Critical Rationalism, the Social Sciences and the Humanities I.C. Jarvie, N. Laor, 2013-06-29 An outstanding feature of this book is the broad range of the contributors drawn from Europe the Middle East and North America testifying both to the range of Professor Agassi's interests and the geographical spread of his influence Most contributors use Agassi's ideas as a springboard to engage in debate on issues or offer a contribution in an area that interests him In this volume contributors consider such questions as Agassi's philosophy of education in practice as well as in theory the impact of psychologism in philosophy the origins of critical rationalism in the Bible the debates in economics stimulated by the work of Popper and Agassi and many other topics Besides the special topics the reader gains some sense of the fruitfulness of critical rationalism in the hands of Agassi's friends and colleagues

Assignments as Controversies Ibrar Bhatt, 2017-03-16 Approaching academic assignments as practical controversies this book offers a novel approach to the study of digital literacy Through in depth accounts of assignment writing in college classrooms Bhatt examines ways of understanding how students engage with digital media in curricular activities and how these give rise to new practices of information management and knowledge creation He further considers what these new practices portend for a stronger theory of digital literacy in an age of informational abundance and ubiquitous connectivity Looking also at how institutional digital learning policies and strategies are applied in classrooms and how students may embrace or avoid imposed technologies this book offers an in depth study of learner practices It is through the comprehensive study of such practices that we can better understand the efficacy of technological investments in education and the dynamic nature of digital literacy on the part of students charged with using those technologies

The Historiography of Contemporary Science and Technology Thomas Söderquist, 2013-01-11 More than ninety percent of all scientific history has been made during the last

half century So far however only a fraction of historical scholarship has dealt with this period Merely a decade ago most scientific historians considered recent science the scientific culture created lived and remembered by contemporary scientists an area of study best left to the historical actors themselves

Routledge Encyclopedia of Technology and the Humanities Chan Sin-wai, Mak Kin-wah, Leung Sze Ming, 2024-04-29 Routledge Encyclopedia of Technology and the Humanities is a pioneer attempt to introduce a wide range of disciplines in the emerging field of techno humanities to the English reading world This book covers topics such as archaeology cultural heritage design fashion linguistics music philosophy and translation It has 20 chapters contributed by 26 local and international scholars Each chapter has its own theme and addresses issues of significant interest in the respective disciplines References are provided at the end of each chapter for further exploration into the literature of the relevant areas To facilitate an easy reading of the information presented in this volume chapters have been arranged according to the alphabetical order of the topics covered This

Encyclopedia will appeal to researchers and professionals in the field of technology and the humanities and can be used by undergraduate and graduate students studying the humanities The Ethics of Today's Science and Technology Wenchao Li,Hans Poser,2008 Beneath the discussion and clarification of problems of which both sides agreed to have them in common and which are documented in this volume one of the important insights on both sides had been disagreements depending on a different way in seeing articulating and reflecting on these problems So the English term science in differing from the German Wissenschaft which includes not only sciences of nature but also humanities is meant in the Western tradition as the uninterested research for truth especially for most general laws but the Chinese understanding seems to be characterized by an immediate connection of science and its practical use **ECRM 2019 18th European Conference on Research Methods in Business and Management** Prof. Anthony Stacey,2019-06-20 **Handbook of Research on Technoethics** Luppicini, Rocci,Adell, Rebecca,2008-08-31 This book traces the emergence of the new interdisciplinary field of technoethics by exploring its conceptual development important issues and key areas of current research Compiling 50 authoritative articles from leading researchers on the ethical dimensions of new technologies Provided by publisher **The Hermeneutic Side of Responsible Research and Innovation** Armin Grunwald,2016-11-22 The book investigates the meaning of RRI if little or no valid knowledge about consequences of innovation and technology is available It proposes a hermeneutical turn to investigate narratives about possible futures with respect to their contemporary meaning instead of regarding them as anticipations of the future The Re-emergence of Values in Science Education Deborah Corrigan,Justin Dillon,Richard Gunstone,2007 Issues relating to values have always had a place in the school science curriculum Sometimes this has been only in terms of the inclusion of topics such as the nature of science and or scientific method and or particular intentions for laboratory work that relate to scientific method sometimes it has been much broader for example in curricula with STS emphases Of importance to aspects of this proposal is that different countries cultures have had different traditions in terms of the place of values in the school science curriculum One obvious very broad difference of this form is the central place in science education thinking in many European countries of bildung and the complete absence of this construct from most science curriculum thinking in English speaking contexts There are numbers of such country cultural differences In the 1990s many countries moved towards various conceptualizations of Outcomes Based Education OBE sometimes so labelled and sometimes not It was usual but not universal for OBE focused science curricula to have constrained views of the values that should be implicit and explicit in curriculum that is views concerned only with the nature of science and scientific method both usually seen as quite unproblematic Currently there are a number of education systems that are changing again and choosing to move away from Outcomes Based Education for example South Africa and several Australian states One of the most interesting features of many of these movements is the re embracing of a wider view of the science curriculum including a reconsideration of the nature and place of the values associated with science in the purposes for and approaches
