 Stockard,Timothy W. Wood,Cristy Coughlin,Caitlin Rasplica Khoury,2020-07-09 Based on more than ten years of research All  
 Students Can Succeed presents a comprehensive review of research related to Direct Instruction DI a highly structured  
 method of teaching based on the assumption that all students can learn if given appropriate instruction The authors identify  
 over 500 research reports published over the last 50 years and encompassing almost 4 000 effect sizes no doubt the largest  
 meta analysis of any single method of instruction ever published Extensive statistical analyses show that estimates of DI s  
 effectiveness are consistent over time with different research approaches across different school environments students from  
 all types of backgrounds different comparative programs and both academic achievement and non academic outcomes  
 including student self confidence Effects are substantially stronger than those reported for other curricula When students  
 have DI for more time and when teachers implement the programs as designed the effects are even stronger Results indicate  
 that DI has the potential to dramatically change patterns of student achievement in the United States In an even handed style  
 accessible to policy makers educators and parents the authors describe the theory underlying DI its development use and  
 history systematically examine criticisms and discuss policy implications Extensive appendices provide detailed information
