The Critique of Commodification Christoph Hermann, 2021 In recent years activists around the globe have challenged the commodification of water education health care and other essential goods while academics have warned from unintended effects when everything can be bought and sold But what is commodification And what is the problem with commodification In *The Critique of Commodification*

Christoph Hermann argues that commodification entails production for profit rather than social needs and that production for profit has a number of harmful effects including the exclusion of those who cannot pay the marginalization of those whose collective purchasing power is not large enough and the focus on highly profitable forms of production over more socially beneficial and ecologically sustainable alternatives Drawing upon and extending the work of Marx Polanyi and Luxemburg Hermann goes beyond the standard moral critiques of markets and adopts a materialist approach to emphasize the dispossession of public resources and to highlight how goods and services are altered when sold on markets for profit Tracing the intellectual history of the term commodification this book not only criticizes commodification but also proposes a new model for production that focuses on needs rather than profits *The Political Economy of Corporation Tax* John Snape, 2011-12-09 Excellent technical writing on corporation tax abounds but it tends to be inaccessible to public lawyers political theorists and political economists Although recent years have seen not only an explosion in public law scholarship but also a reawakening of interest in interpretative political theory and political economy the potential of these perspectives to illuminate the corporation tax debate has remained unexplored In this important work John Snape seeks to reconcile these disparate strands of scholarship and to contribute to a new way of understanding and conceptualising the reform of the law relating to corporate taxation Drawing on important developments in public law scholarship the study combines elements of political theory and political economy It advances a new interpretation of corporation tax law as an instrument of rule through the maximisation of a nation's economic potential Snape shows how corporate taxation belongs at the centre of any discussion of economic globalisation not only because of the potential of national tax systems to influence inward investment decisions but also because of the potential of those decisions to shape the public interest that those tax systems might embody Following public law and politics models the book looks afresh at the impact of Britain's political institutions of the processes of its representative government and of the theory that moulds and orders the values that the corporation tax code contains This is a timely exploration of cutting edge issues of public policy *Hidden Markets* Patricia Burch, 2009-01-13 Across the U S test publishers software companies and research firms are swarming to take advantage of the revenues made available by the No Child Left Behind Act In effect the education industry has assumed a central place in the day to day governance and administration of public schools a trend that has gone largely unnoticed by policymakers or the press until now Drawing on analytic tools *Hidden Markets* examines specific domains that the education industry has had particular influence on home schooling remedial instruction management consulting test development data management and staff development Burch's analysis demonstrates that only when we subject the education industry to systematic and in depth critical analysis can we begin to demand more corporate accountability and organize to halt the slide of education funds into the market ***The SAGE Handbook of Television Studies*** Manuel Alvarado, Milly Buonanno, Herman Gray, Toby Miller, 2014-12-09 Genuinely transnational in content as sensitive to the importance of production as consumption covering

the full range of approaches from political economy to textual analysis and written by a star studded cast of contributors Emeritus Professor Graeme Turner University of Queensland Finally we have before us a first rate and wide ranging volume that reframes television studies afresh boldly synthesising debates in the humanities cultural studies and social sciences This volume should be in every library and media scholar s bookshelf Professor Ravi Sundaram Centre for the Study of Developing Societies Bringing together a truly international spread of contributors from across the UK US South America Mexico and Australia this Handbook charts the field of television studies from issues of ownership and regulation through to reception and consumption Separate chapters are dedicated to examining the roles of journalists writers cinematographers producers and manufacturers in the production process whilst others explore different formats including sport novella and soap opera news and current affairs music and reality TV The final section analyses the pivotal role played by audiences in the contexts of gender race and class and spans a range of topics from effects studies to audience consumption The SAGE Handbook of Television Studies is an essential reference work for all advanced undergraduates graduate students and academics across broadcasting mass communication and media studies
