reforms aimed at improving the implementation of public investment strengthen social safety nets and raise productivity in an increasingly digital economy would boost growth and enhance its inclusiveness

Boys Love Media in Thailand Thomas Baudinette, 2023-10-05 Over the past several years the Thai popular culture landscape has radically transformed due to the emergence of Boys Love BL soap operas which celebrate the love between handsome young men Boys Love Media in Thailand Celebrity Fans and Transnational Asian Queer Popular Culture is the first book length study of this increasingly significant transnational pop culture phenomenon Drawing upon six years of ethnographic research the book reveals BL s impacts on depictions of same sex desire in Thai media culture and the resultant mainstreaming of queer romance through new forms of celebrity and participatory fandom The author explores how the rise of BL has transformed contemporary Thai consumer culture leading to heterosexual female fans of male celebrities who perform homoeroticism becoming the main audience to whom Thai pop culture is geared Through the case study of BL this book thus also investigates how Thai media is responding to broader regional trends across Asia where the economic potentials of female and queer fans are becoming increasingly important Baudinette ultimately argues that the center of queer cultural production in Asia has shifted from Japan to Thailand investigating both the growing international fandom of Thailand s BL series as well as the influence of international investment into the development of these media The book particularly focuses on specific case studies of the fandom for Thai BL celebrity couples in Thailand China the Philippines and Japan to explore how BL series have transformed each of these national contexts queer consumer cultures

External Finance in Thailand's Development Karel Jansen, 2016-07-27 Between 1987 and 1990 Thailand experienced double digit growth fed by high capital inflows This made Thailand one of the first developing countries to recover from the recession of the 1980s Since 1990 growth and capital inflows have continued at a high level The book makes a detailed study of the macroeconomic impact of capital inflows during recent years and during an earlier period when growth and capital inflows were high in the late 1970s It is shown that the results of the recent period are more sustainable than those of the earlier period due to the differences in the nature of capital inflows in external conditions and in economic policies

Materializing Thailand Penny Van Esterik, 2020-05-28 Thailand has become well known throughout the world for wonderful cuisine great package holidays sumptuous temples and textiles Noticeably absent from glossy tourist brochures but equally well known throughout the Western world is Thailand s seedier side the world of child exploitation rampant prostitution and AIDS Thailand maintains its appeal by slipping the ugly and painful out of sight and by promoting women as exotic visual icons through beauty contests state rituals and the sex trade This book explores the construction of gender in Thailand and in particular the role Bangkok plays in establishing gender relations for the whole of the country It examines the historical and cultural processes underlying Thai public culture including historical theme parks The author demonstrates how the materiality of the Thai world shapes gender relations and how Buddhism discourages essentialisms including fixed binary gender identities Throughout the book appearances are

shown to be critically important and the essentialism of gender is maintained through display public presentations and everyday material practices Anyone wishing to understand the complexity of Thailand will find this book provides a highly readable and insightful analysis *Macroeconomics in Emerging Markets* Peter J. Montiel, 2011-04-29 The macroeconomic experience of emerging and developing economies has tended to be quite different from that of industrial countries Compared to industrial countries emerging and developing economies have tended to be much more unstable with more severe boom bust cycles episodes of high inflation and a variety of financial crises This textbook describes how the standard macroeconomic models that are used in industrial countries can be modified to help understand this experience and how institutional and policy reforms in emerging and developing economies may affect their future macroeconomic performance This second edition differs from the first in offering extensive new material on themes such as fiscal institutions inflation targeting emergent market crises and the Great Recession numerous application boxes end of chapter questions references for each chapter more diagrams less taxonomy and a more reader friendly narrative and enhanced integration of all parts of the work *Thailand's Economic Recovery* Cavan Hogue, 2006-06-01 Thailand is a society in political economic and social transition Change is happening to varying degrees at the national level and at the regional level where there are contrasting issues Changes are positive some are negative This book looks at the various aspects of change as it impacts on business and the lives of the people *How Land Registration Affects Financial Development and Economic Growth in Thailand* K. F. Frank Byamugish, 1999 Land registration in Thailand has significant positive long run effects on financial development and economic growth *Agricultural Price Distortions, Inequality, and Poverty* Kym Anderson, John Cockburn, Will Martin, 2010-03-17 The prices of farm products are crucial determinants of the extent of poverty and inequality in the world The vast majority of the world's poorest households depend to a considerable extent on farming for their incomes while food represents a large component of the consumption of all poor households For generations food prices have been heavily distorted by government policies in high income and developing countries Many countries began to reform their agricultural price and trade policies in the 1980s but government policy intervention is still considerable and still favors farmers in high income countries at the expense of many farmers in developing countries What would be the poverty and inequality consequences of the removal of the remaining distortions to agricultural incentives This question is of great relevance to governments in evaluating ways to engage in multilateral and regional trade negotiations or to improve their own policies unilaterally *Agricultural Price Distortions Inequality and Poverty* analyzes the effects of agricultural and trade policies around the world on national and regional economic welfare on income inequality among and within countries and on the level and incidence of poverty in developing countries The studies include economy wide analyses of the inequality and poverty effects of own country policies compared with rest of the world policies for 10 individual developing countries in three continents This book also includes three chapters that each use a separate global economic model to examine the

effects of policies on aggregate poverty and the distribution of poverty across many identified developing countries This study is motivated by two policy issues first the World Trade Organization s struggle to conclude the Doha Round of multilateral trade negotiations in which agricultural policy reform is again one of the most contentious topics in the talks and second the struggle of the developing countries to achieve their Millennium Development Goals by 2015 notably the alleviation of hunger and poverty which depends crucially on policies that affect agricultural incentives

Buddhism and Postmodern Imaginings in Thailand James Taylor, 2016-12-05 This book presents a rethink on the significance of Thai Buddhism in an increasingly complex and changing post modern urban context especially following the financial crisis of 1997 Defining the cultural nature of Thai urbanity the implications for local global flows interactions and emergent social formations James Taylor opens up new possibilities in understanding the specificities of everyday urban life as this relates to perceptions conceptions and lived experiences of religiosity Changes in the centre are also reverberating in the remaining forests and the monastic tradition of forest dwelling which has sourced most of the nation s modern saints The text is based on ethnography taking into account the rich variety of everyday practices in a m l range of the religious In Thailand Buddhism

is so intimately interconnected with national identity and social economic and ethno political concerns as to be inseparable Taylor argues here that in recent years there has been a marked reformulation of important conventional cosmologies through new and challenging Buddhist ideas and practices These influences and changes are as much located outside as inside the Buddhist temples monasteries

World Bank East Asia and Pacific Economic Update 2012 World Bank,2013-06-27 Growth in developing East Asia and the Pacific remained strong in 2011 although it slowed from its post crisis peaks Strong domestic demand offset weaker external demand from the United States and Western Europe Looking ahead the external environment is likely to remain weak The best prospects for the region to maintain high rates of growth job creation and poverty reduction are through rebalancing towards domestic demand and investing in productivity increases and further international integration Developing East Asia grew by 8.2 percent in 2011 4.3 percent excluding China a sharp decline from the nearly 10 percent growth rate recorded in 2010 7.0 percent excluding China This slowdown was largely due to lower than expected growth in manufacturing exports and supply disruptions in the wake of the Japan earthquake and tsunami and the severe flooding in Thailand Lao PDR and Cambodia Domestic demand and investment compensated for these factors and were aided by monetary policy loosening in some countries Yet for many countries this pace of growth was a return to pre crisis growth trends following the 2010 rebound that followed the global financial and economic crisis East Asian growth remained impressive on a global scale In 2011 growth was around a percentage point higher than in South Asia and around 3 percentage points higher than in Eastern Europe and Latin America Poverty continued to fall across the region with the number of people living on less than US 2 a day expected to decrease to 513 million by 2012 from 565 million in 2010 Yet much of this is driven by gains in China and the rate of poverty reduction seems to be slowing in step with moderating economic expansion in China and other parts of the region page 1
