Multistrategy learning is one of the newest and most promising research directions in the development of machine learning systems The objectives of research in this area are to study trade offs between different learning strategies and to develop learning systems that employ multiple types of inference or computational paradigms in a learning process Multistrategy systems offer significant advantages over monostrategy systems They are more flexible in the type of input they can learn from and the type of knowledge they can acquire As a consequence multistrategy systems have the potential to be applicable to a wide range of practical problems This volume is the first book in this fast growing field It contains a selection of contributions by leading researchers specializing in this area See below for earlier volumes in the series **Rationalizing**

Culture Georgina Born,2023-09-01 Anthropologist Georgina Born presents one of the first ethnographies of a powerful western cultural organization the renowned Institut de Recherche et de Coordination Acoustique Musique IRCAM in Paris As a year long participant observer Born studied the social and cultural economy of an institution for research and production of avant garde and computer music She gives a unique portrait of IRCAM s composers computer scientists technicians and secretaries interrogating the effects of the cultural philosophy of the controversial avant garde composer Pierre Boulez who directed the institute until 1992 Born depicts a major artistic institution trying to maintain its status and legitimacy in an era

increasingly dominated by market forces and in a volatile political and cultural climate She illuminates the erosion of the legitimacy of art and science in the face of growing commercial and political pressures By tracing how IRCAM has tried to accommodate these pressures while preserving its autonomy Born reveals the contradictory effects of institutionalizing an avant garde Contrary to those who see postmodernism representing an accord between high and popular culture Born stresses the continuities between modernism and postmodernism and how postmodernism itself embodies an implicit antagonism toward popular culture Anthropologist Georgina Born presents one of the first ethnographies of a powerful western cultural organization the renowned Institut de Recherche et de Coordination Acoustique Musique IRCAM in Paris As a year long participant observer Born studied **The Publishers' Trade List Annual** ,1995 **Readings in Artificial Intelligence and Databases** John Mylopoulos,Michael L. Shavlik,Thomas Glen Dietterich,1990 The ability to learn is a fundamental characteristic of intelligent behavior Consequently machine learning has been a focus of artificial intelligence since the beginnings of AI in the 1950s The 1980s saw tremendous growth in the field and this growth promises to continue with valuable contributions to science engineering and business Readings in Machine Learning collects the best of the published machine learning literature including papers that address a wide range of learning tasks and that introduce a variety of techniques for giving machines the ability to learn The editors in cooperation with a group of expert referees have chosen important papers that empirically study theoretically analyze or psychologically justify machine learning algorithms The papers are grouped into a dozen categories each of which is introduced by the editors Readings in

Distributed Artificial Intelligence Alan H. Bond, Les Gasser, 2014-06-05 Most artificial intelligence research investigates intelligent behavior for a single agent solving problems heuristically understanding natural language and so on Distributed Artificial Intelligence DAI is concerned with coordinated intelligent behavior intelligent agents coordinating their knowledge skills and plans to act or solve problems working toward a single goal or toward separate individual goals that interact DAI provides intellectual insights about organization interaction and problem solving among intelligent agents This comprehensive collection of articles shows the breadth and depth of DAI research The selected information is relevant to emerging DAI technologies as well as to practical problems in artificial intelligence distributed computing systems and human computer interaction Readings in Distributed Artificial Intelligence proposes a framework for understanding the problems and possibilities of DAI It divides the study into three realms the natural systems approach emulating strategies and representations people use to coordinate their activities the engineering science perspective building automated coordinated problem solvers for specific applications and a third hybrid approach that is useful in analyzing and developing mixed collections of machines and human agents working together The editors introduce the volume with an important survey of the motivations research and results of work in DAI This historical and conceptual overview combines with chapter introductions to guide the reader through this fascinating field A unique and extensive bibliography is also provided
