Dolbeer,2017-09-19 Shortlisted for the 2018 TWS Wildlife Publication Awards in the edited book category The various species of new world blackbirds often intermingled in large foraging flocks and nighttime roosts collectively number in the hundreds of millions and are a dominant component of the natural and agricultural avifauna in North America today Because of their abundance conspicuous flocking behavior and feeding habits these species have often been in conflict with human endeavors The pioneering publications on blackbirds were by F E L Beal in 1900 and A A Allen in 1914 These seminal treatises laid the foundation for more than 1 000 descriptive and experimental studies on the life histories of blackbirds as well as their ecology and management in relation to agricultural damage and other conflicts such as caused by large winter roosting congregations The wealth of information generated in over a century of research is found in disparate outlets that include government reports conference proceedings peer reviewed journals monographs and books For the first time Ecology and Management of Blackbirds Icteridae in North America summarizes and synthesizes this vast body of information on the biology and life histories of blackbirds and their conflicts with humans into a single volume for researchers wildlife managers agriculturists disease biologists ornithologists policy makers and the public The book reviews the life histories of red winged blackbirds yellow headed blackbirds common grackles and brown headed cowbirds It provides in depth coverage of the functional roles of blackbirds in natural and agricultural ecosystems In doing so this authoritative reference promotes the development of improved science based integrated management strategies to address conflicts when resolutions are needed

**Sierra Nevada National Forest (N.F.), Sierra Nevada Forest Plan Amendment** ,2000      **Sierra Nevada Forest Plan Amendment** ,2004      *Avian Brood Parasitism* Manuel Soler,2018-05-02 Brood parasitism has become one of the most flourishing areas of research in evolutionary ecology and one of the best model systems for investigating coevolution This subject has undergone remarkable advances during the last two decades but has not been covered by any book in the 21st century This book offers a comprehensive and up to date overview of the fascinating field of avian brood parasitism The topics covered include conspecific brood parasitism evolution and phylogenetic history of avian brood parasites parasitic

behaviour used by brood parasites adaptations and counter adaptations of brood parasites and their hosts at every stage of the breeding cycle before laying egg chick and fledgling stages factors affecting the evolution of host defences and parasitic attacks the role of phenotypic plasticity in host defences mechanisms driving egg recognition and rejection evolution of nest sharing or nest killing by brood parasite chicks begging behaviour in parasitized nests and food delivery by host adults and recognition of conspecifics by juvenile brood parasites This volume provides a comprehensive reference resource for readers and researchers with an interest in birds behaviour and evolution as well as a source of hypotheses and predictions for future investigations into this dynamic subject

**Habitat Fragmentation and Landscape Change** David B. Lindenmayer,Joern Fischer,2013-02-22 Habitat loss and degradation that comes as a result of human activity is the single biggest threat to biodiversity in the world today Habitat Fragmentation and Landscape Change is a groundbreaking work that brings together a wealth of information from a wide range of sources to define the ecological problems caused by landscape change and to highlight the relationships among landscape change habitat fragmentation and biodiversity conservation The book synthesizes a large body of information from the scientific literature considers key theoretical principles for examining and predicting effects examines the range of effects that can arise explores ways of mitigating impacts reviews approaches to studying the problem discusses knowledge gaps and future areas for research and management Habitat Fragmentation and Landscape Change offers a unique mix of theoretical and practical information outlining general principles and approaches and illustrating those principles with case studies from around the world It represents a definitive overview and synthesis on the full range of topics that fall under the widely used but often vaguely defined term habitat fragmentation

**Birds of the Salton Sea** Michael A. Patten,Guy McCaskie,Philip Unitt,2003-08-19 The Salton Sea California s largest inland lake supports a huge bird population that is among the most concentrated and most diverse in the world Sadly this environment is close to collapse from several environmental threats This book describes the more than 450 species and sub species

**Emerging Avian Disease** Ellen Paul,2012-05-02 In this volume new human disease pandemics arising from animals stimulated by ongoing environmental change demonstrate the value of ornithological research into avian diseases A group of 29 researchers addresses a diverse set of topics including the evolutionary and ecological aspects of the host vector systems the effects of genetic variation introduction success and vector ecology evolution of resistance and virulence of pathogens and the effects of changing geographic distributions In addition to empirical studies under field conditions the authors present predictive models to assess the movement and potential impact of these diseases Other chapters delve into the potential impacts of pathogens and the key role of biosurveillance and documenting impacts of disease on bird populations

**Boreal Birds of North America** Jeffrey V. Wells,2011-11-15 A wonderful book that highlights the globally unique and important boreal forest ecoregion from an avian perspective with fresh twists Your ideas about where those migrant and wintering birds in your backyards have come from will be forever changed after you read this Gordon Orians Professor Emeritus of

Biology University of Washington One of the planet's most amazing spectacles is the seasonal ebb and flow of migrants from the boreal forests to warmer winter quarters with stopovers in our neighborhoods in between This book tells you how connected the world is and what's at risk if we damage any part of it Stuart Pimm Doris Duke Professor of Conservation Ecology Duke University winner of the 2006 Dr A H Heineken Prize This diverse set of contributions about birds that nest in and migrate to and from North America's boreal forest demonstrates the remarkable interconnectedness of ecosystems across the hemispheres and the incredible responsibility we face to protect them Bridget Stutchbury York University author of *Silence of the Songbirds* and *The Private Lives of Birds* The fact that billions of birds breed in North America's boreal forest is amazing enough but this assemblage is even more remarkable when understood as playing completely different major ecological roles across the temperate and tropical Americas during the northern winter This book definitely will broaden your thinking about ecological connections across the hemisphere and the global scale phenomenon that crosses our skies twice each year John W Fitzpatrick Louis Agassiz Fuertes Director Cornell Lab of Ornithology

**Arctic Shorebirds in North America** Jonathan Robert Bart, Victoria Helen Johnston, 2012-08-02 i Arctic Shorebirds in North America i represents a study that is one of the remarkable achievements of wildlife fieldcraft like those done by Aldo Leopold in the 1930s and by the Craighead Brothers in the 1960s To conduct a study of this scientific caliber in the great expanse and harsh climate of the Arctic makes it one of the great wildlife investigations whose value will only grow with time Larry Niles Conserve Wildlife Foundation of New Jersey It is most timely that Jonathan Bart and Victoria Johnston have gathered information on shorebirds that breed in the Arctic regions of North America Data on these birds is generated at a wide range of locations by many different individuals and teams and this book puts it into perspective It is particularly valuable to have this treatise when so many shorebird species worldwide are in marked decline Clive Minton Australasian Wader Studies Group When the PRISM program for pan Arctic shorebird monitoring was introduced everyone agreed with its laudable aims but it seemed impractical How could shorebird biologists

with limited time and resources acquire robust data on the size and trend of shorebird populations across the American Arctic Now the credibility gap has been bridged i Arctic Shorebirds in North America i presents the rigorous practical methods that will be the foundation of Arctic shorebird monitoring for years to come I look forward to Arctic PRISM becoming the keystone of shorebird conservation in the Western Hemisphere Humphrey Sitters editor of i Wader Study Group Bulletin i      *USGS Patuxent Wildlife Research Center* ,1999      **Conservation and Biology of Small Populations** James N. M. Smith,2006 This book explores the factors affecting the survival of small populations As the human impact on Earth expands populations of many wild species are being squeezed into smaller and smaller habitats As a consequence they face an increasing threat of extinction The authors review these theoretical ideas the existing data and explore the question how well do small and isolated populations actually perform
