Social Mobility in the 20th Century Florian R. Hertel, 2016-08-09 Based on a novel class scheme and a unique compilation of German and American data this book reveals that intergenerational class mobility increased over most of the past century While country differences in intergenerational mobility are surprisingly small gender regional racial and ethnic differences were initially large but declined over time At the end of the 20th century however mobility prospects turned to the worse in both countries In light of these findings the book develops a narrative account of historical socio political developments that are likely to have driven the basic resemblances across countries but also account for the initial decline and the more recent increase in intergenerational inequality *Social Stratification and Occupations* A. Blacks in Rural America James Benjamin Stewart, Joyce E. Allen-Smith, 1995-01-01 This volume is unique in its focus on the current economic status of black Americans in rural areas This topic has had relatively limited visibility in recent years due in part to the high degree of urbanization among blacks However to neglect rural blacks in the United States would constitute a tremendous disservice both to the legacy of the ongoing struggle of blacks to achieve overall economic parity and to current efforts to ameliorate the particular disadvantages faced by this segment of the American population Blacks in Rural America will help fill a gap in the literature examining the disadvantaged status of rural blacks It remedies the lack of information about how the well being of blacks in rural America is affected by various public policies This important volume will challenge readers to pay greater attention to the structure of the agrarian sector of the population as such It is a necessary addition to the libraries of economists political scientists sociologists and scholars of black studies

Logics of Socialist Education Tom G. Griffiths, Zsuzsa Millei, 2012-09-11 For some socialism is a potent way of achieving economic political and social transformations in the twenty first century while others find the very term socialism outdated This book engages readers in a discussion about the viability of socialist views on education and identifies the capacity of some socialist ideas to address a range of widely recognized social ills It argues that these pervasive social problems which plague so called developed societies as much as they contribute to the poverty humiliation and lack of prospects in the rest of the world fundamentally challenge us to act In our contemporary world system distancing ourselves from the injustices of others is neither viable nor defensible Rather than waiting for radically new solutions to emerge this book sees the possibility of transformation in the reconfiguration of existing social logics that comprise our modern societies including logics of socialism The book presents case studies that offer a critical examination of education in contemporary socialist contexts as well as reconsidering examples of education under historical socialism In charting these alternatives and retooling past solutions in a nuanced way it sets out compelling evidence that it is possible to think and act in ways that depart from today s dominant educational paradigm It offers contemporary policy makers researchers and practitioners a cogent demonstration of the contemporary utility of educational ideas and solutions associated with socialism A pioneering collection of essays which is central to understanding the historical and contemporary meanings of socialism in the context of neoliberal globalization It is a most timely contribution to a growing intellectual project that challenges the hegemony of capitalism while re thinking and theorizing alternatives Iveta Silova Associate Professor of Comparative Education Lehigh University Bethlehem PA USA In this significant contribution to recent scholarship the authors use the lens of socialist education to offer an original critique of hegemonic capitalism and present an intellectually rigorous search for alternatives by reconsidering historical socialism and advancing promising educational experiments that challenge the global architecture of education Anders Breidlid Professor of International Education and Development Oslo University College Norway International Labour Documentation International Labour Organization. Central Library and Documentation Bureau, 1997-08 **Social Construction In Contemporary China** Xueyi Lu, 2017-05-19 Placing the modernization of China in a historical context Social Construction in Contemporary China provides a powerful argument that social construction is instrumental for the country s modernization process and a key factor in China s national rejuvenation A wide range of topics and issues related to social construction are covered including people s livelihood and social undertakings income distribution urban and rural communities community organizations social management social norms reforms of social institutions and systems social restructuring and the process of social construction In addition to well informed and insightful analyses of these subjects that draw on the country s historical experiences contributors also provide policy suggestions on how to tackle problems and respond to challenges Its breadth and depth make this volume a valuable addition to the growing body of literature on this
