Rodriguez, William F. Pinar, 2007 Much of the focus of anti homophobic anti heterosexist educational theory curriculum and pedagogy has examined the impact of homophobia and heterosexism on gay lesbian bisexual and transgender GLBT students and teachers Such a focus has provided numerous theoretical and pedagogical insights and has informed important changes in educational policy *Queering Straight Teachers* Discourse and Identity in Education remains deeply committed to the social justice project of improving the lives of GLBT students and teachers However in contrast with much of the previous scholarship *Queering Straight Teachers* shifts the focus from an analysis of the GLBT Other to a critical examination of what it might mean in theory and in practice to queer straight teachers and the implications this has for challenging institutionalized heteronormativity in education This book will be useful in courses on educational foundations curriculum studies multicultural education queer theory gay and lesbian studies and critical theory      [Handbook of Critical Race Theory in Education](#) Marvin Lynn, Adrienne D. Dixson, 2021-10-25 This handbook illustrates how education scholars employ Critical Race Theory CRT as a framework to bring attention to issues of race and racism in education It is the first authoritative reference work to provide a truly comprehensive description and analysis of the topic from the defining conceptual principles of CRT in Law that gave shape to its radical underpinnings to the political and social implications of the field today It is divided into six sections covering innovations in educational research policy and practice in both schools and in higher education and the increasing interdisciplinary nature of critical race research New chapters broaden the scope of theoretical lenses to include LatCrit AsianCrit and Critical Race Feminism as well as coverage of DisCrit Studies Research Methods and other recent updates to the field This handbook remains the definitive statement on the state of critical race theory in education and on its possibilities for the future      [Globalization on the Margins \(2nd Edition\)](#) Iveta Silova, Sarfaroz Niyozov, 2020-01-01 Reflecting on almost three decades of postsocialist transformations the second edition of *Globalization on the Margins* explores continuities and changes in Central Asian education development since the dissolution of the Soviet Union in 1991 with a particular focus on the developments that took place since the production of the first edition in 2011 Rather than viewing these transformations in isolation the authors place their analyses within the global context by reflecting on the interaction between Soviet legacies and global education reform pressures in the Central Asian countries of Kazakhstan Kyrgyzstan Tajikistan Turkmenistan and Uzbekistan This new edition in addition to a revised introduction and a newly added conclusion consists of four thematic sections each reflecting a key theme in the educational life of the Central Asian states These thematic sections introduction and conclusion collectively update our understanding of the recent

developments and challenges in education of the five Central Asian states They however go beyond mere information update so as to complicate re engage re form and re define the margins taking up margins a conceptual geographic cultural and geo political construct Notwithstanding the diversity of local and international authors variety of theoretical perspectives methodological approaches and conceptual lenses the essays reveal the complexity and uncertainty of the post socialist education transformations Instead of portraying the transition process as the influx of Western ideas into the region Globalization on the Margins provides new lenses to critically example education as a contested field of diverse perspectives competing forces and multidirectional flow of ideas concepts and reforms in Central Asia ENDORSEMENTS Hindsight famously brings clarity And much of what happened after the fall of the Berlin Wall and the collapse of the Soviet Union has now been correctly deeded over to historians Nonetheless we ignore that history at our peril The contributors to this volume show that carefully textured and historically attuned education research generates deep insights into ongoing transformations and the political cultural social and economic structures relations and practices that do the work of producing margins and centers in the first place Noah W Sobe Loyola University Chicago Globalization on the margins and at the epicentre of the battles of the Great Powers Two excellent educators Sarfaro Niyozov and Iveta Silova compiled a timely and long awaited scholarly work based on empirical research in societies which had similar history close to three decades ago All the contributors are prolific educators who know the education system from within and without who either hailed from the region or have spent a considerable amount of time to know the systems well The book contains remarkable stories of education through the ups and downs of historical evolution It is a must read primer for anyone interested in learning about high quality research in the field of education in Central Asia It is a huge contribution to educational research with an impact on research and teaching for years to come Duishon Shamatov Nazarbayev University Kazakhstan The challenge of moving Central Asia from the borders of the Soviet Empire to the world s center is the focus of the discussions in Globalization on the Margins The transition to the Western models of education was happening in the context of major paradigm shift which entire humanity was experiencing and which could be described as the arrival of the new post industrial civilization During this process Central Asian countries have been pushed to the margins because their contribution to the wealth of the new world know how was much less pronounced than that of their Western neighbours Therefore investment into the research that contributes to local knowledge production seems a natural solution to the problem All the contributors to this book have a vast experience in the region and many of their observations are thought provoking This is a very insightful and much needed book Elena Lenskaya Moscow School of Social and Economic Sciences Russia

### **Educational Leadership and Pierre Bourdieu** Pat

Thomson, 2016-11-03 Pierre Bourdieu was one of the most important thinkers of the twentieth century. He argued for and practiced rigorous and reflexive scholarship interrogating the inequities and injustices of modern societies. Through a lifetime's explication of the ways in which schooling both produces and reproduces the status quo, Bourdieu offered a powerful critique and method of analysis of the history of schooling and of contemporary educational policies and trends. Though frequently used in educational research, Bourdieu's work has had much less take up in Educational Leadership Management and Administration. Educational Leadership and Pierre Bourdieu argues that ELMA scholars have much to gain by engaging more thoroughly with his work. The book explains each of the key terms in Bourdieu's thinking tool kit, showing how the tripartite concepts of field, habitus, and capitals offer a way through which to understand the interaction of structure and agency and the limits on the freedom of an individual in this case, an educational leader, to act. Educational Leadership and Pierre Bourdieu offers an analysis of dominant trends in ELMA research, examining the kinds of questions asked, projects undertaken, and methods used. It provides alternative questions and methods based on a Bourdieusian approach, further readings, and a range of exemplars of the application of these tools. The book will be of interest to those whose primary focus is the utility of Bourdieu's social theory.

Contributors explore the political, institutional, and subjective dimensions of these transitions and the multiple mechanisms of inequality that traverse them. Providing vital insights for policy and practice that are internationally relevant, this book will guarantee greater equity and social justice for young people regarding their educational trajectories and opportunities.
