Research Strategies In Human Biology:

Research Strategies in Human Biology Gabriel Ward Lasker, C. G. Nicholas Mascie-Taylor, 1993-11-04 This book is about the process of doing research not about the results obtained A number of researchers with experience working on problems including environmental stresses population genetics parasitic vectors and vital records describe obstacles encountered and successful strategies employed in their own studies and in those of others One learns to do research by trial and error but accounts such as these can supplement what one learns from mentors and fellow students Happenings and Hearsay Gabriel Ward Lasker, 1999 One of the founders of modern human biology and physical anthropology Gabriel W Lasker holds a well established place in the history of science In a classic article published in Science in 1969 Lasker advanced the idea of plasticity the process of human adaptation to stressful environments by a series of modifications to the body during the course of physical growth and development This concept was a factor that led the scientific community to give up its reliance on the notion of genetically fixed racial types As he documents the rapidly changing field of anthropology and some of its leading figures Lasker gives his readers a peek inside the lives of people who have defined what it means to be human and one of those people is himself **Histories of American Physical Anthropology in the Twentieth Century** Michael A. Little, Kenneth A. R. Kennedy, 2010-01-01 Histories of American Physical Anthropology in the Twentieth Century chronicles the history of physical anthropology or as it is now known biological anthropology from its professional origins in the late 1800 up to its modern transformation in the late 1900s In this edited volume 13 contributors trace the development of people ideas traditions and organizations that contributed to the advancement of this branch of anthropology that focuses today on human variation and human evolution Designed for upper level undergraduate students graduate students and professional biological anthropologists this book provides a brief and accessible history of the biobehavioral side of anthropology in America Statistics for Anthropology Lorena Madrigal, 1998-04-23 A step by step introduction to basic statistics for students of anthropology and social science **The Oxford Handbook of the Social Science of Obesity** John Cawley, 2011-08-08 There is an urgent need to better understand the causes and consequences of obesity and to learn what works to prevent or reduce obesity This volume accurately and conveniently summarizes the findings and insights of obesity related research from the full range of social sciences including anthropology economics government psychology and sociology It is an excellent resource for researchers in these areas both bringing them up to date on the relevant research in their own discipline and allowing them to quickly and easily understand the cutting edge research being produced in other disciplines The Oxford Handbook of the Social Science of Obesity is a critical reference for obesity researchers and is also valuable for public health officials policymakers nutritionists and medical practitioners The first section of the book explains how each social science discipline models human behavior in particular diet and physical activity and summarizes the major research literatures on obesity in that discipline The second section provides important practical information for researchers

including a guide to publicly available social science data on obesity and an overview of the challenges to causal inference in obesity research The third part of the book synthesizes social science research on specific causes and correlates of obesity such as food advertising food prices and peers The fourth section summarizes social science research on the consequences of obesity such as lower wages job absenteeism and discrimination The fifth and final section reviews the social science literature on obesity treatment and prevention such as food taxes school based interventions and medical treatments such as anti obesity drugs and bariatric surgery

Centralizing Fieldwork Jeremy MacClancy, Agustín Fuentes, 2010-12-01 Fieldwork is a central method of research throughout anthropology a much valued much vaunted mode of generating information But its nature and process have been seriously understudied in biological anthropology and primatology This book is the first ever comparative investigation across primatology biological anthropology and social anthropology to look critically at this key research practice It is also an innovative way to further the comparative project within a broadly conceived anthropology because it does not focus on common theory but on a common method The questions asked by contributors are what in the pursuit of fieldwork is common to all three disciplines what is unique to each how much is contingent how much necessary Can we generate well grounded cross disciplinary generalizations about this mutual research method and are there any telling differences Co edited by a social anthropologist and a primatologist the book includes a list of distinguished and well established contributors from primatology and biological anthropology
