[With the "Index of Names and Subjects".] Public Free Libraries (Manchester),1864 *The Political Reconstruction of American Tobacco, 1862-1933* Patrick Mulford O'Connor,2025-06-03 A deeply researched and clearly argued account of the mutual growth of the federal government and the modern tobacco Nearly everything about the United States tobacco economy changed in the generation following the American Civil War From labor to consumption manufacturing to regulation tobacco was utterly reconstructed comparatively a new industry as one contemporary wrote The Political Reconstruction of American Tobacco 1862 1933 exposes the causes of these changes and in the process it reconsiders cornerstones of the American national narrative Through a detailed rendering of tobacco s late nineteenth century political economy this book argues that the federal state s and American capitalism s development were mutually constitutive and fundamentally political processes From the Civil War to the Progressive Era diverse political movements across tobacco s commodity chain drove state and market development creating the immense power and stifling poverty that defined tobacco s reconstruction The Political Reconstruction of American Tobacco 1862 1933 emphasizes the significance of the thousands of manufacturers whose interest groups shaped federal tax policy and in turn forged a powerful and effective internal revenue system the increasingly influential fertilizer producers and warehouse operators who determined tobacco s value and the crop scientists who sought

to promote and rationalize US tobacco production As these actors reshaped tobacco s commodity chain they missed and even dismissed the interests of tobacco growers especially newly emancipated African Americans and smallholding whites throughout the South The ruling logic of tobacco s reconstructed political economy rationalized agrarian indebtedness justified low prices and intensified labor discipline on thousands of small farms In emphasizing these exclusions The Political Reconstruction of American Tobacco 1862 1933 reveals how nineteenth century state and economic development coincided with and even created rural poverty *The Reconstruction of American Liberalism, 1865-1914* Nancy Cohen,2003-04-03

Tracing the transformation of liberal political ideology from the end of the Civil War to the early twentieth century Nancy Cohen offers a new interpretation of the origins and character of modern liberalism She argues that the values and programs associated with modern liberalism were formulated not during the Progressive Era as most accounts maintain but earlier in the very different social context of the Gilded Age Integrating intellectual social cultural and economic history Cohen argues that the reconstruction of liberalism hinged on the reaction of postbellum liberals to social and labor unrest As new social movements of workers and farmers arose and phrased their protests in the rhetoric of democratic producerism liberals retreated from earlier commitments to an expansive vision of democracy Redefining liberal ideas about citizenship and the state says Cohen they played a critical role in legitimating emergent corporate capitalism and politically insulating it from democratic challenge As the social cost of economic globalization comes under international critical scrutiny this book revisits the bitter struggles over the relationship between capitalism and democracy in post Civil War America The resolution of this problem offered by the new liberalism deeply influenced the progressives and has left an enduring legacy for twentieth century American politics Cohen argues **Bibliography of American Imprints to 1901: Main part** ,1993
