Quantitative marketing as a discipline started around the mid 60 s and has been dominated by only a handful of individuals Robert Blattberg is one of them and has been a leader in setting a research agenda for this discipline The collection of articles in this book along with commentary by some of his doctoral students is a magnificent testament to the genius of Robert Blattberg The chapters in this book are organized into six parts The first part titled Early Bob traces research which he completed during the first decade after he joined University of Chicago The second part is titled Statistical Bob This part comprises papers that Robert wrote in characterizing the response of consumers to dealing The third part is titled Promotional Bob and covers roughly a ten year stretch from 1987 to 1996 The fourth part titled Big Bob describes Robert s contribution to and impact on marketing practice The fifth part is titled Direct Bob and focuses on what customer level data should be gathered how they should be organized linked and analyzed and what metrics should be used to assess customer value The sixth and final part titled Micro Macro Bob is not genre or area specific as much as an illustration of Robert s overall research interests in marketing mix modeling Marketing Research Procedures Lloyd Martin DeBoer, 1982

Marketing Information Guide ,1969 **The Oxford Handbook of Strategic Sales and Sales Management** David W. Cravens,Kenneth Le Meunier-FitzHugh,Nigel F. Piercy,2012-11-22 The Oxford Handbook of Strategic Sales and Sales Management is an unrivalled overview by leading academics in the field of sales and marketing management Sales theory is experiencing a renaissance driven by a number of factors including building profitable relationships creating delivering brand value strategic customer management sales and marketing relationships global selling and the change from transactional to customer relationship marketing Escalating sales and selling costs require organisations to be more focused on results and highlight the shifting of resources from marketing to sales Further the growth in customer power now requires a strategic sales response and not just a tactical one The positioning of sales within the organisation the sales function and sales management are all discussed The Handbook is not a general sales management text about managing a sales force but will fill a gap in the existing literature through consolidating the current academic research in the sales area The Handbook is structured around four key topics The first section explores the strategic positioning of the sales function within the modern organisation The second considers sales management and recent developments The third section examines the sales relationship with the customer and highlights how sales is responding to the modern environment Finally the fourth section reviews the internal composition of sales within the organisation The Handbook will provide a comprehensive introduction to the latest research in sales management and is suitable for academics professionals and those taking professional qualifications in sales and marketing **Marketing Research** Robert A. Peterson,1988 *Value Functions for Environmental Management* E. Beinart,2013-04-18 Environmental decisions must satisfy a multitude of objectives and the matching of a plan policy or project to such objectives is a matter of both facts and value judgements Value Functions for Environmental Management provides a systematic approach to the structuring and measurement of value judgements showing how they drive the decision process and how to make them transparent and effective in support of complex decisions The value functions that the book describes provide a scheme for the exploration of human values and a tool for transforming them into an analytical model A clear statement can then be made of the degree to which a decision has achieved its objectives and how conflicting objectives may be addressed This does not mean that there is no role for human

judgement in the process Complexity often coupled with large information gaps necessitates expert judgement but the values adopted by the experts are themselves capable of being structured and measured according to the value function methodology presented here even if the judgements themselves are qualitative and tentative Value models for expert panels are also presented The use of the methodology in practice is illustrated by examples The book contains an extensive subject index
