Interpersonal Rejection Mark R. Leary,2006-08-24 Interpersonal rejection ranks among the most potent and distressing events that people experience Romantic rejection ostracism stigmatization job termination and other kinds of rejections have the power to

compromise the quality of people's lives. As a result, people are highly motivated to avoid social rejection and indeed much of human behavior appears to be designed to avoid such experiences. Yet despite the widespread effects of real anticipated and even imagined rejections, psychologists have devoted only passing attention to the topic and the research on rejection has been scattered throughout a number of psychological subspecialties, e.g., social, clinical, developmental, personality. In the past few years, however, we have seen a surge of interest in the effects of interpersonal rejection on behavior and emotion. The goal of this book is to pull together the contributions of several scholars whose work is on the cutting edge of rejection research, providing a scholarly yet readable overview of recent advances in the area. In doing so, it not only provides a look at the current state of the area but also helps to establish the topic of rejection as an identifiable area for future research. Topics covered in the book include ostracism, unrequited love, betrayal, stigmatization, rejection sensitivity, rejection and self-esteem, peer rejection in childhood, emotional responses to rejection, and personality moderators of reactions to rejection.

**Research Integrity** Lee J. Jussim, Jon A. Krosnick, Sean T. Stevens, 2022. This book offers a behavioral science perspective on how scientific practice becomes compromised and provides recommendations for improvement. Broadening the discussion of research integrity beyond replication, publication biases, statistics, and methods, this book addresses the full complexity of the issue and serves academics and policy makers who are concerned with the reliability and validity of scientific findings across the social sciences.

**Responsibility** Ann Elisabeth Auhagen, Hans-Werner Bierhoff, 2002-09-26. First Published in 2004. The importance of responsibility in the third millennium is increasing. The rise of new technologies and related environmental hazards, the problem of the neglect of poor and old people, and the increase in violence and aggression in general indicate that responsibility is the characteristic which is of critical importance for the survival of modern democratic structures. This volume integrates the many facets of responsibility and reviews the research on a scientific basis. Responsibility is examined from different as well as interdisciplinary perspectives together with the applied aspects of responsibility: solidarity, volunteerism, moral development. Responsibility is made up of four parts: introduction, basic issues, and domains of responsibility, applications of responsibility, and perspectives. Responsibility brings together international researchers who emphasise empirical analysis but also examine the theoretical aspects of the topic.
