Renewing Meaning A Speech Act Theoretic Approach:

Renewing Meaning Stephen Barker, 2004 At the birth of analytic philosophy Frege created a paradigm that is centrally important to how meaning has been understood in the twentieth century Frege invented the now familiar distinctions of sense and force of sense and reference of concept and object He introduced the conception of sentence meaning as residing in truth conditions and argued that semantics is a normative enterprise distinct from psychology Most importantly he created modern quantification theory engendering the idea that the syntactic and semantic forms of modern logic underpin the meanings of natural language sentences Stephen Barker undertakes to overthrow Frege's paradigm rejecting all the above mentioned features The framework he offers is a speech act based approach to meaning in which semantics is entirely subsumed by pragmatics In this framework meaning resides in syntax and pragmatics sentence meanings are not propositions but speech act types word meanings are not objects functions or properties but again speech act types pragmatic phenomena one would expect not to figure in semantics such as pretence enter into the logical form of sentences a compositional semantics is provided by showing how speech act types combine together to form complex speech act types the syntactic structures invoked are not those of quantifiers open sentences variables variable binding etc rather they are structures specific to speech act forms which link logical form and surface grammar very closely According to Barker a natural language a system of thought is an emergent entity that arises from the combination of simple intentional structures and certain non representational cognitive states It is embedded in and part of a world devoid of normative facts qua extra linguistic entities The world in which the system is embedded is a totality of particular states of affairs There is no logical complexity in re it contains mereological complexity only Some truths have truth makers but others logically complex truths lack them Nevertheless the truth predicate is univocal in meaning *Renewing Meaning* is a radical ambitious work which offers to transform the semantics of natural language

New Work on Speech Acts Daniel Fogal, Daniel W. Harris, Matt Moss, 2018-07-04 Speech act theory is the interdisciplinary study of the wide range of things we do with words Originally stemming from the influential work of twentieth century philosophers including J L Austin and Paul Grice recent years have seen a resurgence of work on the topic On one hand a new generation of linguists philosophers and cognitive scientists have made impressive progress toward reverse engineering the psychological underpinnings that allow us to do so much with language Meanwhile speech act theory has been used to enrich our understanding of pressing social issues that include freedom of speech racial slurs and the duplicity of political discourse This volume presents fourteen new essays by many of the philosophers and linguists who have led this resurgence The topics span a methodological range that includes formal semantics and pragmatics foundational issues about the nature of linguistic representation and work on a variety of forms of indirect and or uncooperative speech that occupies the intersection of the philosophy of language ethics and political philosophy Several of the contributions demonstrate the benefits of integrating the methodologies and perspectives of these literatures The essays are framed by a comprehensive introductory survey of the contemporary literature written by the editors

Practical Expressivism Neil Sinclair, 2021 What is morality Neil Sinclair argues that it is a purely natural interpersonal

co ordination device whereby human beings express their attitudes in order to influence others attitudes and actions Sinclair shows that even if moral practice is fundamentally expressive it can still possess the features that make morality appear objective *The Invisible Constitution in Comparative Perspective* Rosalind Dixon, Adrienne Stone, 2018-11-08 Constitutions worldwide inevitably have invisible features they have silences and lacunae unwritten or conventional underpinnings and social and political dimensions not apparent to certain observers This contributed volume will help its wide audience including scholars students and practitioners understand the dimensions to contemporary constitutions and their role in the interpretation legitimacy and stability of different constitutional systems Names and Context Dolf Rami, 2021-11-04 Dolf Rami contributes to contemporary debates about the meaning and reference of proper names by providing an overview of the main challenges and developing a new contextualist account of names Questions about the use and semantic features of proper names are at the centre of philosophy of language How does a single proper name refer to the same thing in different contexts of use What makes a thing a bearer of a proper name What is their meaning Guided by these questions Rami discusses Saul Kripke s main contributions to the debate and introduces two new ways to capture the rigidity of names proposing a pluralist version of the causal chain picture Covering popular contextualist accounts of names both indexical and variabilist he presents a use sensitive alternative based on a semantic comparison between names pronouns and demonstratives Extending and applying his approach to a wide variety of uses including names in fiction this is a comprehensive explanation of why we should interpret proper names as use sensitive expressions **Metaethics After Moore** Terry Horgan, Mark Timmons, 2006-01-26 Metaethics is concerned to answer second order non moral questions about the semantics metaphysics and epistemology of moral thought and discourse and is often traced to G E Moore work These essays represent the most up to date work in the field after and in some cases directly inspired by Moore *The Architecture of the Imagination* Shaun Nichols, 2006-09-07 The Architecture of the Imagination will be an essential resource for the growing number of philosophers and psychologists studying the nature of the imagination and on its role in philosophy aesthetics and everyday life **Making Semantics Pragmatic** Ken Turner, 2011-06-08 This collection of especially invited papers aims to explore the nature of the semantics pragmatics interface by examining the extent to which the analysis of certain expressions or constructions can be pragmaticised As the title of the collection implicates it is anticipated that the theoretical and descriptive burden will move from semantics to pragmatics However not all parts of a linguistic system will yield to a pragmatic treatment The possibility remains that certain expressions or constructions are more economically and elegantly treated in semantic terms Thus this collection also contains papers that address the topic of making pragmatics semantic This collection contributes to the current interest in examining the division of labour between semantics and pragmatics in the analysis of meaning All of the papers are at the forefront of knowledge in these matters and each contains original empirical analyses and or novel theoretical perspectives This book is relevant to courses in university

departments of linguistics modern languages philosophy and psychology and to a wide range of university teaching and research

Renewing Spiritual Perception with Jonathan Edwards Ray S. Yeo, 2016-06-17 Jonathan Edwards theologically sophisticated psychology of grace remains one of the deepest and most fertile theological psychologies in the Protestant tradition The heart of his account lies in his foundational doctrine of

spiritual perception where he locates the psychological core of the engraced Christian life This work revisits Edwards doctrine from the perspective of recent work in the philosophy of emotions and other related philosophical sub disciplines The aim is to recover this often neglected theme in contemporary theology and renew it by bringing Edwards theological insights into conversation with various spheres of contemporary philosophical discussion The account of spiritual perception that emerges from this interdisciplinary dialogue is one that seeks to revise update and deepen Edwards own thinking on the matter in five major ways The book concludes by arguing that the capacity for spiritual and emotional perception of the supreme good is grounded upon a wisdom like seminal virtue centred upon the incarnate Christ i e Christocentric wisdom Such wisdom on the renewed account is considered the psychological core of transforming grace and the foundational basis upon which all other Christian virtues are formed
