Readings in Public Expenditure Programming in Nigeria O. A. Adeyemo, Eddy Chicksa Ndekwe, 1990 **Modern State Intervention in the Era of Globalisation** Nikolaos Karagiannis, Zagros Madjd-Sadjadi, 2007-06-26

Modern State Intervention in the Era of Globalisation is a thoughtful and well researched assessment of the evolving role of the state in the contemporary world economy This work is provocative because it goes against the predominant arguments in favor of a minimal state as commonly asserted by neoclassical economics Instead Karagiannis and Madjd Sadjadi think outside of the box and produce both theoretical arguments and evidence from important cases such as the EU Singapore and Hong Kong to support the idea of a viable and continuing role for the Developmental State The scholarship underlying this very readable book which includes contemporary material as well as ancient economic thought is truly impressive Readers will be left with much to reconsider about the benefits of globalisation Patrick James University of Southern California US *Governance, Decentralization and Reform in China, India and Russia* Jean-Jacques Dethier, 2000-09-30

The papers in Governance Decentralization and Reform in China India and Russia which were presented at a ZEF conference in May 1999 deal with three critical aspects of governance in China India and Russia political reforms at the local level fiscal reforms in intergovernmental relations and legal reforms The volume collects contributions from 24 outstanding economists political scientists and legal specialists including Vito Tanzi Daniel Treisman Pranab Bardham Jean Dr ze Katharina Pistor and Kathryn Hendley Distorted economic and political incentive structures capture of the state by powerful elites and inoperative legal systems are factors that have greatly complicated the political economy of reform in these three large countries with heterogeneous populations Addressing these political and institutional issues is essential to designing good policies One particular goal of this volume is to bring together new analytical insights and empirical evidence on governance a new and growing field of research The volume is divided into three parts fiscal federalism decentralization and provision of local public goods and legal reforms Part I discusses the role of incentives in fiscal federalism The papers analyze the effects of different revenue sharing mechanisms between different levels of government in particular the effects on regional growth and inequality and the incentives that local politicians may have to provide public goods depending on fiscal arrangements with the central government In adapting their governance structures all three countries have been striving for increased decentralization But the theoretical literature suggests that in a decentralized setting second best solutions must prevail it is not possible to ensure incentive compatibility simultaneously with optimal allocation of resources and a balanced budget in providing public goods Part II discusses taxation and public expenditure management both as a political and as a budgetary process Two questions which the papers address are Does participation of stakeholders and accountability of public authorities improve economic and social outcomes Does better governance in the provision of basic goods such as health care and education improve equity While decentralization is often seen as a way to improve the quality of public services rule

based governance is viewed as a safeguard against the arbitrariness of public officials and weaknesses in law enforcement. The five papers in Part III focus on the rule of law, the role of the judicial system in establishing a rule based economy and the effectiveness of legal institutions during the transition from socialism to a market economy. They present overviews of current legal reform issues in the three countries and discuss various conceptual approaches to addressing legal reform issues.

Retrospectives on Public Finance Carl Sumner Shoup, Norman Paterson School of International Affairs, Carleton University. School of Public Administration, 1991. Retrospectives on Public Finance contains original analyses by internationally recognized public finance scholars including Carl Sumner Shoup, one of the discipline's most famous practitioners. Shoup along with Richard Musgrave and his students pioneered the prescriptive or political economy school of public finance known for its hands on approach and its commitment to applying theory to real world problems. Each contributor provides a retrospective on Shoup's various contributions to the field, reviewing the literature and assessing its relevance to current problems in public finance theory and policy. The essays highlight and analyze fiscal theory and public policy developments from the 1930s to the present in four areas: the Shoup tax missions to Japan, Venezuela and Liberia; the tax mix; the expenditure mix; and macro public finance. Contributors: Lorraine Eden, Carl S. Shoup, Malcolm Gillis, Minoru Nakazato, Charles E. McLure Jr., John Bossons, Richard Goode, William Vickery, Wayne Thirsk, John Graham, Stanley Winer, W. Irwin Gillespie, Melville L. McMillan, Cliff Walsh, John G. Head, Enid Slack, Edwin G. West, Richard M. Bird, Peggy B. Musgrave, Douglas A. L. Auld, John B. Burbidge, Jack M. Mintz, John Sargent, Richard A. Musgrave. *Public Economics In India: Theory And Practice* J.R. Gupta, 2007. Traditionally, the term Public Finance has been applied to the package of those policies and operations which involve the use of tax and expenditure measures while budgetary policy is an important part to understand the basic problems of use of resources, distribution of income etc. There is a vast array of fiscal institutions, tax systems, expenditure programmes, budgetary procedures, stabilization instruments, public debt policies, level of government etc. which raise a spectrum of issues arising from the operation of these institutions. Further, the existence of externalities, concern for adjustment in the distribution of income and wealth, removal of poverty etc. require political process for their solutions in a manner which combines individual freedom and justice. The problem of allocation of resources between public goods and private goods is a perennial problem. Then in a democracy there is a political process of voting to decide about the budgetary policy to be adopted. Therefore, now more attention is paid to a wider coverage of government activities relating to financial aspects and the subject is known as Public Economics. The
