Humanity's Last Stand Nicanor Perlas, 2018 The twenty first century is the age of science and technology It will also be the age when humanity confronts for the first time a challenge that may overwhelm and destroy the human species itself in as little as 12 to 20 years from now This is the challenge of artificial intelligence AI Deployed properly AI will confer tremendous benefits to society It is already doing this Deployed inappropriately or mistakenly AI will undermine human civilization as it is also starting to do and could then lead to

the extinction of humanity Scientists philosophers and engineers call this latter possibility the existential risk of AI The fate of our future is literally in our hands Nicanor Perlas from the preface Although still in its earliest stages artificial intelligence is radically transforming all aspects of society With the immanent emergence of Artificial Super Intelligence ASI and the illusory temptations of transhumanism humankind stands at a crossroads Nicanor Perlas makes an urgent plea in this book It is imperative he says that we take immediate steps to ensure that digitized technology is aligned to human values and priorities Otherwise ASI will kill the essence of our humanity Furthermore if we do not master it now ASI will transform humanity into its own image ultimately it will destroy the human race AI experts have not offered a single cogent solution to this existential threat Rudolf Steiner however not only foresaw these developments but also provided clear alternatives Steiner who developed a contemporary scientific approach to spirituality provided philosophical ontological and social innovations to save humanity from this technological abyss It is the task of the global anthroposophic movement to pioneer this civilization saving work to establish spiritual scientific ideas in mainstream culture that would allow AI to emerge in a healthier societal context Perlas offers an overview of the AI phenomenon together with its related transhuman concepts of perfecting humanity outlining the critical internal and external responses needed to meet them consciously In particular the author addresses the movement connected to the work of Rudolf Steiner indicating its all important tasks to cooperate with progressive individuals and movements including scientists and civil society activists to mobilize its daughter movements for action and ultimately to cooperate with the spiritual powers that have guided and served humanity since the dawn of time This says Perlas is humanity s last stand Failure is not an option

assembled works by Steiner The result is the first Bible commentary in the light of anthroposophic insight This is the first volume of a series of Bible commentary by the author It is based on the anthroposophic understanding given to humanity by Rudolf Steiner during the first quarter of the twentieth century Bible commentaries have always reflected the general line of thinking of their authors However the dramatic newness of anthroposophic thought means that perhaps the usual method of using a Bible commentary is not appropriate here A large part of *The Burning Bush* is necessarily devoted to laying an anthroposophic or spiritual scientific groundwork A major assumption indulged in most Bible commentaries that one can go directly to portions dealing with given passages of scripture and understand what is being said about them does not fit
