Postiglione, 2013-10-15 This volume focuses on policies and practices in the education of China's national minorities with the purpose of assessing the goals and impact of state sponsored education for China's non Han people's. The essays in the four sections of this book examine cultural challenges to state schooling, the extent of educational provision in minority areas, the perspectives of Tibetan and Uyghur minorities toward state education along with providing case studies of four national minorities. Rising Inequality in China Shi Li, Hiroshi Sato, Terry Sicular, 2013-10-31 This book, a sequel to *Inequality and Public Policy in China* 2008, examines the evolution of inequality in China from 2002 to 2007, a period when the new harmonious society development strategy was adopted under Hu Jintao and Wen Jiabao. It fills a gap in knowledge about the outcomes of this development strategy for equity and inequality. Drawing on original information collected from the recent two waves of nationwide household surveys conducted by the China Household Income Project, this book provides a detailed overview of recent trends in income inequality and cutting edge analysis of key factors underlying such trends. Topics covered include inequality in education, changes in homeownership and the distribution of housing wealth, the evolution of the migrant labor market, disparities between public and non public sectors, patterns of work and non work, gender, ethnicity and the impacts of public policies such as reforms in taxation and social welfare programs. *Modernising Education in Britain and China* Patricia Potts, 2003-12-08 Based upon Patricia Potts' teaching experience and research in Britain, China and Hong Kong, this book provides an original, stimulating and insightful perspective on inclusive educational reform in two different cultures.

Educational Inequality Emily Carroll Hannum, 1998 *Beyond the Century of the Child* Willem Koops, Michael Zuckerman, 2012-10-30 In 1900 Ellen Key wrote the international bestseller *The Century of the Child*. In this enormously influential book, she proposed that the world's children should be the central work of society during the twentieth century. Although she never thought that her century of the child would become a reality, in fact it had much more resonance than she could have imagined. The idea of the child as a product of a protective and coddling society has given rise to major theories and arguments since Key's time. For the past half century, the study of the child has been dominated by two towering figures: the psychologist Jean Piaget and the historian Philippe Ariès. Interest in the subject has been driven in large measure by Ariès's argument that adults failed even to have a concept of childhood before the thirteenth century and that from the thirteenth century to the seventeenth there was an increasing childishness in the representations of children and an increasing separation between the adult world and that of the child. Piaget proposed that children's logic and modes of thinking are entirely different from those of adults. In the twentieth century, this distance between the spheres of children and adults made

possible the distinctive study of child development and also specific legislation to protect children from exploitation abuse and neglect Recent students of childhood have challenged the ideas those titans promoted they ask whether the distancing process has gone too far and has begun to reverse itself In a series of essays Beyond the Century of the Child considers the history of childhood from the Middle Ages to modern times from America and Europe to China and Japan bringing together leading psychologists and historians to question whether we unnecessarily infantilized children and unwittingly created a detrimental wall between the worlds of children and adults Together these scholars address the question whether a hundred years after Ellen Key wrote her international sensation the century of the child has in fact come to an end Higher Education, Meritocracy and Inequality in China Ye Liu,2016-10-08 This book investigates the changing opportunities in higher education for different social groups during China s transition from the socialist regime to a market economy The first part of the book provides a historical and comparative analysis of the development of the idea of meritocracy since its early origins in China and in more recent western thought The second part then explores higher education reforms in China the part played by supposedly meritocratic forms of selection and the implications of these for social mobility Based on original empirical data Ye Liu sheds light on the socio economic gender and geographical inequalities behind the meritocratic facade of the Gaokao Liu argues that the Chinese philosophical belief in education based meritocracy had a modern makeover in the Gaokao and that this ideology induces working class and rural students to believe in upward social mobility through higher education When the Gaokao broke the promise of status improvement for rural students they turned to the Chinese Communist Party and sought political connections by actively applying for its membership This book reveals a bleak picture of visible and invisible inequality in terms of access to and participation in higher education in contemporary China Written in an accessible style it offers a valuable resource for researchers and non specialist readers alike 王康,2000 王康,2000 Inequality and Growth in Modern China Guanghua Wan,2008-04-03 This volume provides comprehensive up to date coverage of inequality and poverty issues in China Going beyond standard data sources and using state of art research techniques this volume substantiates a number of findings and conclusions and ensures policy recommendations are reliable and robust *Education and Society* ,1992 *Equality and Freedom in Education* Brian Holmes,2022-02-26 First published in 1985 Equality and Freedom in Education investigates the extent to which it is possible or desirable to provide equal opportunities in education regardless of age sex race language and social class Attempts to make such provision regularly attract the criticism that they remove the freedom of parents and religious bodies to educate children in accordance with their particular wishes To understand this dilemma the book analyses the educational systems and practices in England and Wales France the USA the USSR China and Japan Information about each system is provided in accordance with a taxonomy developed by Professor Holmes for the International Bureau of Education in Geneva and widely accepted by Ministries of Education throughout the world Simplified diagrams show how school systems are organised and how children

pass through the school system and essential statistical information taken from UNESCO sources is also provided The book will be of interest to students of education and sociology *China Since 1949* Linda Benson,2016-04-20 Exploring the remarkable story of China's rise to global prominence *China since 1949* provides a concise yet comprehensive overview of the events that have shaped the country since the middle of the twentieth century Covering the Maoist era through the Reform period to the present day this book addresses subjects such as China's position as a world economic power the Chinese Communist Party's treatment of ethnic minorities women's experiences under the Communist regime and China's human rights record Fully updated throughout the third edition includes a new chapter focusing on China since 2010 discussion of current issues such as China's territorial disputes computer hacking and cyber espionage corruption leadership changes and the slowing of China's economic growth extensively revised chapters on China and the World and on Government Politics and the Economy An updated selection of primary source documents Also containing a chronology of events from 1949 to 2015 a Who's Who of key figures a glossary and a guide to further reading *China Since 1949* is an accessible and engaging introduction to China's recent past and essential reading for students of modern Chinese history
