ABSTRACT

Computations in most music retrieval systems strongly depend on the size of data compared. We propose to enhance performances of a music retrieval system, namely a harmonic similarity evaluation method, by first indexing relevant parts of music pieces. The indexing algorithm represents each audio piece exclusively by its major repetition, using harmonic descriptions and string matching techniques. Evaluations are performed in the context of a state-of-the-art retrieval method, namely cover songs identification, and results highlight the success of our indexing system in keeping similar results while yielding a substantial gain in computation time.

Categories and Subject Descriptors

H.3.1 [Information Storage and Retrieval]: Content Analysis and Indexing—*Indexing methods*

General Terms

Algorithms, Performance, Experimentation

1. INTRODUCTION

With the growing presence of large collections of musical content, methods for facilitating efficient browsing become more and more useful. The research field of Music Information Retrieval (MIR) aims at analysing and comparing music pieces on musical criteria, such as harmony, timbre, rhythm etc. Most MIR comparison systems are based on a common scheme to estimate similarity on audio material. One or several audio features are chosen and computed on signals segmented in small parts, or frames, thus providing feature sequences representing pieces. For instance, harmonic information is often used since it provides a good insight of the architecture of music pieces. Then, adapted algorithms, such as dynamic time warping or alignment techniques, are used to yield similarity scores between sequences. However, algorithms involved in such retrieval systems highly depend on the length of representative sequences. Harmonic sequences, for instance, are usually relatively long and induce a high computational cost to be compared. Hence, many works over the last decades focused on the detection of the most salient parts in musical sequences in order to speed-up music retrieval and analysis (see for instance [8]).

In this study, we propose to reduce the size of musical sequences by selecting relevant parts in order to index data involved in retrieval tasks. Our indexing method uses harmonic representations analysed by string matching techniques to isolate specific parts. Then, our indexing process is evaluated in the context of harmonic similarity from a data reduction step preliminary to cover song identification.

2. INDEXING PROCESS

Audio pieces are represented by sequences using *Harmonic Pitch Class Profiles* (HPCP) [1], frequently used to describe harmonic information. The aim of the indexing step is to extract a specific part in each audio piece, namely the *major repetition*, that can roughly be described as the longest repeated part perceived in a piece. In western popular music, for instance, this repetition classically consists in the concatenation of a verse and a chorus. The motivation of such a selection is to reduce the audio representation to a summarized, less redundant version, that remains relevant to characterize properly the music piece. To isolate relevant parts, each harmonic sequence is analysed using string matching techniques by considering each HPCP feature as a symbol. We consider the polynomial algorithm proposed by Karman et al. [2], that mainly relies on a local alignment algorithm [5] to detect approximate repetitions. In order to evaluate the alignment score of approximate repetitions, the latter technique requires scores for substituting each feature by another one and gap penalties. These scores are determined according to the *Optimal Transposition Index* (OTI) method [4], which ensures a higher robustness to musical variations. The Pearson correlation coefficient is used as a similarity measure for OTI evaluations. For a detailed description of the indexing process, please refer to [3].

3. HARMONIC SIMILARITY

The above process is evaluated as an indexing step for music retrieval, more specifically on harmonic content. One way to evaluate harmonic similarity retrieval systems is to identify cover songs, i.e., every new recording, performance, or rendition of a previously recorded musical piece. In cover songs datasets, music pieces are divided into several classes, each one containing all the different covers of a track. Harmonic baselines of cover songs of a same piece are likely to remain very similar, even in presence of strong musical variations. For our experiments, we focus on a robust cover song identification method, proposed by Serra et al. [4], and we compare its performances with and without the major repetition indexing step.

Research And Development In Information Retrieval

Ayse Goker, John Davies

Research And Development In Information Retrieval:

Information Retrieval Technology Gary Geunbae Lee,Dawei Song,Chin-Yew Lin,Akiko Aizawa,Kazuko Kuriyama,Masaharu Yoshioka,Tetsuya Sakai,2009-09-29 This book constitutes the refereed proceedings of the 5th Asia Information Retrieval Symposium AIRS 2009 held in Sapporo Japan in October 2009 The 18 revised full papers and 20 revised poster papers presented were carefully reviewed and selected from 82 submissions All current aspects of information retrieval in theory and practice are addressed working with text audio image video and multimedia data SIGIR '19 ,2019

Advances in Information Retrieval Theory Giambattista Amati,Fabio Crestani,2011-09-01 This book constitutes the refereed proceedings of the Third International Conference on the Theory of Information Retrieval ICTIR 2011 held in Bertinoro Italy in September 2011 The 25 revised full papers and 13 short papers presented together with the abstracts of two invited talks were carefully reviewed and selected from 65 submissions The papers cover topics ranging from query expansion co occurrence analysis user and interactive modelling system performance prediction and comparison and probabilistic approaches for ranking and modelling IR to topics related to interdisciplinary approaches or applications They are organized into the following topical sections predicting query performance latent semantic analysis and word co occurrence analysis query expansion and re ranking comparison of information retrieval systems and approximate search probability ranking principle and alternatives interdisciplinary approaches user and relevance result diversification and query disambiguation and logical operators and descriptive approaches A Feature-Centric View of Information Retrieval Donald Metzler,2011-09-18 Commercial Web search engines such as Google Yahoo and Bing are used every day by millions of people across the globe With their ever growing refinement and usage it has become increasingly difficult for academic researchers to keep up with the collection sizes and other critical research issues related to Web search which has created a divide between the information retrieval research being done within academia and industry Such large collections pose a new set of challenges for information retrieval researchers In this work Metzler describes highly effective information retrieval models for both smaller classical data sets and larger Web collections In a shift away from heuristic hand tuned ranking functions and complex probabilistic models he presents feature based retrieval models The Markov random field model he details goes beyond the traditional yet ill suited bag of words assumption in two ways First the model can easily exploit various types of dependencies that exist between query terms eliminating the term independence assumption that often accompanies bag of words models Second arbitrary textual or non textual features can be used within the model As he shows combining term dependencies and arbitrary features results in a very robust powerful retrieval model In addition he describes several extensions such as an automatic feature selection algorithm and a query expansion framework The resulting model and extensions provide a flexible framework for highly effective retrieval across a wide range of tasks and data sets A Feature Centric View of Information Retrieval provides graduate students as well as academic and industrial

researchers in the fields of information retrieval and Web search with a modern perspective on information retrieval modeling and Web searches Advances in Information Retrieval Theory Leif Azzopardi, Gabriella Kazai, Stephen Robertson, Stefan Rüger, Milad Shokouhi, Dawei Song, Emine Yilmaz, 2009-09-03 This book constitutes the refereed proceedings of the Second International Conference on the Theory of Information Retrieval ICTIR 2009 held in Cambridge UK in September 2009 The 18 revised full papers 14 short papers and 11 posters presented together with one invited talk were carefully reviewed and selected from 82 submissions The papers are categorized into four main themes novel IR models evaluation efficiency and new perspectives in IR Twenty one papers fall into the general theme of novel IR models ranging from various retrieval models query and term selection models Web IR models developments in novelty and diversity to the modeling of user aspects There are four papers on new evaluation methodologies e g modeling score distributions evaluation over sessions and an axiomatic framework for XML retrieval evaluation Three papers focus on the issue of efficiency and offer solutions to improve the tractability of PageRank data cleansing practices for training classifiers and approximate search for distributed IR Finally four papers look into new perspectives of IR and shed light on some new emerging areas of interest such as the application and adoption of quantum theory in IR Proceedings of the 43rd International ACM SIGIR Conference on Research and Development in Information Retrieval Jimmy Huang, 2020 Advances in Information Retrieval W. Bruce Croft, 2006-04-11 The Center for Intelligent Information Retrieval CIIR was formed in the Computer Science Department of the University of Massachusetts Amherst in 1992 The core support for the Center came from a National Science Foundation State Industry University Cooperative Research Center S IUCRC grant although there had been a sizeable information retrieval IR research group for over 10 years prior to that grant The basic goal of these Centers is to combine basic research applied research and technology transfer The CIIR has been successful in each of these areas in that it has produced over 270 research papers has been involved in many successful government and industry collaborations and has had a significant role in high visibility Internet sites and start ups As a result of these efforts the CIIR has become known internationally as one of the leading research groups in the area of information retrieval The CIIR focuses on research that results in more effective and efficient access and discovery in large heterogeneous distributed text and multimedia databases The scope of the work that is done in the CIIR is broad and goes significantly beyond traditional areas of information retrieval such as retrieval models cross lingual search and automatic query expansion The research includes both low level systems issues such as the design of protocols and architectures for distributed search as well as more human centered topics such as user interface design visualization and data mining with text and multimedia retrieval *Information Retrieval Evaluation in a Changing World* Nicola Ferro, Carol Peters, 2019-08-13 This volume celebrates the twentieth anniversary of CLEF the Cross Language Evaluation Forum for the first ten years and the Conference and Labs of the Evaluation Forum since and traces its evolution over these first two decades CLEF's main mission is to promote research innovation and development of

information retrieval IR systems by anticipating trends in information management in order to stimulate advances in the field of IR system experimentation and evaluation The book is divided into six parts Parts I and II provide background and context with the first part explaining what is meant by experimental evaluation and the underlying theory and describing how this has been interpreted in CLEF and in other internationally recognized evaluation initiatives Part II presents research architectures and infrastructures that have been developed to manage experimental data and to provide evaluation services in CLEF and elsewhere Parts III IV and V represent the core of the book presenting some of the most significant evaluation activities in CLEF ranging from the early multilingual text processing exercises to the later more sophisticated experiments on multimodal collections in diverse genres and media In all cases the focus is not only on describing what has been achieved but above all on what has been learnt The final part examines the impact CLEF has had on the research world and discusses current and future challenges both academic and industrial including the relevance of IR benchmarking in industrial settings Mainly intended for researchers in academia and industry it also offers useful insights and tips for practitioners in industry working on the evaluation and performance issues of IR tools and graduate students specializing in information retrieval

Advances in Information Retrieval Claudia Hauff, Craig Macdonald, Dietmar Jannach, Gabriella Kazai, Franco Maria Nardini, Fabio Pinelli, Fabrizio Silvestri, Nicola Tonellotto, 2025-04-02 The five volume set LNCS 15572 15573 15574 15575 and 15576 constitutes the refereed conference proceedings of the 47th European Conference on Information Retrieval ECIR 2025 held in Lucca Italy during April 6 10 2025 The 52 full papers 11 findings 42 short papers and 76 papers of other types presented in these proceedings were carefully reviewed and selected from 530 submissions The accepted papers cover the state of the art in information retrieval and recommender systems user aspects system and foundational aspects artificial intelligence and machine learning applications evaluation new social and technical challenges and other topics of direct or indirect relevance to search and recommendation **Information Retrieval Technology** Hwee Tou Ng, 2006-10-06 This book constitutes the refereed proceedings of the Third Asia Information Retrieval Symposium AIRS 2006 The book presents 34 revised full papers and 24 revised poster papers All current issues in information retrieval are addressed applications systems technologies and theoretical aspects of information retrieval in text audio image video and multi media data The papers are organized in topical sections on text retrieval search and extraction text classification and indexing and more

Advances in Information Retrieval Nazli Goharian, Nicola Tonellotto, Yulan He, Aldo Lipani, Graham McDonald, Craig Macdonald, Iadh Ounis, 2024-03-22 The six volume set LNCS 14608 14609 14609 14610 14611 14612 and 14613 constitutes the refereed proceedings of the 46th European Conference on IR Research ECIR 2024 held in Glasgow UK during March 24 28 2024 The 57 full papers 18 finding papers 36 short papers 26 IR4Good papers 18 demonstration papers 9 reproducibility papers 8 doctoral consortium papers and 15 invited CLEF papers were carefully reviewed and selected from 578 submissions The accepted papers cover the state of the art in information retrieval focusing on user aspects system and foundational

aspects machine learning applications evaluation new social and technical challenges and other topics of direct or indirect relevance to search

Readings in Information Retrieval Karen Sparck Jones, Peter Willett, 1997 This compilation of original papers on information retrieval presents an overview covering both general theory and specific methods of the development and current status of information retrieval systems Each chapter contains several papers carefully chosen to represent substantive research work that has been carried out in that area each is preceded by an introductory overview and followed by supported references for further reading

ACM SIGIR Conference on Research and Development in Information Retrieval, 2004

Learning to Rank for Information Retrieval Tie-Yan Liu, 2011-04-29 Due to the fast growth of the Web and the difficulties in finding desired information efficient and effective information retrieval systems have become more important than ever and the search engine has become an essential tool for many people The ranker a central component in every search engine is responsible for the matching between processed queries and indexed documents Because of its central role great attention has been paid to the research and development of ranking technologies In addition ranking is also pivotal for many other information retrieval applications such as collaborative filtering definition ranking question answering multimedia retrieval text summarization and online advertisement Leveraging machine learning technologies in the ranking process has led to innovative and more effective ranking models and eventually to a completely new research area called learning to rank Liu first gives a comprehensive review of the major approaches to learning to rank For each approach he presents the basic framework with example algorithms and he discusses its advantages and disadvantages He continues with some recent advances in learning to rank that cannot be simply categorized into the three major approaches these include relational ranking query dependent ranking transfer ranking and semisupervised ranking His presentation is completed by several examples that apply these technologies to solve real information retrieval problems and by theoretical discussions on guarantees for ranking performance This book is written for researchers and graduate students in both information retrieval and machine learning They will find here the only comprehensive description of the state of the art in a field that has driven the recent advances in search engine development

Charting a New Course: Natural Language Processing and Information Retrieval, John I. Tait, 2005-08-01 Karen Sparck Jones is one of the major figures of 20th century and early 21st Century computing and information processing Her ideas have had an important influence on the development of Internet Search Engines Her contribution has been recognized by awards from the natural language processing information retrieval and artificial intelligence communities including being asked to present the prestigious Grace Hopper lecture She continues to be an active and influential researcher Her contribution to the scientific evaluation of the effectiveness of such computer systems has been quite outstanding This book celebrates the life and work of Karen Sparck Jones in her seventieth year It consists of fifteen new and original chapters written by leading international authorities reviewing the state of the art and her influence in the areas in which Karen Sparck Jones has been active Although she has a

publication record which goes back over forty years it is clear even the very early work reviewed in the book can be read with profit by those working on recent developments in information processing like bioinformatics and the semantic web

Evaluation of Multilingual and Multi-modal Information Retrieval Cross-Language Evaluation Forum.

Workshop, Carol Peters, 2007-09-06 This book constitutes the thoroughly refereed postproceedings of the 7th Workshop of the Cross Language Evaluation Forum CLEF 2006 held in Alicante Spain September 2006 The revised papers presented together with an introduction were carefully reviewed and selected for inclusion in the book The papers are organized in topical sections on Multilingual Textual Document Retrieval Domain Specific Information Retrieval i CLEF QA CLEF ImageCLEF CLSR WebCLEF and GeoCLEF

Information Retrieval Ayse Goker, John Davies, 2009-12-15 This book is an essential reference to cutting edge issues and future directions in information retrieval Information retrieval IR can be defined as the process of representing managing searching retrieving and presenting information Good IR involves understanding information needs and interests developing an effective search technique system presentation distribution and delivery The increased use of the Web and wider availability of information in this environment led to the development of Web search engines This change has brought fresh challenges to a wider variety of users needs tasks and types of information Today search engines are seen in enterprises on laptops in individual websites in library catalogues and elsewhere Information Retrieval Searching in the 21st Century focuses on core concepts and current trends in the field This book focuses on Information Retrieval Models User centred Evaluation of Information Retrieval Systems Multimedia Resource Discovery Image Users Needs and Searching Behaviour Web Information Retrieval Mobile Search Context and Information Retrieval Text Categorisation and Genre in Information Retrieval Semantic Search The Role of Natural Language Processing in Information Retrieval Search for Meaning and Structure Cross language Information Retrieval Performance Issues in Parallel Computing for Information Retrieval This book is an invaluable reference for graduate students on IR courses or courses in related disciplines e g computer science information science human computer interaction and knowledge management academic and industrial researchers and industrial personnel tracking information search technology developments to understand the business implications Intermediate advanced level undergraduate students on IR or related courses will also find this text insightful Chapters are supplemented with exercises to stimulate further thinking

Semantic-Based Visual Information Retrieval Zhang, Yu-Jin, 2006-11-30 This book presents state of the art advancements and developments in the field and also brings a selection of techniques and algorithms about semantic based visual information retrieval It covers many critical issues such as multi level representation and description scene understanding semantic modeling image and video annotation human computer interaction and more Provided by publisher

A Behavioral Economics Approach to Interactive Information Retrieval Jiqun Liu, 2023-02-17 This book brings together the insights from three different areas Information Seeking and Retrieval Cognitive Psychology and Behavioral Economics and shows how this new interdisciplinary

approach can advance our knowledge about users interacting with diverse search systems especially their seemingly irrational decisions and anomalies that could not be predicted by most normative models The first part Foundation of this book introduces the general notions and fundamentals of this new approach as well as the main concepts terminology and theories The second part Beyond Rational Agents describes the systematic biases and cognitive limits confirmed by behavioral experiments of varying types and explains in detail how they contradict the assumptions and predictions of formal models in information retrieval IR The third part Toward A Behavioral Economics Approach first synthesizes the findings from existing preliminary research on bounded rationality and behavioral economics modeling in information seeking retrieval and recommender system communities Then it discusses the implications open questions and methodological challenges of applying the behavioral economics framework to different sub areas of IR research and practices such as modeling users and search sessions developing unbiased learning to rank and adaptive recommendations algorithms implementing bias aware intelligent task support as well as extending the conceptualization and evaluation on IR fairness accountability transparency and ethics FATE with the knowledge regarding both human biases and algorithmic biases This book introduces a behavioral economics framework to IR scientists seeking a new perspective on both fundamental and new emerging problems of IR as well as the development and evaluation of bias aware intelligent information systems It is especially intended for researchers working on IR and human information interaction who want to learn about the potential offered by behavioral economics in their own research areas

Proceedings of the 44th International ACM SIGIR Conference on Research and Development in Information Retrieval Fernando Diaz,2021

If you ally need such a referred **Research And Development In Information Retrieval** book that will meet the expense of you worth, acquire the no question best seller from us currently from several preferred authors. If you desire to witty books, lots of novels, tale, jokes, and more fictions collections are afterward launched, from best seller to one of the most current released.

You may not be perplexed to enjoy every books collections Research And Development In Information Retrieval that we will extremely offer. It is not regarding the costs. Its practically what you compulsion currently. This Research And Development In Information Retrieval, as one of the most dynamic sellers here will extremely be in the midst of the best options to review.

Research And Development In Information Retrieval Introduction

In the digital age, access to information has become easier than ever before. The ability to download Research And Development In Information Retrieval has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Research And Development In Information Retrieval has opened up a world of possibilities. Downloading Research And Development In Information Retrieval provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Research And Development In Information Retrieval has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Research And Development In Information Retrieval. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Research And Development In Information Retrieval. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Research And Development In Information Retrieval, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected

websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Research And Development In Information Retrieval has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.

FAQs About Research And Development In Information Retrieval Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer webbased readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Research And Development In Information Retrieval is one of the best book in our library for free trial. We provide copy of Research And Development In Information Retrieval in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Research And Development In Information Retrieval. Where to download Research And Development In Information Retrieval online for free? Are you looking for Research And Development In Information Retrieval PDF? This is definitely going to save you time and cash in something you should think about. If you trying to find then search around for online. Without a doubt there are numerous these available and many of them have the freedom. However without doubt you receive whatever you purchase. An alternate way to get ideas is always to check another Research And Development In Information Retrieval. This method for see exactly what may be included and adopt these ideas to your book. This site will almost certainly help you save time and effort, money and stress. If you are looking for free books then you really should consider finding to assist you try this. Several of Research And Development In Information Retrieval are for sale to free while some are payable. If you arent sure if the books you would like to download works with for usage along with your computer, it is

possible to download free trials. The free guides make it easy for someone to free access online library for download books to your device. You can get free download on free trial for lots of books categories. Our library is the biggest of these that have literally hundreds of thousands of different products categories represented. You will also see that there are specific sites catered to different product types or categories, brands or niches related with Research And Development In Information Retrieval. So depending on what exactly you are searching, you will be able to choose e books to suit your own need. Need to access completely for Campbell Biology Seventh Edition book? Access Ebook without any digging. And by having access to our ebook online or by storing it on your computer, you have convenient answers with Research And Development In Information Retrieval To get started finding Research And Development In Information Retrieval, you are right to find our website which has a comprehensive collection of books online. Our library is the biggest of these that have literally hundreds of thousands of different products represented. You will also see that there are specific sites catered to different categories or niches related with Research And Development In Information Retrieval So depending on what exactly you are searching, you will be able to choose ebook to suit your own need. Thank you for reading Research And Development In Information Retrieval. Maybe you have knowledge that, people have search numerous times for their favorite readings like this Research And Development In Information Retrieval, but end up in harmful downloads. Rather than reading a good book with a cup of coffee in the afternoon, instead they juggled with some harmful bugs inside their laptop. Research And Development In Information Retrieval is available in our book collection an online access to it is set as public so you can download it instantly. Our digital library spans in multiple locations, allowing you to get the most less latency time to download any of our books like this one. Merely said, Research And Development In Information Retrieval is universally compatible with any devices to read.
