

Reproduction In Poultry

Daniela Niemeyer

Reproduction In Poultry:

Reproductive Technologies in Farm Animals Ian Gordon, 2004 In the past half century great progress has been made in the reproductive management of farm animals both mammals and birds This book aims to review developments and indicate which reproductive technologies can be used commercially or in research It begins by discussing artificial insemination and how this has recently been refined in semen sexing technology Embryo transfer in vitro embryo production technology and the control of oestrus and ovulation are then reviewed Subsequent chapters consider the control of postpartum ovarian activity seasonal breeding multiple births and litter size pregnancy testing parturition and the onset of puberty The author then describes more recent developments in cloning and the production of transgenic animals before a final chapter on suppressing reproductive activity

New Developments in Reproduction and Incubation of Broiler Chickens Frank Edwin Robinson, Gaylene Marie Fassenko, Robert Allen Renema, 2003

Reproduction in Poultry Ifeanyi Charles Okoli, Michael Uwaezuoke Iloeje, Ifeanyi Princewill Ogbuewu, 2021-02-05 Poultry is an integral part of animal agriculture and they provide the human population with products such as meat and eggs In poultry production as with other livestock systems a high level of reproductive performance is absolutely crucial to efficient production In order to manage poultry reproduction and the specific problems that arise it is important to understand the underlying physiology of the reproductive process Thus this book aims to provide an integrated overview of the subject of poultry reproduction describing the normal function of the reproductive system The book is designed to provide a general background to the field of poultry reproduction for postgraduate and undergraduate students and a reference source for research scientists and professional workers in the field related to the production of animal products The book will serve as an introductory text to veterinary students embarking on a career in reproductive physiology research Furthermore we hope that it will be used by working veterinarians and farmers to update themselves on new research findings and developments in the management of poultry reproduction Since the mid the 19th century several studies characterizing the anatomy and physiology of the male and female reproductive systems of poultry have been conducted This book focuses mainly on the review of current literature on physiological mechanisms regulating reproduction with emphasis on poultry species It describes the basic structures and functions of the male and female reproductive tracts including the sex organs testis ovary excurrent ducts accessory organs oviducts shell gland and vagina The endocrine glands that control reproduction in poultry were also described The process of sperm production and egg formation are discussed including highlights of the recent literature on factors that affect spermatozoa production and function The basic fundamental structure and chemical characteristics of the eggs were defined Key elements of the egg production are discussed including synthesis and transfer of egg yolk constituents the formation of the egg yolk in the ovary development of oocytes and ovulation the formation of egg white and chalazae the formation of eggshell and oviposition This section also described in detail the sperm egg binding sperm acrosome reaction and protease

enzymes required for the hole formation in the perivitelline membrane and the development of the diploid zygote emanated from the fusion of the nuclei from both male and female gametes The editors have succeeded in bringing together many renowned poultry reproduction experts to review the current body of knowledge in poultry reproduction and are grateful to all the authors for their state of the art compilation of the most recent development in this field We feel that we have achieved our goal of producing an outstanding book with the top scientists in their field addressing each subtopic I P Ogbuewu I C Okoli M U Iloeje *General Course in Poultry Husbandry* T. E. Quisenberry, 1919 Chicken and Egg Christine Back, 1992 Photographs drawings and text on two different levels of difficulty follow the development of a chick embryo from the fertilization and laying of the egg to the time the chick hatches General Course in Poultry Husbandry American Poultry School, 1922 *Everybody's Standard Poultry Feed Book* Henry P. Schwab, 1920 *Encyclopedia of Reproduction*, 2018-06-29 Encyclopedia of Reproduction Second Edition Six Volume Set comprehensively reviews biology and abnormalities also covering the most common diseases in humans such as prostate and breast cancer as well as normal developmental biology including embryogenesis gestation birth and puberty Each article provides a comprehensive overview of the selected topic to inform a broad spectrum of readers from advanced undergraduate students to research professionals Chapters also explore the latest advances in cloning stem cells endocrinology clinical reproductive medicine and genomics As reproductive health is a fundamental component of an individual's overall health status and a central determinant of quality of life this book provides the most extensive and authoritative reference within the field Provides a one stop shop for information on reproduction that is not available elsewhere Includes extensive coverage of the full range of topics from basic to clinical considerations including evolutionary advances in molecular cellular developmental and clinical sciences Includes multimedia and interactive teaching tools such as downloadable PowerPoint slides video content and interactive elements such as the Virtual Microscope Producing Poultry Profitably: the Way We Do it Thomas E. Quisenberry, 1917

Reproduction in Poultry Robert J. Etches, 1996 The egg Embryonic development Growth and sexual maturation Photoperiodism The ovary Egg formation The male Artificial insemination Management of reproduction using photoschedules Nutrition food consumption and reproduction Monitoring reproductive success Poultry Success, 1921 *Poultry Production* William Adams Lippincott, 1921 Reproduction Studies in the Turkey Hen John Henry Wolford, 1963

Nutritional approaches to arresting the decline in fertility of pigs and poultry J.A. Taylor-Pickard, L. Nollet, 2023-08-28 Continued genetic development of pigs and poultry has been the foundation of profitable production within a competitive market However the challenges of these production increases have undoubtedly taken their toll on reproductive function in all breeding livestock with the incidence of infertility increasing at an alarming rate For example it has recently been estimated that over 40% of sows are culled due to fertility problems compared to just 12% with feet and leg issues This edited collection of papers is taken from a series of seminars devoted to bringing together some of the world's leading

authorities in the field of pig and poultry reproduction The fundamental aim being to re examine the current trends in productivity in the pig and poultry industries and to identify nutritional means to improve fertility It considers the effects of essential nutrients in optimising productivity and discusses innovative applications of nutrition that will help to enhance fertility The success of such innovations within entrepreneurial integrated systems is also covered together with the importance of producing a quality chick and piglet at birth hatching Finally the role of management and the need for least cost production is discussed Nutritional Approaches to Arresting the decline in Fertility of Pigs and Poultry is aimed at nutritionists and animal producers as well as students and researchers studying animal and applied biological sciences
