Research As A Basis For Teaching:

Research as a Basis for Teaching Lawrence Stenhouse, 1985 These selections from the work of Lawrence Stenhouse make a sustained argument for research as a basis for teaching *Research as a basis for teaching* Lawrence Stenhouse, 1985 *The Study of Primary Education: Classrooms and teaching studies* Brenda Lofthouse, Marion Dadds, 1990 These books were compiled to help the professional development of primary school teachers and represent wholly enlarged updated and revised editions of the three primary source books published by Falmer Press in 1985 *Teacher Professional Learning in an Age of Compliance* Susan Groundwater-Smith, Nicole Mockler, 2009-04-29 Teacher Professional Learning in an Age of Compliance Mind the Gap examines ways in which practice based inquiry in educational settings in a number of different countries and contexts can transcend current ways of working and thinking such that authentic professional learning is the result The authors contend that education policy under pressure from a number of quarters is retreating into a standardized audited and backward looking arena with the advances of more progressive educational philosophy being rolled back In an age where practitioner inquiry and action research have often been hijacked for the purposes of broad based policy implementation this book offers a rationale for reclaiming the critical edge so fundamental to inquiry based professional learning It examines the potential of inquiry based forms of teacher professional learning to contribute to the growth of professional knowledge for and about teachers work The authors intend that the book will assist in building new forms of professional knowledge that go beyond the current compliance model engineered from less enduring materials to inform a new model with its foundations in a strong ethical and moral framework They also believe that this new model if implemented will help to reverse today's conservative educational trends and make teacher professional development a force for genuine progress once again They have consciously moved away from the celebratory tone of much of the academic reporting of teacher professional learning adopting instead a genuinely critical edge In covering a wide range of policies and practices from across the international spectrum they have allowed themselves the freedom to engage in serious epistemological arguments about the nature of professional knowledge as well as how it is constructed and employed

The Study of Primary Education Marion Dadds, Brenda Lofthouse, 1990 These books were compiled to help the professional development of primary school teachers and represent wholly enlarged updated and revised editions of the three primary source books published by Falmer Press in 1985 **The Research Basis for Autism Intervention** Eric Schopler, Nurit Yirmiya, Cory Shulman, Lee M. Marcus, 2007-05-08 As the past President of the Israel Society for Autism it gives me great pleasure to congratulate Professor Schopler and his colleagues on the publication of their new book concerning the relationship between scientific research and treatment When we in Israel began our specifically structured education program for young children with autism our work was based on slim to scarce knowledge and information and with no experience whatsoever Whatever information we could gather was mostly from psychological educational centers in the U S

One of the most important and significant connections was established between the TEACCH program of North Carolina led and conducted by the two important scholars Professor Eric Schopler and Professor Lee Marcus and our Israel Society for Autism. During our many encounters seminars and conferences we profited enormously from all their accumulated expertise and scientific research while perhaps it was also an important experience for them to see how a young society with very limited means was eventually shaping its educational program and arriving at some excellent results. We of course have the highest esteem for Governor Hunt who has been following this program with so much attention and support and we still remember his visit to Israel with distinguished representatives of the TEACCH Program. I wish the new book every success. I know it will be an enormous contribution to all those who must cope with a difficult and painful issue autism for whom there is no end to the need for research and continuously improving methods of care and education.

Developing Research in Teacher Education Ian Menter, Jean Murray, 2013-09-13 Good teacher education informed by relevant research is judged by policy makers and practitioners alike to be central to increasing the quality of schooling in many countries of the world. Yet in the UK research on teacher education is often acknowledged to be less well developed than other areas of educational research and to be over determined by education policy. It has also been accused of a lack of rigour and of being atheoretical. A further challenge in developing good research in teacher education is that new teacher educators commonly face the challenge of moving into academic work without relevant research skills and the ready capacity to produce high quality research outputs. For these reasons then strengthening research in and on teacher education is high on educational agendas in the UK. This book examines the exact nature of these challenges in teacher education and the initiatives arising to address them in different settings across the four nations of the UK. The central theme of all the chapters is how to build research capacity so that teacher education can contribute more strongly to the improvement of schooling as well as becoming a high quality research informed enterprise in its own right. The insights will be valuable to teacher educators around the world. This book was published as a special issue of the Journal of Education and Teaching.
