Zenner, 1991-07-03 Throughout the world certain ethnic groups have made a living through trade and have found a place for themselves in their societies middle strata At times these middlemen minorities have aroused the envy of their neighbors and been subjected to a variety of persecutions In this book Walter P Zenner examines explanations for this phenomenon and analyzes such groups as the Jews the Chinese the Scots and the South Asians abroad **Middle-Class Couples** Stephen Edgell, 2023-03-31 When this book was originally published in 1980 sociologists had long held the view that the middle class marriage in contemporary Britain was characterised by role desegregation and marital equality *Middle Class Couples* reported on research which provided a critical re analysis of this orthodoxy The book is a theoretically informed empirical study which largely debunks many of the myths associated with this alleged movement towards equal marriage among professional couples The author analysed the sexual division of labour among a group of professional workers and their wives at the child rearing stage of their family cycle The research paid special attention to the notion of marital equality and the power dimension of marriage the household division of labour and the patterning of leisure between husbands and wives A radical critique of the existing social theories of the family and society incorporated in the classic studies of Parsons Watson Young and Willmott Ann Oakley and Elizabeth Bott *Field*

Evolutionary Social Psychology Jeffry A. Simpson, Douglas T. Kenrick, 2014-02-25 What a pity it would have been if biologists had refused to accept Darwin's theory of natural selection which has been essential in helping biologists understand a wide range of phenomena in many animal species These days to study any animal species while refusing to consider the evolved adaptive significance of their behavior would be considered pure folly unless of course the species is homo sapiens Graduate students training to study this particular primate species may never take a single course in evolutionary theory although they may take two undergraduate and up to four graduate courses in statistics These methodologically sophisticated students then embark on a career studying human aggression cooperation mating behavior family relationships or altruism with little or no understanding of the general evolutionary forces and principles that shaped the behaviors they are investigating This book hopes to redress that wrong It is one of the first to apply evolutionary theories to mainstream problems in personality and social psychology that are relevant to a wide range of important social phenomena many of which have been shaped and molded by natural selection during the course of human evolution These phenomena include selective biases that people have concerning how and why a variety of activities occur For example information exchanged during social encounters is initially perceived and interpreted people are romantically attracted to some potential mates but not others people often guard protect and work hard at maintaining their closest relationships people form shifting and highly complicated coalitions with kin and close friends and people terminate close long standing relationships Evolutionary Social Psychology begins to disentangle the complex interwoven patterns of interaction that define our social lives and relationships

Morgan, 2014-08-07 An experienced teacher of courses on the sociology of the family D H J Morgan frequently encounters a gulf between the family as it is often treated in sociological texts and the family as it is usually experienced In this book he provides an extremely valuable bridge between the two by presenting an encounter between some of the mainstream theoretical approaches and concerns in the sociology of the family and what he terms as critical perspectives on the family This is the first British book on a basic social institution that takes into account the literature outside the mainstream of sociological analysis that deals with the subject The first half examines the varieties of functional theorizing embedded in many texts the over concern with the question of kinship in modern society and the treatment of the family as a success story

In the second half Dr Morgan presents a critical account of some of the counter theories those derived from the radical feminist movement the existential psycho analytical approach associated with Laing and the critical analyses of sex in an advanced capitalist society A final chapter suggests some themes and orientations derived from this encounter of theoretical approaches and modern perspectives which can be usefully developed
