Research In Philosophy And Technology Vol 5 Research In Philosophy And Technology:

Technology and Responsibility P.T. Durbin,2013-03-09 Since it may seem strange for a new series to begin with volume 3 a word of explanation is in order The series Philosophy and Technology inaugurated in this form with this volume is the official publication of the Society for Philosophy the one requirement is that the schalarship be sound and all contributions to the series are subject to rigorous blind refereeing Technology the other half of the philos ophy and technology pairing is also construed broadly   **John Dewey's Pragmatic Technology** Larry A. Hickman,1990-03-22 a comprehensive canvass of Dewey s logic metaphysics aesthetics philosophy of history and social thought Choice a major addition to the recent accumulation of in depth studies of Dewey Journal of Speculative Philosophy Larry Hickman has done an exemplary job in demonstrating the relevance of John Dewey s philosophy to modern day discussions of technology Ethics   <u>Democratizing Technology</u> Anne Chapman,2012-04-27 Democratizing Technology provides a much needed fresh perspective on the regulation of chemicals and an important contribution to green thinking about technology Caroline Lucas Green Party MEP This book is an excellent critique of the current risk based approach to technology By exploring the philosophical underpinnings and the practical applications of current policy on science and technology Chapman exposes the serious flaws in allowing economic considerations to dominate the agenda in this area Her proposals for reform are expertly constructed and deserve urgent and serious consideration by policy makers Dr Stuart Parkinson Executive Director Scientists for Global Responsibility In this important book Anne Chapman argues that decisions about technology should answer a republican question what kind of public world should we create through technology Democratizing Technology deserves to be read widely John ONeill Professor of Political Economy University of Manchester UK A welcome addition to the new more empirical and applied literature in philosophy of technology This book will be essential reading for a variety of scholars and for the general reader intent on understanding and criticizing our chemically made world Andrew Light Interim Director Program on the Environment University of Washington US What is technology How do humans use it to build and modify the world What are the relationships between technology science economics and democratic governance What if any are our ethical and political responsibilities and choices in how we develop deploy and control technology in democratic states Democratizing Technology sets out to answer these questions Focusing on the most widespread and pervasive technology chemicals this groundbreaking volume peels apart the critical technology debate to look at the relationship between humans technology and the biological world Attention is given to the immensely important new regulations REACH Registration Evaluation Authorization and restriction of Chemicals the EUs largest ever legal framework discussing the problems that are likely to occur in REACHs reliance on risk assessment methods and suggesting an alternative way forward for the regulation of chemicals Providing much needed clarity and insight into the heart of key debates in science and technology risk analysis and mitigation and domestic and international law this volume arrives as a breath of fresh air   **Technology and Isolation**

Clive Lawson,2017-03-30 Combining classic philosophical ideas with groundbreaking recent developments in ontology Lawson proposes a new ontology of technology spanning several disciplines   *A Technology for the 'Base of the Pyramid'* Dimitris Drisis,2012-04-27 A reader on Plant Biotechnology can see most of the publications rotating and repeating the issues around Food Safety Regulatory and Public Policy and the role of capital in their support and development The originality of this work stems from the view that looks Plant Biotechnology in an optimistic manner and through the spectrum of an old social theory where science and public interest coexist in a harmonious way It is informative on the social role of Agricultural Technology to feed the world but also provides to scientists and managers in the industry an applied way to solve ethical dilemmas with the introduction of a new technology   *Design Methodology and Relationships with Science* Marc J de Vries,Nigel Cross,D.P. Grant,2013-03-09 Many business corporations are faced with the challenge of bringing together quite different types of knowledge in design processes knowledge of different disciplines in the natural and engineering sciences knowledge of markets and market trends knowledge of political and juridical affairs This also means a challenge for design methodology as the academic discipline that studies design processes and methods The aim of the NATO ARW of which this book is the report was to bring together colleagues from different academic fields to discuss this increasing multidisciplinarity in the relationship between design and sciences This multidisciplinarity made the conference a special event At a certain moment one of the participants exclaimed This is not a traditional design methodology conference Throughout the conference it was evident that there was a need to develop a common language and understanding to enable the exchange of different perspectives on design and its relationship with science The contributions that have been included in this book show these different perspectives the philosophical the historical the engineering perspective and the practical designer s experience   *A Pragmatic Approach to Business Ethics* Alex C. Michalos,1995-02-23 A pragmatic approach to business ethics is argued for in this volume which demonstrates the usefulness of the approach by applying it to a variety of issues These issues are broad and far reaching and include the relations between rational and moral ethical decision making the limits of loyalty to employers the impact of trust on business and the role of commercial public opinion polling during elections The author also covers advertising tobacco promotion manufacture and marketing of armaments concentration and taxation of wealth and the North American Free Trade Agreement   Proceedings of the 22nd International Conference on Industrial Engineering and Engineering Management 2015 Ershi Qi,Jiang Shen,Runliang Dou,2016-02-05 Being the premier forum for the presentation of new advances and research results in the fields of Industrial Engineering IEEM 2015 aims to provide a high level international forum for experts scholars and entrepreneurs at home and abroad to present the recent advances new techniques and applications face and face to promote discussion and interaction among academics researchers and professionals to promote the developments and applications of the related theories and technologies in universities and enterprises and to establish business or research relations to find global partners for future collaboration in the field of

Industrial Engineering All the goals of the international conference are to fulfill the mission of the series conference which is to review exchange summarize and promote the latest achievements in the field of industrial engineering and engineering management over the past year and to propose prospects and vision for the further development This volume is the second of the two proceedings volumes from this conference *Routledge Encyclopedia of Technology and the Humanities* Chan Sin-wai,Mak Kin-wah,Leung Sze Ming,2024-04-29 Routledge Encyclopedia of Technology and the Humanities is a pioneer attempt to introduce a wide range of disciplines in the emerging field of techno humanities to the English reading world This book covers topics such as archaeology cultural heritage design fashion linguistics music philosophy and translation It has 20 chapters contributed by 26 local and international scholars Each chapter has its own theme and addresses issues of significant interest in the respective disciplines References are provided at the end of each chapter for further exploration into the literature of the relevant areas To facilitate an easy reading of the information presented in this volume chapters have been arranged according to the alphabetical order of the topics covered This Encyclopedia will appeal to researchers and professionals in the field of technology and the humanities and can be used by undergraduate and graduate students studying the humanities Technological Transformation E.F. Byrne,Joseph C. Pitt,2012-12-06 The philosophical study of technology has acquired only recently a voice in academic conversation This situation is due in part to the fact that technology obviously impacts on the real world whereas the favored stereotype of philosophy allegedly does not Furthermore in some circles it was assumed that philosophy ought not impinge on the world This bias continues today in the form of a general dismissal of the growing area now referred to as applied philosophy By contrast the academic scrutiny of science has for the most part been accepted as legitimate for some 30 years primarily because it has been conducted in a somewhat ethereal manner This is in part because it was believed that science being pure one could think even philosophically about science without jeopardizing one s intellectual purity Since World War II however practitioners of the metascientific arts have come to ac knowledge that science also shows signs of having touched down on numerous occasions in what can only be identified as the real world No longer able to keep this banal truth a secret purists have sought to defuse its import by stressing the difference between pure and applied science and lest science be tainted by contact with the world through its applications they have devoted additional energy to separating applied science somehow from technology *Gaming and Technology Addiction: Breakthroughs in Research and Practice* Management Association, Information Resources,2016-08-05 Addiction is a powerful and destructive condition impacting large portions of the population around the world While typically associated with substances such as drugs and alcohol technology and gaming addiction have become a concern in recent years as technology use has become ubiquitous Gaming and Technology Addiction Breakthroughs in Research and Practice explores the social and psychological implications of technology and gaming addiction in addition to ways to manage and treat this unique form of addiction Focusing on emerging research case studies and future outlooks this comprehensive

publication is an essential resource for psychologists counselors graduate level students and researchers studying psychology and technology use **Leadership in Science and Technology: A Reference Handbook** William Sims Bainbridge,2011-10-20 Tackling 100 key topics and providing case studies in the area of science and technology leadership this reference handbook is an essential resource for students in this area *Technology and Values* Craig Hanks,2009-05-04 This anthology features essays and book excerpts on technology and values written by preeminent figures in the field from the early 20th century to the present It offers an in depth range of readings on important applied issues in technology as well Useful in addressing questions on philosophy sociology and theory of technology Includes wide ranging coverage on metaphysics ethics and politics as well as issues relating to gender biotechnology everyday artifacts and architecture A good supplemental text for courses on moral or political problems in which contemporary technology is a unit of focus An accessible and thought provoking book for beginning and advanced undergraduates yet also a helpful resource for graduate students and academics **Information Technology Ethics: Cultural Perspectives** Hongladarom, Soraj,Ess, Charles,2006-12-31 This book is the first publication that takes a genuinely global approach to the diverse ethical issues evoked by Information and Communication Technologies and their possible resolutions Readers will gain a greater appreciation for the problems and possibilities of genuinely global information ethics which are urgently needed as information and communication technologies continue their exponential growth Provided by publisher *Human Population Genetic Research in Developing Countries* Yue Wang,2013-11-12 Human population genetic research HPGR seeks to identify the diversity and variation of the human genome and how human group and individual genetic diversity has developed This book asks whether developing countries are well prepared for the ethical and legal conduct of human population genetic research with specific regard to vulnerable target group protection The book highlights particular issues raised by genetic research on populations as a whole such as the potential harm specific groups may suffer in genetic research and the capacity for current frameworks of Western developed countries to provide adequate protections for these target populations Using The People s Republic of China as a key example Yue Wang argues that since the target groups of HPGR are almost always from isolated and rural areas of developing countries the ethical and legal frameworks for human subject protection need to be reconsidered in order to eliminate or at least reduce the vulnerability of those groups While most discussion in this field focuses on the impact of genetic research on individuals this book breaks new ground in exploring how the interests of target groups are also seriously implicated in genetic work In evaluating current regulations concerning prevention of harm to vulnerable groups the book also puts forward an alternative model for group protection in the context of human population genetic research in developing countries The book will be of great interest to students and academics of medical law ethics and the implications of genetic research The Historiography of Contemporary Science and Technology Thomas Söderquist,2013-01-11 More than ninety percent of all scientific history has been made during the last half century So far

however only a fraction of historical scholarship has dealt with this period Merely a decade ago most scientific historians considered recent science the scientific culture created lived and remembered by contemporary scientists an area of study best left to the historical actors themselves **The Capability Approach, Technology and Design** Ilse Oosterlaken,Jeroen van den Hoven,2012-03-28 The capability approach of Martha Nussbaum and Amartya Sen places human capabilities at the centre stage of discussions about justice equality development and the quality of life It rejects too much emphasis on mere preference satisfaction or resource provision and highlights the importance of human agency and freedom This approach has already significantly influenced different fields of application such as economics and development studies Only recently have scholars started to explore its relevance for and application to the area of technology and design which can be crucial factors in the expansion of human capabilities How does technology influence human capabilities What difference could a capability approach make to policies and practices of applying ICT in development processes in the South How can we criticize and improve the design of technology from the perspective of the capability approach The authors of this volume explore the implications of the capability approach for technology design and together create the first volume on this emerging topic

The Study of the Future ,1977 Modelling the Legal Decision Process for Information Technology Applications in Law Georgios Yannopoulos,1998-01-01 In this book Georgios N Yannopoulos appropriately relates the developing field of knowledge based systems in law with the basis in classic philosophy explicating relations which too often are not properly understood The decision model developed by the author is important as it integrates and explains arguments which often have been seen as imcompatible The use of the theoretical foundation in describing and in giving a critical analysis of the construction of real knowledge bases systems becomes therefore very valuable and Jon Bing Norwegian Research Center for Computers and Law and Expert systems in law have not been as easily achieved as was originally envisaged because too many thought the task to be trivial and ignored the complex issues involved Yannopoulosand work is valuable because he attempts to detail these issues and overcome them and Philip Leith Queenand s University of Belfast and Yannopoulosand book addresses some of the most crucial problems in the field of information technology and law The development of more advanced IT solutions for the legal sector will always be closely related to our ability to model and understand the legal reasoning process In his analysis Yannopoulos elegantly integrates knowledge from many different areas and in this respect the book reflects an all too seldom seen broadness and Pete Wahlgren The Swedish Law and Informatics Research Institute IRI and There has been an abundance of recent research on developing intelligent support systems Dr Yannopoulosand work is especially significant because it examines the necessary legal background for building such systems It will be an essential reference for the prospective builders of intelligent legal support systems and John Zeleznikow La Trobe University Bundoora Australia **New Technology and Education** Anthony Edwards,2012-01-26 New Technology and Education explores the benefits and dangers of the increasing use of technology in education drawing on different cultural perspectives from across

the globe to consider a variety of viewpoints The reader is encouraged to engage with each facet of the debate considering the philosophical psychological and sociological implications of the relationship between technology and education Recent debates and developments are considered including What is the relationship between creativity education and new technology Are subject boundaries blurred by the use of new technologies How do we plan for technologies becoming redundant Reflective exercises interviews chapter summaries and useful websites encourage and support student learning and the application of new concepts
