Marketing Canada's Energy A Strategy For Security In Oil And Gas:

Marketing Canada's Energy Ian McDougall, 1983-01-01 Written in the early 1980s author I A McDougall shows that as an import dependent country Canada was ill prepared for possible disruptions in its oil supply McDougall envisioned a future in which superpower rivalry over dwindling world reserves coupled with rationing of supply by OPEC members and volatility in the Persian Gulf would make Canada's dependence on foreign oil increasingly precarious He asserted that the contemporary Liberal government's National Energy Program was a useful first step in promoting an independent energy strategy Marketing Canada's Energy is a passionate addition to the lively debate over Canada's independence during the 1980s

Marketing Canada's Energy Ian McDougall, 1983 From the back cover Canada is heading for a crunch in its energy supply Author I A McDougall shows that for an import dependent country Canada is ill prepared for disruptions in its oil supply He finds that the International Energy Agency and the National Energy Board cannot protect Canada's energy security since control over oil imports is largely in the hands of international oil companies basing their decisions on corporate advantage Moreover the domestic production situation is jeopardized by the alienation of the oil producing provinces lowered energy investment expectations and a jumble of fiscal and tax expenditures McDougall asserts that the National Energy Program was a first step to forming an energy strategy independent of the major foreign owned oil companies But the creation of a National Energy Marketing Commission with broad regulatory and purchasing powers is needed to bring about a comprehensive energy management scheme
