Kritzer, 1990-11-15 In law as elsewhere the ordinary is overshadowed in the popular and academic literature by the dramatic and sensational While the role and behavior of lawyers in the operation of our criminal justice system has been closely scrutinized comparatively little research has been devoted to the manner in which lawyers litigate the day to day civil non criminal cases that comprise the vast bulk of the workload in state and federal courts Originally commissioned by the U S Department of Justice this is the first comprehensive national study of the U S civil justice system Kritzer analyzes 1600 cases involving 1400 attorneys in five federal judicial districts Examining the background experiences day to day activities and outlook of civil lawyers Kritzer finds that the work of lawyers combines the roles of the professional and the broker in many areas of ordinary litigation Arguing that lawyers behavior must be understood in part as a form of brokerage between the client and the legal system he suggests that the roles of professionals and brokers be considered as complements rather than alternatives in the justice system and concludes by recommending that lawyers monopoly on advocacy in civil litigation be restricted An engaging lucidly written study The Justice Broker will be of special interest to practicing lawyers and legal scholars **The Scales of Success** Sheelagh O'Donovan-Polten, 2001-01-01 An unprecedented window into the most private thinking about success of four male and four female middle aged lawyers each of whom is widely recognised to be at the apex of the legal profession in Canada **Opportunities in the Legal**

The Futures of Legal Education and the Legal Profession Hilary Sommerlad, Sonia Harris-Short, Steven Vaughan, Richard Young, 2015-03-26 We are currently witnessing an unprecedented transformation in the legal profession and legal education The Legal Services Act 2007 and the Legal Aid Sentencing and Punishment of Offenders Act 2012 have both enabled and necessitated dramatic structural changes to the profession as well as impacting on its ethos and ethicality The recent Legal Education and Training Review LETR promises similarly dramatic change to the provision of legal education reflecting the shifting landscape of both the legal professional market and Higher Education in general These transformative changes bring both exciting opportunities and challenges with which everyone involved in the law from University lecturers to Senior Partners in leading law firms to the judiciary must grapple This edited collection comprises a selection of papers presented at the 2nd conference of CEPLER Birmingham Law School's Centre for Professional Legal Education and Research The aim of the Conference and thus this collection was to bring together leading academic scholars senior figures from professional practice policy makers and representatives of the regulatory authorities to reflect on the key issues arising from this transformative moment As such this volume of essays covers diverse ground from curriculum development to professional theory enriched and enhanced by the range of backgrounds and perspectives of its contributors

Diversity in Practice Spencer Headworth, Robert L. Nelson, Ronit Dinovitzer, David B. Wilkins, 2016-04-01 Expressions of support for diversity are nearly ubiquitous among contemporary law firms and corporations Organizations back these rhetorical commitments with dedicated diversity staff and various diversity and inclusion initiatives Yet the goal of proportionate representation for people of color and women remains unrealized Members of historically underrepresented

groups remain seriously disadvantaged in professional training and work environments that white upper class men continue to dominate While many professional labor markets manifest patterns of demographic inequality these patterns are particularly pronounced in the law and elite segments of many professions Diversity in Practice analyzes the disconnect between expressed commitments to diversity and practical achievements revealing the often obscure systemic causes that drive persistent professional inequalities These original contributions build on existing literature and forge new paths in explaining enduring patterns of stratification in professional careers These more realistic assessments provide opportunities to move beyond mere rhetoric to something approaching diversity in practice
