how the spread of Christianity

shapes the faith in various regions and how the faith is changing worldwide

Christian Economics Kit H. Lui, 2024-01-31

In today's ever changing economic landscape understanding the principles of Christian economics is crucial for individuals communities and policymakers alike This insightful book delves into the intersection of faith and economics presenting a comprehensive exploration of Christian principles and their application in the realm of finance This book was entirely written by my POE AI bot called KitLuiChristianEcon This book offers a fresh and compelling perspective on economic theory and practice It begins by defining Christian economics as the application of biblical principles to the study and understanding of economic behavior and systems By examining the authority of biblical revelation readers gain a deeper understanding of how faith can shape economic decision making The book goes beyond theoretical discussions providing practical guidance on applying Christian principles to various economic issues It explores the importance of stewardship and responsible resource management highlighting the biblical perspective on wealth and poverty Additionally it sheds light on the ethical dimensions of business and commerce emphasizing the pursuit of justice and fairness This book also critiques secular economic theories and policies highlighting their limitations without biblical standards It challenges popular ideologies such as socialism and state interventionism while exploring the compatibility of capitalism with Christian values The book encourages readers to evaluate the impact of economic systems on society and advocates for a more just and equitable economic order Furthermore this book addresses contemporary economic challenges such as globalization environmental stewardship and the Christian response to economic inequality It offers insights into successful models of Christian entrepreneurship and social enterprise showcasing real world examples of how Christian economic principles can be put into action Whether you are an economist a business professional or simply interested in understanding the intersection of faith and economics this book provides a thought provoking and practical guide With its clear and accessible writing style this book invites readers to engage in economic discourse and action encouraging a vision for a more just and flourishing economy that aligns with biblical principles While the Bible does not provide a specific economic system or blueprint for modern economies it does offer principles that can guide our thinking and actions These principles highlight the importance of economic justice ethical business practices responsible stewardship and the pursuit of the common good One key aspect highlighted by the bot is the understanding that God is the ultimate owner of all creation and we as His stewards are called to manage our resources in a way that reflects His character and values This perspective challenges us to consider the impact of our economic choices on others particularly the marginalized and vulnerable Moreover the biblical perspective on Christian economics calls for a holistic understanding of human well being It recognizes that economic flourishing is not solely measured by material wealth but encompasses the social emotional and spiritual dimensions of life This challenges us

to prioritize relationships community and the pursuit of justice alongside economic growth Another crucial theme identified by the bot is the call to address economic injustices and promote a more just and equitable society Christians are encouraged to advocate for policies and practices that alleviate poverty redistribute resources and challenge systems that perpetuate inequality The vision for a more just and flourishing economy presented by the bot is not detached from the realities of modernity but rather seeks to engage with them It recognizes the need for structural analysis responsible business practices environmental stewardship collaboration and solidarity to bring about meaningful change In conclusion a call for Christian economics in modernity compels us to examine economic principles and practices through the lens of scripture It challenges us to integrate our faith into our economic decisions advocating for justice stewardship and the well being of all individuals and communities By embracing this biblical perspective we can work towards a more just and flourishing economy that reflects God's character and values in the modern world

**Marketing and Christian Proclamation in Theological Perspective** Emily Beth Hill, 2021-06-28 In today's market driven world the contemporary church faces pressing questions as it continues to be formed by the powerful forces of neoliberal capitalism This book builds on theological examinations of capitalism and consumerism to develop a theology of marketing that addresses two key questions First even though church marketing seems to help churches grow amidst a climate of declining church affiliation should the church use it Second considering the church's indistinguishability from culture in relation to consumption how should Christians relate to material goods To address these questions Emily Beth Hill develops a framework that draws on the concrete practices of marketing such as focus groups big data branding and advertising and the trajectory of their use over time along with Martin Luther's theology of the Word Combining Martin Luther's pro me for me theology with marketing concepts Hill shows that while marketing and the gospel have formal pro me similarities materially they are quite different marketing operates as a word of law distinct from the effective liberating word of the gospel proclaimed for us and thus the two produce different human identities While existing examinations of capitalism primarily rely on theologies and discourses of desire Hill reveals that a theology of the Word illuminates a fruitful new area for reflection on how the church can resist the deformations of capitalism

**The Routledge Companion to Management and Organizational History** Patricia Genoe McLaren, Albert J. Mills, Terrance G. Weatherbee, 2015-05-15 The field of management and organizational history has reached a level of maturity that means an overview is long overdue Written by a team of globally renowned scholars this comprehensive companion analyses management and organizational history reflecting on the most influential periods and highlighting gaps for future research From the impact of the Cold War to Global Warming it examines the field from a wide array of perspectives from humanities to the social sciences Covering the entire spectrum of the field this volume provides an essential resource for researchers of business and management

**The Globalisation of Addiction** Bruce K. Alexander, 2008 The Globalisation of Addiction presents a radical rethink about the nature of addiction Scientific medicine

has failed when it comes to addiction There are no reliable methods to cure it prevent it or take the pain out of it There is no durable consensus on what addiction is what causes it or what should be done about it Meanwhile it continues to increase around the world This book argues that the cause of this failure to control addiction is that the conventional wisdom of the 19th and 20th centuries focused too single mindedly on the afflicted individual addict Although addiction obviously manifests itself in individual cases its prevalence differs dramatically between societies For example it can be quite rare in a society for centuries and then become common when a tribal culture is destroyed or a highly developed civilization collapses When addiction becomes commonplace in a society people become addicted not only to alcohol and drugs but to a thousand other destructive pursuits money power dysfunctional relationships or video games A social perspective on addiction does not deny individual differences in vulnerability to addiction but it removes them from the foreground of attention because social determinants are more powerful This book shows that the social circumstances that spread addiction in a conquered tribe or a falling civilisation are also built into today s globalizing free market society A free market society is magnificently productive but it subjects people to irresistible pressures towards individualism and competition tearing rich and poor alike from the close social and spiritual ties that normally constitute human life People adapt to their dislocation by finding the best substitutes for a sustaining social and spiritual life that they can and addiction serves this function all too well The book argues that the most effective response to a growing addiction problem is a social and political one rather than an individual one Such a solution would not put the doctors psychologists social workers policemen and priests out of work but it would incorporate their practices in a larger social project The project is to reshape society with enough force and imagination to enable people to find social integration and meaning in everyday life Then great numbers of them would not need to fill their inner void with addictions

**Catholic Discordance** Massimo Borghesi, 2021-11-15 One element of the church that Pope Francis was elected to lead in 2013 was an ideology that might be called the American model of Catholicism the troubling result of efforts by intellectuals like Michael Novak George Weigel and Richard John Neuhaus to remake Catholicism into both a culture war colossus and a prop for ascendant capitalism After laying the groundwork during the 1980s and armed with a selective and manipulative reading of Pope John Paul II s 1991 encyclical *Centesimus Annus* these neoconservative commentators established themselves as authoritative Catholic voices throughout the 1990s viewing every question through a liberal conservative ecclesial political lens The movement morphed further after the 9 11 terror attacks into a startling amalgamation of theocratic convictions which led to the troubling theo populism we see today The election of the Latin American pope represented a mortal threat to all of this and a poisonous backlash was inevitable bringing us to the brink of a true American schism This is the drama of today s Catholic Church In *Catholic Discordance* Neoconservatism vs the Field Hospital Church of Pope Francis Massimo Borghesi who masterfully unveiled the pope s own intellectual development in his *The Mind of Pope Francis* analyzes the origins of today s Catholic neoconservative movement and its clash with the church

that Francis understands as a field hospital for a fragmented world      Christianity and Religious Diversity Harold A. Netland, 2015-05-12 This book explores how religions have changed in a globalized world and how Christianity is unique among them Harold Netland an expert in philosophical aspects of religion and pluralism offers a fresh analysis of religion in today's globalizing world He challenges misunderstandings of the concept of religion itself and shows how particular religious traditions such as Buddhism undergo significant change with modernization and globalization Netland then responds to issues concerning the plausibility of Christian commitments to Jesus Christ and the unique truth of the Christian gospel in light of religious diversity The book concludes with basic principles for living as Christ's disciples in religiously diverse contexts      *The Omega Point* Mike Hockney, 2013-09-30 History's biggest lie is that there's one God and he created the universe out of nothing Nothing has done more damage to the human psyche than monotheism the doctrine of an all powerful Spy God the divine peeping Tom who sentences to hell anyone who doesn't slavishly obey him In fact the universe is a mathematical God factory and creates infinite Gods over eons of time The universe via dialectical ontological mathematics is converging on the perfect answer to everything the condition known as the Absolute or the Omega Point The universe travels mathematically from Alpha to Omega from perfect potential to perfect actualization The ancient secret society of the Illuminati has waged a war against Abrahamic monotheism and promoted the doctrine of becoming God Mathematics is the Philosopher's Stone that can transmute base metal ordinary humans into gold Gods You too can complete your cosmic journey across countless reincarnations Are you ready to become an Omega Human      Theological Education and Christian Scholarship for Human Flourishing Celucien L. Joseph, 2022-09-14 This book explores the interconnection of theological education and Christian scholarship cultural and theological hermeneutics pedagogy and community knowledge democracy and citizenship Yet the three major disciplines or discourses covered in this work include multicultural education theology and hermeneutics through the lens of human flourishing and the concept of the good life From this angle this project is written from three different methods and approaches that intersect with each other a theology of contextualization a hermeneutics of interculturality and a pedagogy of cultural literacy and transformative community knowledge The book advances the idea that theological education should be the starting point to foster candid conversations about the importance of democracy and human rights civic engagement and the political life inclusion and diversity and pluralism and difference in our multicultural society The book uses the tools of multicultural education and cultural knowledge to enhance democracy and promote fundamental human virtues that would sustain the good life and human flourishing in the world in the Aristotelian sense and in the Socratic idea of local and world citizenship Finally this text offers an alternative vision to contemporary theological education to deconstruct the white male and Eurocentric narratives of theological education and Christian scholarship      **Christianity Incorporated** Michael L. Budde, Robert Brimlow, 2007-02-01 These days getting religion is generally considered a rather quaint thing of the past Getting spirituality on the other hand is the hottest thing on

the market In fact corporate sponsored spiritual salve is becoming the most popular prescription for the overworked and soul weary employees But for many Christians this antidote has become its own epidemic How is this epidemic infecting the church How should the church respond as a community of believers According to authors Michael Budde and Robert Brimlow the church must resist becoming the chaplain to capitalism Christianity Incorporated reminds us that Christ centered discipleship is fundamentally at odds with consumer capitalist priorities The church must have a mission and a voice in society that is distinct from rather than in chorus with watered down corporate spirituality Christianity Incorporated is a wake up call for all Christians Courageous current and accessible this book will provide guidance and insight to anyone concerned with pursuing Christian discipleship in our consumer culture
