### **Biomedicine, Healing and Modernity in Rural Bangladesh**

Md. Faruk Shah, 2019-12-02 This book provides an ethnographic account of the ways in which biomedicine as a part of the modernization of healthcare has been localized and established as the culturally dominant medical system in rural Bangladesh Dr Faruk Shah offers an anthropological critique of biomedicine in rural Bangladesh that explains how the existing social inequalities and disparities in healthcare are intensified by the practices undertaken in biomedical health centres through the healthcare bureaucracy and local gendered politics This work of villagers healthcare practices leads to a fascinating analysis of the local healthcare bureaucracy corruption structural violence commodification of health pharmaceutical promotional strategies and gender discrimination in population control

Shah argues that biomedicine has already achieved cultural authority and acceptability at almost all levels of the health sector in Bangladesh. However, in this system, healthcare bureaucracy is shaped by social capital, power relations, and kin networks, and corruption is a central element of daily care practices.

**Handbook of Health Research Methods: Investigation, Measurement and Analysis**  
Ann Bowling, Shah Ebrahim, 2005-06-16. An ideal set text. Angela Scriven, Course Leader, Brunel University. Which research method should I use to evaluate services? How do I design a questionnaire? How do I conduct a systematic review of research? This handbook helps researchers to plan, carry out, and analyse health research and evaluate the quality of research studies. The book takes a multidisciplinary approach to enable researchers from different disciplines to work side by side in the investigation of population health, the evaluation of health care, and in health care delivery. Handbook of Health Research Methods is an essential tool for researchers and postgraduate students taking masters courses or undertaking doctoral programmes in health services evaluation, health sciences, health management, public health, nursing, sociology, socio-biology, medicine, and epidemiology. However, the book also appeals to health professionals who wish to broaden their knowledge of research methods in order to make effective policy and practice decisions.
