Reaffirming Higher Education

James Heft

Reaffirming Higher Education:

Reaffirming Higher Education Jacob Neusner, Noam Mordecai Menahem Neusner, How should universities balance the requirements of teaching with those of scholarship The consensus that scholarship counts first and teaching comes second has lost its hold for in an academic world in which few publish 95 percent of publications come from 5 percent of the professors insisting on the priority of scholarship rings hollow The American college and university today must assess what difference scholarship makes to teaching and what teaching means to scholarship Reaffirming Higher Education asks who teaches what to whom and why The authors maintain that what matters in higher learning is learning while denying that scholarship detracts from teaching Chapter 1 discusses who should teach in a university and touches upon such topics as tenure and teaching Chapter 2 defines what universities should teach and the mutuality of scholarship research and teaching Chapter 3 answers who should go to college and why Chapter 4 assesses the future of higher education in the American university and what is at stake on campus William Scott Green places into perspective the authors observations and ideals about higher education and what it means to make one's major field of study the major into a primary path to a liberal education In this intelligent and insightful volume the authors outline reform and renewal for both the institutional and personal dimensions of higher learning that would encompass the ideal of the academic ethic This book should be read by all those who strive to make universities more humane educators parents and students alike

Decline and Revival in Higher Education Herbert I. London, 2011-12-31 This is an analysis of higher education in the past half century a period of dramatic change and democratization But it is more than that The author has been a participant in the struggle to stem the decline in higher education as it moved from an emphasis on classical liberal values toward relativism and ideological extremism This volume reflects an awareness of what has been lost but sees hope for a revival of traditional values as technological change and awareness of failure forces institutions to examine their premise Herbert I London has provided here fuel for fundamental redirection in American college and university affairs Decline and Revival in Higher Education is uncompromising in its concerns but points the way toward a future linked to the best of the past The work follows the personal evolution of the author while at the same time describes the devolution of university standards in such institutions as Columbia Duke the University of California at Berkeley and New York University While seeing optimistic trends in oases of traditional programming that can serve as a counterweight to campus orthodoxies London argues that the dramatic transformation of the academy cannot be denied The social sciences and humanities in particular have become isolated from mainstream requirements in the nation London deals with concrete concerns such as the collapse of classic book programs in the contemporary curriculum the decline and even vigilante raids on opposition in campus publications the collapse of moral judgment in favor of pure relativism the transformation of many museums into a storage houses of debris and the confusion of coarse language with democratization These developments lead the author to write this book for if the culture wars are

over the American people may be the losers *To Reaffirm the Federal Commitment to Public Education* United States. Congress. House. Committee on Education and Labor. Subcommittee on Elementary, Secondary, and Vocational Education, 1984 *Reaffirming Higher Education* Noam Neusner, 2017 Provided by publisher **Resources in Education**, 2001-04 **The Future of Catholic Higher Education** James Heft, 2021 After many years of scholarship administrative experience and leadership in Catholic higher education James Heft has written a book that draws upon many academic disciplines to paint a picture of the past the current situation challenges strengths and weaknesses of Catholic universities and after identifying its foundational pillars points the way to a future that is open to modern culture without capitulating to it embraces Catholic intellectual traditions without fossilizing them and presents a vision of its relationship to the hierarchy that is respectful independent faithful and dynamic *Strategies and Insights for Women Leaders in Higher Education* Wafa Hozien, 2024-12-06 This book delves into critical factors for women's success in academia offering strategies and counsel anchored in a robust theoretical framework Hozien's thoughtful interdisciplinary approach to women leadership culminates in a comprehensive understanding of the critical factors that can influence career success in higher education Grounded by an intersectional lens and data driven analysis the book's focus on minority female populations informs the inherent challenges and shifting representation in educational leadership Each chapter integrates real world examples case studies and immediately actionable advice to advocate for and support current and aspiring female leaders administrators and policymakers A masterful blend of theory and practice this book's timely insights empower women to take charge of their leadership journeys with the intention of fostering a generation of confident and capable academic leaders who can drive positive transformation *Higher Education in Transition* John Brubacher, 2017-07-05 At a time when our colleges and universities face momentous questions of new growth and direction the republication of *Higher Education in Transition* is more timely than ever Beginning with colonial times the authors trace the development of our college and university system chronologically in terms of men and institutions They bring into focus such major areas of concern as curriculum administration academic freedom and student life They tell their story with a sharp eye for the human values at stake and the issues that will be with us in the future One gets a sense not only of temporal sequence by centuries and decades but also of unity and continuity by a review of major themes and topics Rudy's new chapters update developments in higher education during the last twenty years *Higher Education in Transition* continues to have significance not only for those who work in higher education but for everyone interested in American ideas traditions and social and intellectual history **The Uncertain Future of American Public Higher Education** Daniel M. Johnson, 2018-12-19 This book addresses the costly non sustainable policies programs practices and priorities currently driving the tuition crisis in American public higher education In this era of growing competition among public colleges and universities for more students and higher rankings their leaders and governing boards have lost sight of student centered missions in favor of more and greater non education

related amenities facilities programs and practices that have added substantially to the cost of a college degree without increasing its quality This book is an appeal to all interested taxpaying citizens public officials governors governing boards and university presidents to take a second look at these costly decisions and begin a new era of placing the higher education needs and interests of students above all We have created this tuition crisis now we must solve it **Academic Leadership and Governance of Higher Education** James T. Harris, Jason E. Lane, Jeffrey C. Sun, Gail F. Baker, 2023-07-03 Winner of the 2012 ASHE CAHEP Barbara Townsend Lecture Award To prosper and thrive in an increasingly unpredictable national and global environment U S higher education will need to adapt innovate and evolve once again as it has during every major societal change over the past four centuries The purpose of this new edition published a turbulent decade after the first is to provide institutional leaders from department chairs to trustees with a broad understanding of the academic enterprise strategic guidance and key principles to assist them in navigating the future and drive the success of their institutions as they confront the unimagined Recognizing that the hallmark of higher education in the U S is the diversity of institution types each of which is affected differently by external and internal influences the authors provide examples and ideas drawn from the spectrum of colleges and universities in the not for profit sector This book covers the major functions and constituent departments and units within institutions the stakeholders from students and faculty through the echelons of administration the external environment of elected officials foundations philanthropists and the new changing media and innovations in teaching technology data analytics legal frameworks as well as economic demographic and political pressures The book is informed by the proposition that adhering to four principles which the authors identify as having enabled institutions of higher education to successfully navigate ever changing and volatile pasts will enable them to flourish in the coming decades The four principles are 1 Be mission centric by making all key decisions based on a core mission and set of values 2 Be able to adapt to environmental change in alignment with the mission and core values 3 Be committed to democratic ideals by seeking to promote them and modeling democratic practices on and off campus 4 Be models for inclusion equity and positive social change *ICMEIM 2023* Youbin Chen, Vishalache Balakrishnan, Mehmet Cüneyt Birkök, 2023-11-23 The 4th International Conference on Modern Education and Information Management ICMEIM 2023 was successfully held from September 8th to 10th 2023 in Wuhan China This conference aimed to bring together scholars researchers and practitioners from around the world to discuss and exchange ideas on the latest trends and advancements in modern education and information management The conference program featured a diverse range of research topics including educational technology digital learning information systems and knowledge management With a focus on exploring innovative approaches and strategies the conference provided a platform for participants to present their research findings and share insights on the future development of the field Distinguished speakers included Prof Qing Ding from Huazhong University of Science and Technology China Prof Longkai Wu from Central China Normal University China Assoc Prof Lim Chee Leong

Doing Diversity in Higher Education

Winnifred R. Brown-Glaude,2008-11-14 Using case studies from universities throughout the nation *Doing Diversity in Higher Education* examines the role faculty play in improving diversity on their campuses The power of professors to enhance diversity has long been underestimated their initiatives often hidden from view Winnifred Brown Glaude and her contributors uncover major themes and offer faculty and administrators a blueprint for conquering issues facing campuses across the country Topics include how to dismantle hostile microclimates sustain and enhance accomplishments deal with incomplete institutionalization and collaborate with administrators The contributors essays portray working on behalf of diversity as a genuine intellectual project rather than a faculty service The rich variety of colleges and universities included provides a wide array of models that faculty can draw upon to inspire institutional change

Research and Relevant Knowledge Roger L. Geiger,2017-09-29 The rise of American research universities to international preeminence constitutes one of the most important episodes in the history of higher education *Research and Relevant Knowledge* follows Geiger s earlier volume on American research universities from 1900 to 1940 This second work is the first study to trace this momentous development in the post World War II period It describes how the federal government first relied on university scientists during the war and how the resulting relationship set the pattern for the postwar mushrooming of academic research The first half of the book analyzes the development of the postwar system of academic research exploring the contributions of foundations defense agencies and universities The second half depicts the rise of the golden age of academic research in the years after Sputnik 1957 and its eventual dissolution at the end of the 1960s graduate education When the federal patron soon reduced its largesse university students took the lead in challenging the putative hegemony of academic research The loss of consensus quickly brought the malaise of the 1970s stagnation frustration and equivocation about the research role The final chapter appraises the renaissance of the 1980s based largely

on a rapprochement with the private sector and ends by evaluating the embattled status of research universities at the beginning of the 1990s Research and Relevant Knowledge provides the first authoritative analytical account of American research universities during their most fateful half century It will be of critical importance to all those concerned with the future of higher education in the United States

The Academic Revolution David Riesman, 2001-11-30 The Academic Revolution describes the rise to power of professional scholars and scientists first in America's leading universities and now in the larger society as well Without attempting a full scale history of American higher education it outlines a theory about its development and present status It is illustrated with firsthand observations of a wide variety of colleges and universities the country over colleges for the rich and colleges for the upwardly mobile colleges for vocationally oriented men and colleges for intellectually and socially oriented women colleges for Catholics and colleges for Protestants colleges for blacks and colleges for rebellious whites The authors also look at some of the revolution's consequences They see it as intensifying conflict between young and old and provoking young people raised in permissive middle class homes to attacks on the legitimacy of adult authority In the process the revolution subtly transformed the kinds of work to which talented young people aspire contributing to the decline of entrepreneurship and the rise of professionalism They conclude that mass higher education for all its advantages has had no measurable effect on the rate of social mobility or the degree of equality in American society Jencks and Riesman are not nostalgic their description of the nineteenth century liberal arts colleges is corrosively critical They maintain that American students know more than ever before that their teachers are more competent and stimulating than in earlier times and that the American system of higher education has brought the American people to an unprecedented level of academic competence But while they regard the academic revolution as having been an historically necessary and progressive step they argue that like all revolutions it can devour its children For Jencks and Riesman academic professionalism is an advance over amateur gentility but they warn of its dangers and limitations the elitism and arrogance implicit in meritocracy the myopia that derives from a strictly academic view of human experience and understanding the complacency that comes from making technical competence an end rather than a means Christopher Jencks is Malcolm Wiener Professor of Social Policy at the Kennedy School of Government at Harvard University He is the author of Rethinking Social Policy Race Poverty and the Underclass The Homeless and co editor of The Black White Text Score Gap David Riesman is Henry Ford II Professor Emeritus of Sociology at Harvard University He is the author of Thorstein Veblen Abundance for What The Lonely Crowd and Variety in American Education

Mission of the University Jos  Ortega y Gasset, **The Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987: The debate and legislative and related documents**, 1993 **To Advance Knowledge** Roger L. Geiger, 2017-09-29 American research universities are part of the foundation for the supremacy of American science Although they emerged as universities in the late nineteenth century the incorporation of research as a distinct part of their mission largely occurred

after 1900 *To Advance Knowledge* relates how these institutions by 1940 advanced from provincial outposts in the world of knowledge to leaders in critical areas of science. This study is the first to systematically examine the preconditions for the development of a university research role. These include the formation of academic disciplines, communities that sponsored associations and journals which defined and advanced fields of knowledge. Only a few universities were able to engage in these activities. Indeed, universities before World War I struggled to find the means to support their own research through endowments, research funds, and faculty time. *To Advance Knowledge* shows how these institutions developed the size and wealth to harbor a learned faculty. The book illustrates how arrangements for research changed markedly in the 1920s when the great foundations established from the Rockefeller and Carnegie fortunes embraced the advancement of knowledge as a goal. Universities emerged in this decade as the best suited vessels to carry this mission. Foundation resources made possible the development of an American social science. In the natural sciences, this patronage allowed the United States to gain parity with Europe on scientific frontiers of which the most important was undoubtedly nuclear physics. The research role of universities cannot be isolated from the institutions themselves. *To Advance Knowledge* focuses on sixteen universities that were significantly engaged with research during this era. It analyzes all facets of these institutions: collegiate life, sources of funding, treatment of faculty, since all were relevant to shaping the research role.
