Reading Narrative Fiction Seymour Benjamin Chatman, 1993 This short fiction anthology offers a more precise and extensive treatment of narrative technique than other books of its kind Targeting the needs and interests of today's readers the author uses down to earth language and builds on readers familiarity with narrative devices in film television and other popular media to teach this new approach to literary analysis While offering more technical depth Chatman never overwhelms He provides unusually clear and exact definitions of such terms as characterization and point of view along with many illustrations of how these techniques actually operate in short stories His explanations and examples enable readers to read narratives with a new awareness of how they are constructed

Children Reading Print and Television Narrative Dr Muriel Robinson, Muriel Robinson, 2020-04-14 Contrary to the popular assumption that television viewing is a very different process from book reading and inhibits reading in a variety of ways the author argues that in fact the two activities can be mutually supportive and involve many of the same strategies It may have implications for teachers as the book offers a research based view and calls for a new emphasis in school practice which will include television as text and which supports children's developing abilities to make meaning from a range of texts The author highlights the need for teachers to consider television in the same way as print media

somewhat more complex Has the concept of narrative passed intact from literature to sociology from structuralism to therapeutic practice or to the study of everyday storytelling In this volume philosophers psychologists literary theorists sociolinguists and sociologists use methodologically challenging test cases to scrutinize the types transformations and trajectories of the concept and theory of narrative The book powerfully argues that narrative concepts are profoundly relevant in the understanding of life experience and literary texts Nonetheless it emphasizes the vast contextual differences and contradictions in the use of the concept     *The Psychology of Reading* Mildred C. Robeck, Randall R. Wallace, 2017-11-06

The need to know why as well as how children and youth respond as they do to reading instruction has guided the selection of this book's content The second edition of this title originally published in 1990 has retained and elaborated upon the three major themes previously presented that reading is a linguistic process that motivation the affective domain may be as important in learning to read as the cognitive domain and that the reality of learning theory is to be found in the mechanisms of the brain where information is mediated and memory traces are stored The text integrates views from cognitive psychology psycholinguistics and neuropsychology as they relate to reading and writing A learning motivation model is provided to present associative learning conceptualization and self directed reading in a hierarchical relationship with distinct cognitive and affective components The distinction between beginning and proficient reading is maintained throughout the text     Narrative Research Amia Lieblich, Rivka Tuval-Mashiach, Tamar Zilber, 1998-05-27 A concise volume aimed at researchers and academics in sociology anthropology psychology and interpersonal communication     **Style and Rhetoric of Short Narrative Fiction** Dan Shen, 2013-11-12 In many fictional narratives the progression of the plot exists in tension with a very different and powerful dynamic that runs at a hidden and deeper level throughout the text In this volume Dan Shen systematically investigates how stylistic analysis is indispensable for uncovering this covert progression through rhetorical narrative criticism The book brings to light the covert progressions in works by the American writers Edgar Allan Poe Stephen Crane and Kate Chopin and British writer Katherine Mansfield     *Narrative* Paul Cobley, 2013-12-04 Human beings have constantly told stories presented events and placed the world into narrative form This activity suggests a very basic way of looking at the world yet this book argues even the most seemingly simple of stories is embedded in a complex network of relations Paul Cobley traces these relations considering the ways in which humans have employed narrative over the centuries to re present time space and identity This second revised and fully updated edition of the successful guidebook to narrative covers a range of narrative forms and their historical development from early oral and literate forms through to contemporary digital media encompassing Hellenic and Hebraic foundations the rise of the novel realist representations narratives of imperialism modernism cinema postmodernism and new technologies A final chapter reviews the way that narrative theory in the last decade has re orientated definitions of narrative Written in a clear engaging style and featuring an extensive glossary of terms this is the essential introduction to the history and theory of narrative     *Interpreting New*

*Testament Narratives* Eric J. Douglass, 2018-10-02 Narratives are the concrete manifestation of an author's subjectivity. They function as that person's voice and should be treated with the same respect that is granted to all voices. In *Interpreting New Testament Narratives* Eric Douglass develops this ethical perspective so that narratives are treated as communication and the author's voice is regarded as a valued perspective. Employing a cross-disciplinary approach, Douglass shows how readers engage narratives as mental simulations creating a temporary possible world that readers enter and experience. To recover communication, readers locate the events of this world in the culture of the intended audience and translate this meaning into the modern reader's worldview. Using a staged reading design, this initial reading is followed by readings of critique.

*Narratives in Early Childhood Education* Susanne Garvis, Niklas Pramling, 2017-05-08 Over the past few decades a growing body of literature has developed which examines children's perspectives of their own lives, viewing them as social actors and experts in their understanding of the world. Focusing specifically on narratives, this unique and timely book provides an analysis of these new directions in contemporary research approaches to explore the lived experiences of children and teachers in early childhood education, in addition to presenting original research on children's narratives. The book brings together a variety of well-regarded international researchers in the field to highlight the importance of narrative in young children's development from local and global perspectives. While narrative is clearly understood within different countries, this is one of the first texts to build an international understanding, acknowledging the importance of culture and context. It presents up-to-date research on the latest research methods and analysis techniques using a variety of different approaches in order to critically reflect on the future for narrative research and its insights into early childhood education. *Narratives in Early Childhood Education* will be of interest to postgraduate students, academics, and researchers in early childhood education, as well as early childhood professionals, government policy makers, and early childhood organisations and associations.

**Reading Today** Heta Pyrhönen, Janna Kantola, 2018-01-15 New technologies are changing our reading habits. Laptops, e-readers, tablets, and other handheld devices supply new platforms for reading, and we must learn to manage them by scrolling, clicking, or tapping. *Reading Today* places reading in current literary and cultural contexts in order to analyse how these contexts challenge our conceptions of who reads, what reading is, how we read, where we read, and for what purposes, and then responds to the questions this analysis raises: Is our reading experience becoming a flat one? And does reading in a media environment favour quick reading? Alongside these questions, the contributors unpack emerging strategies of reading. They consider, for example, how paying attention to readers' emotional reactions as an indispensable component of reading affects our conception of the reading process. Other chapters consider how reading can be explored through such topics as experimental literature, the contemporary encyclopedic novel, and the healing power of books.
