Research In Teams A Practical Guide To Group Policy Analysis:

Research in Teams Dan Bednarz, Donna J. Wood, 1991

The Policy Process Tim W. Clark, Susan G. Clark, 2002-01-01

This useful book is designed to teach natural resources professionals how to be more effective in solving conservation and environmental policy problems. Its presentation of basic concepts, case studies, and real world concerns provides a deeper understanding of the policy process and makes the book an invaluable aid for students and practitioners in such fields as wildlife biology, conservation biology, forestry, range management, ecosystem management, and sustainable development. Susan G. Clark begins by describing the challenges faced by natural resources professionals. She then explains how the substance and process of policy analysis and decision making can be improved by using a policy sciences framework that takes into account biological, social, political, and institutional considerations. Finally, she reflects on how issues of human rights and morality should affect natural resources management and policy analysis. The book is very user friendly.

A Practical Guide for Developing Cross-Disciplinary

Collaboration Skills David Gosselin, 2023-08-23 Solutions to societal and organizational problems require people from diverse fields of expertise to effectively work in team-based collaborative environments. To create these environments, we need to address a myth in modern culture that people have natural abilities to collaborate and work together. Collaboration and teamwork are skills. As such, these skills need to be learned and practiced. Commonly, collaboration is learned through trial and error. Team members have little or no training in how to effectively and efficiently harness the diversity of strengths among team members and maximize their contributions to the team. The purpose of this book is to provide a practical process-oriented guide that at its most fundamental level is about building relationships and promoting communication and learning among diverse groups of individuals that results in creative collaborative and inclusive problem-solving environments. This volume provides explicit approaches and processes that will help team members more effectively and efficiently create new knowledge and solutions for societal and organizational problems through collective action.
