the natural areas in which animal reside John Hadley argues that both proponents of animal rights and environmentalists ought to support animal property rights because protecting habitat promotes ecological values and helps to ensure animals live free from human interference Hadley s focus is pragmatist he locates animal property rights within the institution of property as it exists today in liberal democracies He argues that attempts to justify animal property rights on labor and first occupancy grounds will likely fail instead he grounds animal property rights upon the importance of habitat for the satisfaction of animals basic needs The potential of animal property rights as a way of reinvigorating existing public policy responses to the problem of biodiversity loss due to habitat destruction is thoroughly explored Using the concept of guardianship for cognitively impaired human beings Hadley translates habitat rights as a right to negotiate human guardians ought to be allowed to negotiate on behalf of wild animals with human landholders whose development activities put animals at risk In addition to a theory of animal property rights Animal Property Rights affords a critique of Donaldson and Kymlicka s wild animal sovereignty theory a defence of indirect approaches to animal rights an extensive discussion of euthanasia as a therapeutic hunting tool and the first discussion of Locke s theory of original acquisition in animal rights literature
