**Overview**  
Rutherford Estate is one of the country's leading real estate companies. Since its start in 1950, the company has earned its spot in the Top 5 most reliable real estate companies in the country. Rutherford currently employs 30 licensed real estate agents who all gained their national credentials from working with the company.

For the past five years, the company made over \$84.5m from the sale of 23 residential commercial properties. This is one of the lowest in the history of Rutherford. The company has a large gap in ensuring the continuity of good workforce skills by not actively recruiting young real estate agents in the previous years. Approximately half of the older real estate agents are retiring.

**Challenges**  
Rutherford understood the three challenges of the situation. First, the company must implement a training and development course for the new real estate agents so they can acquire the techniques of Rutherford's past agents. Second, Rutherford must outsource its recruitment to a professional recruitment agency to ensure a steady workforce and skills continuity. Third, in this phase of operations, the company must rectify its strategies to meet the capabilities of its largely new workforce and the overhead expenses associated with this.

**Solutions**  
Rutherford launched the Rutherford Technique Development Programme which contained three modules: theoretical knowledge of real estate, the Rutherford technique, and practical applications. All 23 new real estate agents passed the practical applications. After a month, Rutherford saw a 48% improvement in its operations relative to the past three months. More equipped teams were created based on their performances in the program and they made 43 leads where 31 of which were successfully closed. Meanwhile, the company partnered with Keeling Recruitment. Because of the rapid improvement, Rutherford stuck to its original target but allocated the needed resources for the program.

### Conclusion

Even though Rutherford adapted to the challenge, it learned to always keep a good foresight of its operations to prevent unnecessary problems to arise.

Estate Licensing: Case Study Analysis of Behavioral Assessment Relationship Applied to Human Performance Conrad R. Richards, 2010-02-16 Conrad's new book *Beyond Real Estate Licensing Case Study Analysis of Behavioral Assessment Relationship Applied to Human Performance* is an outgrowth of his doctoral studies. The specific problem this research addresses pertains to whether behavioral readiness has an impact upon real estate brokerage sales performance. Although real estate students may score high on the real estate licensing examinations, it may not prove the students' ability to perform in a real estate brokerage performance sales environment. The most important performance criteria in real estate sales could be conceived as a developed personality capacity and alignment of motivational values. It is also noted that learning sales facilitators can not guarantee the knowledge transfer to performance unless behavioral readiness is presented. Therefore, behavioral assessment analysis can be considered as an integral aide to performance improvement. The purpose of this study was to establish the organizational responsibility towards behavioral assessment analysis during the pre employment phase. The results of this study indicate that behavioral assessments may improve the overall recruitment and selection capability and to identify the necessary behavioral readiness that is necessary for knowledge transfer into sales performance.
