*Studies in Medieval Philosophy, Science, and Logic* Ernest Addison Moody, 1975      Readings in Introductory Philosophical Analysis John Hospers, 1969      *Analysis and Metaphysics* Keith Lehrer, 2012-12-06 AND BIOGRAPHICAL SKETCH This collection of essays in honor of Roderick M Chisholm is the work of his former students The book was conceived and the original contributors invited by Richard Taylor We restricted the contributors to former students of Chisholm as a special tribute to his acknowledged as a teacher of philosophy The profundity of his contributions to genius epistemology and metaphysics are acknowledged throughout the philosophical world Those who have been present at his lectures and seminars who have been incited to philosophical celebration by the clarity and precision of his exposition know that his impact on contemporary philosophy far exceeds the influence of the written word It is we think appropriate that his students should reserve for themselves the privilege of honoring Chisholm in this way as his 60th birthday draws near The tribute paid to Chisholm in Taylor's essay conveys a personal impression I shall consequently refrain from personal reminiscence here and instead mention some of the highlights of an illustrious life Chisholm was born on November 27 1916 in North Attleboro Massachusetts He married Eleanor F Parker in 1943 and raised three children with her He received an A B from Brown in 1938 a Ph D from Harvard in 1942 and served in the U S Army from 1942 to 1946      The Foundations of Science and the Concepts of Psychology and Psychoanalysis Herbert Feigl, Michael Scriven, 1956-01-01 The Foundations of Science and the Concepts of Psychology and Psychoanalysis was first published in 1956 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions This first volume of Minnesota Studies in the Philosophy of Science presents some of the relatively more consolidated research of the Minnesota Center for Philosophy of Science The work of the Center which was established in 1953 through a grant from the Louis W and Maud Hill Family Foundation has so far been devoted largely to the philosophical logical and methodological problems of psychology Some of the twelve papers in this volume are concerned with broad philosophical foundations others consider specific problems of method or interpretation The contributors some of whom are represented in the authorship of more than one paper are Herbert Feigl director of the Center Rudolf Carnap B F Skinner Michael Scriven Albert Ellis Antony Flew L J Cronbach Paul E Meehl R C Buck and Wilfrid Sellars      Mind, Matter and Method Paul K. Feyerabend, Grover Maxwell, 1966      *Physicalism* Daniel Stoljar, 2010-04-05 Physicalism the thesis that everything is physical is one of the most important yet divisive problems in philosophy In this

superb introduction to the problem Daniel Stoljar focuses on three fundamental questions the interpretation truth and philosophical significance of physicalism      *The Metaphysics of Practice* Wilfrid Sellars,2023-08-08 The Metaphysics of Practice brings together Wilfrid Sellars s writings on topics to do with action community and obligation published essays manuscripts and correspondence Sellars s practical philosophy was absolutely central to his overarching philosophical project of situating persons as practically rational norm governed animals within the world as described by an ideal science The Editors Introduction offers an overview of Sellars s metaethics detailing its key features and explaining how these features are supposed to solve outstanding metaethical problems that not only faced Sellars s contemporaries but continue to create lively debate among contemporary theorists And the editors give chapter summaries indicating the main lines of argument and showing where each piece fits into Sellars s overall picture      *The Routledge Companion to Twentieth Century Philosophy* Dermot Moran,2008-10-27 Featuring twenty two chapters written by leading international scholars this major publication covers all the key figures and movements from Frege to Derrida and philosophy of language to feminist philosophy      *Rudolf Carnap: Studies in Semantics* Steve Awodey,Greg Frost-Arnold,2024-07-18 Volume 7 of the Collected Works of Rudolf Carnap presents Studies in Semantics which comprises three interlocking books Introduction to Semantics 1942 Formalization of Logic 1942 and Meaning and Necessity 1947 Along with textual notes the editors introduction places Carnap s whole semantic project in its various contexts      *Carnap and the Vienna Circle* Ramon Cirera,2022-06-08 It is not inaccurate to say that from 1928 to 1936 Carnap was a member of the Vienna Circle even though during this period he was not always present in Vienna During this years which spanned roughly the period from the Aufbau to Testability and Meaning he worked or at least discussed frequently with the members of the group However traditionally it has been difficult to form a proper view of the development of Carnap s ideas throughout this period mainly because of three errors which have persisted in the commonly accepted historical interpretation of Carnap and the Vienna Circle emphasis on the Circle as a unit rather than a collective of individuals insistence on verificationism as the defining characteristic of Logical Positivism and the systematic abstraction of the work of the Circle from its historical context As against this historically distorted image this book argues for an alternative reading evaluating the different influences on Carnap of Schlick Wittgenstein Neurath and Popper and making sense of Carnap s evolution from physicalism to phenomenism and the syntactic point of view      **Some Questions about Language** Mortimer Jerome Adler,1991 How do meaningless marks and sounds become the meaningful words of a natural language To what do words having referential significance refer What is the meaning of the words that do not have referential significance Can ordinary language really do what it appears to do or is this an illusion Dr Adler maintains that these fundamental questions are not satisfactorily treated in the two main philosophies of language that have dominated twentieth century thinking on the subject the syntactical and ordinary language approaches Drawing upon the tradition of Aristotle Aquinas Poincaré and Husserl Dr Adler s own discussion exemplifies the third approach which he

describes as semantic and lexical In this now classic work the fruit of more than 50 years concern with the philosophy of language Dr Adler advances a powerful theory of meaning and applies it to some outstanding philosophical problems In unpretentious and uncluttered prose he provides a limpid introduction to a number of knotty philosophical issues and at the same time issues a challenge to some of the most tenacious doctrines of the modern world

**The Problems of Philosophy in Their Interconnection** Moritz Schlick,1987-10-31

published in 1967 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions Professor Feigl's essay *The Mental and the Physical* has provoked a great deal of comment criticism and discussion since it first appeared as a part of the content of Volume II of the *Minnesota Studies in the Philosophy of Science* about ten years ago Now Professor Feigl takes account of the critical discussions and presents his own comments with respect to the most important points raised in the criticisms The essay itself is presented here in full along with the postscript The *British Journal for the Philosophy of Science* has called the essay a super colossal survey of the mind body problem In its review of the earlier book containing the essay Thought said This essay deserves careful reading by every philosopher concerned with genuine philosophical dialogue
