the economics curriculum      *The Economics of Science* James R Wible,2003-09-02 Science is difficult and costly to do well. This study systematically creates an economics of science. Many aspects of science are explored from an economic point of view. The scientist is treated as an economically rational individual. This book begins with economic models of misconduct in science and the legitimate normal practices of science moving on to market failure, the market place of ideas, self-correctiveness and the organizational and institutional structures of science. An exploration of broader methodological themes raised by an economics of science ends the work.

**International Economic Policy for the Polycrisis** Konrad Raczkowski, Piotr Komorowski,2024-09-17 The struggle for world leadership between China and the United States, resulting in Russia's war with Ukraine among other things, underscores the reality of structural changes in the global economy and the global system. This book explains that a new era of egocentrism and

polycrisis in a multipolar system has emerged in international economic policy with a strong drive toward interventionism and protectionism of national economies Dynamic economic imbalances are becoming a constant factor in disrupting international competitiveness and forcing changes in both monetary policy and general economic policy This prompts a new more pragmatic definition of fundamental concepts in the theoretical sphere as well as an up to date and viable cause and effect narrative that is not disconnected from decision making processes in the economic and political spheres This book provides a comprehensive diagnosis of the current global economy landscape and evaluates the processes affecting the economic and financial realities and the effectiveness of economic policies The recent dynamics have rendered much of the existing literature outdated or confined to individual economies economic systems and regions The book describes the evolution of international economic policy offering a comparative analysis of foreign trade theories especially in the context of macroeconomic trends and the impact of international trade in goods and services in the new balance of power of the global economy Targeted primarily at academics students and researchers in economics finance international relations and management it will also serve as a valuable resource for policymakers shaping and implementing contemporary state economic policies
