Urban Infrastructure Research

Alok Tiwari, 2016-02-24 This book reviews contemporary research on urban infrastructure in 76 Ethiopian cities It examines urban infrastructure issues in these cities and covers a wide range of topics from sustainability and smart cities to research methods employed by urban infrastructure investigators with regard to Ethiopian cities Research on urban infrastructure legitimacies and modalities has established its value worldwide in recent years though it is still fairly young in the Ethiopian context The first chapter outlines ongoing issues of debate concerning urban infrastructures including but not limited to discourses on sustainability smart cities innovative financing methods and potential partnerships Urban infrastructure issues in Ethiopian cities are examined in the second chapter while the third chapter presents a review of the most relevant literature for researchers Findings show that the citations in the research reports are mainly from the materials available over the internet including WHO UN Habitat and unpublished local materials The fourth chapter identifies patterns in the findings and recommendations of the research reports discussed The results reveal that there is a wider gap between supply and demand with regard to urban infrastructure in Ethiopian cities a situation that is further aggravated because of the growing urban population and already existing backlogs The fifth chapter reviews the essential methods employed by urban infrastructure investigators in Ethiopian cities In this regard the cross sectional study method with the use of survey method has been broadly adopted among investigators Lastly the book presents a summary and recommendations It was observed that the urban infrastructure boom in Ethiopia is primarily concentrated in the key cities and the current pattern of urban infrastructure provision does not incorporate the notion of sustainability Hence the book calls for setting the agenda of future research on urban infrastructure and services in Ethiopian cities together with the universities private sector and government who should ideally collaborate to produce the knowledge needed to improve quality of life welfare productivity and economic growth

Geomorphological Fieldwork

, 2014-12-06 Geomorphological Fieldwork addresses a topic that always remains popular within the geosciences and environmental science More specifically the volume conveys a growing

legacy of field based learning for young geomorphologists that can be used as a student book for field based university courses and postgraduate research requiring fieldwork or field schools The editors have much experience of field based learning within geomorphology and extend this to physical geography The topics covered are relevant to basic geomorphology as well as applied approaches in environmental and cultural geomorphology The book integrates a physical human approach to geography but focuses on physical geography and geomorphology from an integrated field based geoscience perspective Addresses fluvial and karst landscapes in depth Focuses on field based learning as well as educational geomorphology Conveys experiential knowledge in international contexts

Private Sector Development in an Emerging World Diederik Boer,Harald Sander,Katharina Friz,Antonella Anastasi,2023-12-04 This book explores the interactions between private sector development public policies and societal institutions with a strong view on contributing to sustainable and inclusive development in emerging countries The private sector is often praised as an engine of economic growth This belief has led to significant efforts to promote private sector development in emerging countries Development agencies prioritize private sector development and national governments are following suit resulting in often huge incentives to stimulate and attract private investment However private sector development is not a panacea for sustainable and inclusive development as the past decades have clearly shown Economic growth societal development and environmental sustainability are often in a sharp conflict and more often than not economic growth has failed to improve the lives of all citizens This book examines the role the state and the private sector should play to benefit from the dynamics of business development while ensuring that these benefits are shared broadly without jeopardizing sustainability The views presented differ in detail but the analyses and case studies presented share common themes namely that the relative roles of state and private sector of should be balanced and that this particular balance should be based on the context of each country in order to make the private public sector interaction work for all people
