## Sampling

### Stratified

The sample is a mini reproduction of the wider population. Before sampling, the population is divided into characteristics of importance for the research. For example, by gender, social class, education level, religion, etc. Then the population is randomly sampled within each category or stratum.

#### Evaluation

- + Representative and more generalisable
- Cannot represent all possible strata
- Difficult and time consuming

### Opportunity

Use whoever happens to be willing and available. Most commonly used by researchers.

#### Evaluation

- + Quick, convenient and economical
- Researcher can be biased in who they select
- Not representative or generalisable

### Volunteer

Participants self select themselves to take part. Usually in response to an advert.

#### Evaluation

- + Less time consuming
- + Participants are motivated and engaged
- Volunteer bias means the sample is hard to generalise from

Crown House AQA Psychology Nigel Holt, Rob Lewis, 2015-08-31 This new edition of the Holt and Lewis AQA Psychology textbook offers comprehensive coverage of the new AQA syllabus Written by two experienced teachers examiners and textbook authors this revised edition accommodates the changes to the English AQA specification with thorough coverage of both AS level and A level year 1 Ask an examiner hints and tips glossaries web links and exam style practice questions provide everything students need to learn and succeed This easy to read visually engaging textbook also features evaluations of key studies to encourage reflection and critical analysis aid understanding and give context detailed exploration of research methods to help develop analytical and mathematical skills Ask an examiner hints and tips practice questions and a section on exam preparation and revision providing everything students need to prepare for their exams lists of key terms QR codes and web links to help explain key issues carefully chosen images to promote debate and discussion and help ideas stick colour coded material for ease of use and checklists to break down everything you need to know for each topic and clearly identified A level only material enabling it to be easily distinguished from AS material      **Psychology** Geoffrey Shoesmith, 2014-03-25 This book provides simple clear in depth explanations of all the topics in the AQA GCSE specification 4180 syllabus but it will prove invaluable to students at many levels on many courses and to the independent reader It can be used as a stand alone home study course as a classroom text as a reference text or just for pleasure for those who love to think about what makes people tick Psychology describes up to date research as well as some classic psychology studies and

even debunks one or two psychology research myths. It leads the reader through all the topics in the syllabus as a teacher would in a classroom setting. Topics are presented as a series of lessons followed by Check Your Understanding sections which are designed to help you check and retain the information in each lesson. An assessment record provided at the end of the book will help you keep track of your progress. Lessons are interactive with many opportunities to jot down your thoughts and reactions, reflect on how a topic relates to your own experience, discuss with other people and become more involved with the material presented. Students can pinpoint the topics they are studying for GCSE by using the table mapping the GCSE specification against the lessons in this book. For those studying outside formal classrooms, there are guidelines about how best to approach your studies. The book assumes that readers have no previous knowledge of psychology and among the topics covered are Conformity and Obedience: would you press a button to kill someone just because you are told to do so? Many people would, it seems. Sex and Gender: do girls and boys, men and women behave so differently? If so, why? Memory: how does memory work and how accurate is it? Non Verbal Communication: do we reveal our true feelings in our body language? Development of Personality: what exactly is Anti Social Personality Disorder? Prejudice and Discrimination: are we bound to discriminate against people who are unlike us? Learning: how to remove your fear of spiders, snakes, flying open spaces or anything else using the principles of learning? Aggression: is aggression born into us? Is it in our hormones? Or do we learn to fight? Research Methods and the Ethics of Psychology: psychology is based on evidence, not just ideas. But what type of study constitutes good evidence and how should we treat the people in our studies?
