Young Researchers Margaret Mallett,2002-02-07 Informational kinds of reading are crucial in every lesson This book looks at how we can encourage children from the very beginning to think of themselves as young researchers using skills and strategies for clear purposes It argues that the creative practitioner nurtures children s sense of wonder and curiosity about the world and all its phenomena Packed full of advice on how to use the most stimulating and exciting texts and the liveliest approaches the book celebrates the good practice of teachers and student teachers in a large number of classroom case studies The content includes a summary of the recent developments and a framework of principles to inform good practice in this challenging aspect of literacy chapters concentrating on particular age groups beginning with the nursery and ending with the later primary years and thus taking up an essentially developmental approach an assessment of recent research and how findings can be put to practical and creative use in the classroom A central message is that children benefit from collaborating with teachers and peers at every stage of finding out The spoken language energises informational reading and writing making the sharing of the fruits of children s research highly enjoyable This book will inspire you and lead to the very best practice

The Young Researchers Conference on Cultural Policy and Cultural Diplomacy 21-22 August 2020 Assoc. Prof. Dr. Serhan ADA, We were in the mids of 2019 when we decided to organize a young researchers conference as the most important transnational event subsequent to the inauguration of the UNESCO Chair of Culture Policy and Cultural Diplomacy of Istanbul Bilgi University established in 2018 held together with the chairs working in the same field While deciding on the method content and form of participation of the conference we consulted with UNESCO chairs with which we have been in cooperation for a long time As a result we decided to invite young researchers who are in the early stages of their academic

career irrespective of their age and who have had their master s degree and or conducting doctoral studies Our purpose was to ensure that they would start a dialogue with their colleagues in similar statuses and benefit from the comments of reviewers having experience in the profession through the assessment of their presentations We wished the conference that we planned to last two days to address the main themes of cultural policy Hence we projected holding of five sessions on the themes of Culture as Agent in International Relations Managing and Sharing Cultural Heritage Cities New Actors of Cultural Policy Cultural Industries Film as a Case and Culture and Arts in all Their Forms Our call for applications has been welcomed with considerable interest At that time another thing happened as well We wanted those young researchers would meet face to face get to know each other and exchange their views outside of the conference However the pandemic broke out and we were faced with the choices of postponing the conference or acknowledging to hold it online due to travel prohibitions and lockdowns As a result the second alternative prevailed to maintain the excitement of the studies of the researchers Our conference was held online while Covid 19 was reigning with all its severity on 21 22 August 2020 At the conference papers of a total of eighteen researchers in charge at universities or working professionally in the sector in four continents took place The fact that almost all of the researchers included the original features of the practice which emerged from the theoretical literature in different subfields of cultural policy but which they followed closely or were a part of directly in their analyzes was attention inviting At the same time it was possible to see in the presentations the traces of the mostly negative impacts of the international political environment which continues with tensions hot or cold conflicts and inequalities in addition to the oppressive political environment prevailing in the countries of today on cultural policy On the other hand the lack of presentation and discussion of enough examples concerning cultural policies at the city scale was noteworthy However the quest of the young ones working in these disciplines for new concepts and different methodological approaches was extremely clear

The Publishers Weekly ,1926 Scientific Freedom Donald W. Braben,2020-09-10 A radical and timely proposal for reinvigorating transformative scientific discovery So rich was the scientific harvest of the early 20th century that it transformed entire industries and economies Max Planck laid the foundation for quantum physics Barbara McClintock for modern genetics Linus Pauling for chemistry the list goes on In the 1970s the nature of scientific work started to change Increases in public funding for scientific research brought demands that spending be justified a system of peer review that selected only the research proposals promising the greatest returns and a push for endless short term miracles instead of in depth boundary pushing research A vicious spiral of decline began In Scientific Freedom Donald W Braben presents a framework to find and support cutting edge much needed scientific innovation Braben who led British Petroleum s Venture Research initiative which aimed to identify and aid researchers challenging current scientific thinking explains The conditions that catalyzed scientific research in the early 20th century The costs to society of our current research model The changing role of the university as a research institution How BP s Venture Research initiative succeeded by minimizing

bureaucracy and peer review and the program's impact The selection budget and organizational criteria for implementing a Venture Research program today Even in the earliest stages transformative and groundbreaking research can look unrecognizable to those who are accustomed to the patterns established by the past Support for this research can in fact be low risk and offer rich rewards but it requires rethinking the processes used to discover and sponsor scientists with groundbreaking ideas and then giving those innovators the freedom to explore First published in 2008 this new edition of Scientific Freedom includes over 30 redesigned charts and figures and a new foreword by Donald Braben **AEC**

Authorizing Legislation, Fiscal Year 1965 United States. Congress. Joint Committee on Atomic Energy. Subcommittee on Legislation, 1964 **Another Science is Possible** Isabelle Stengers, 2018-01-16 Like fast food fast science is quickly prepared not particularly good and it clogs up the system Efforts to tackle our most pressing issues have been stymied by conflict within the scientific community and mixed messages symptomatic of a rushed approach What is more scientific research is being shaped by the bubbles and crashes associated with economic speculation and the market A focus on conformism competitiveness opportunism and flexibility has made it extremely difficult to present cases of failure to the public for fear that it will lose confidence in science altogether In this bold new book distinguished philosopher Isabelle Stengers shows that research is deeply intertwined with broader social interests which means that science cannot race ahead in isolation but must learn instead to slow down Stengers offers a path to an alternative science arguing that researchers should stop seeing themselves as the thinking rational brain of humanity and refuse to allow their expertise to be used to shut down the concerns of the public or to spread the belief that scientific progress is inevitable and will resolve all of society's problems Rather science must engage openly and honestly with an intelligent public and be clear about the kind of knowledge it is capable of producing This timely and accessible book will be of great interest to students scholars and policymakers in a wide range of fields as well anyone concerned with the role of science and its future **Young Scientist**
