Resources in Education, 2000 [Encyclopedia of Educational Reform and Dissent](#) Thomas C. Hunt, 2010-01-20 The history of American education is replete with educational reform and to a lesser extent educational dissent Consider the present you have various forms of privatization school choice the No Child Left Behind act home schooling value added accountability alternative teacher preparation programs on line instruction etc This range of activity is not exceptional For instance consider the past progressive education open education the junior high school the middle school Life Adjustment education career education vocational education the comprehensive high school school to work year round schooling behavioral objectives proficiency exams high stakes testing whole language learning packages and self paced instruction

modular scheduling site based management all presented as the way to reform American schools at least in part Then you have the reformers themselves such as John Dewey George Counts Herbert Kohl John Holt Charles Silberman Admiral Hyman Rickover James Bryant Conant all the way back to Horace Mann himself Dissenters and dissenting movements while not as numerous and certainly not as well known in educational circles count the various faith based schools and individuals such as Archbishop Hughes of New York Clearly this is an area rich in ideas rife with controversy and vital in its outcome for individuals and the nation as a whole And yet strangely enough there exists no major encyclopedia bringing the varied strands together in one place as a ready reference for scholars teachers school administrators and students studying to enter the educational profession This two volume work is intended to be that authoritative resource Key themes and topics include biographies of reformers and dissenters theoretical and ideological perspectives key programs and legislation judicial verdicts impacting educational change in America the politics and processes of educational reform and policy making dissent and resistance to reform technology s impact on educational reform A Reader s Guide in the front matter groups entries around such themes to help readers find related entries more easily *Theoretical Models and Processes of Literacy* Donna E. Alvermann, Norman J. Unrau, Misty Sailors, Robert B. Ruddell, 2018-10-03 The Seventh Edition of this foundational text represents the most comprehensive source available for connecting multiple and diverse theories to literacy research broadly defined and features both cutting edge and classic contributions from top scholars Two decades into the 21st century the Seventh Edition finds itself at a crossroads and differs from its predecessors in three major ways the more encompassing term literacy replaces reading in the title to reflect sweeping changes in how readers and writers communicate in a digital era the focus is on conceptual essays rather than a mix of essays and research reports in earlier volumes and most notably contemporary literacy models and processes enhance and extend earlier theories of reading and writing Providing a tapestry of models and theories that have informed literacy research and instruction over the years this volume s strong historical grounding serves as a springboard from which new perspectives are presented The chapters in this volume have been selected to inspire the interrogation of literacy theory and to foster its further evolution This edition is a landmark volume in which dynamic dialogic and generative relations of power speak directly to the present generation of literacy theorists and researchers without losing the historical contexts that preceded them Some additional archival essays from previous editions are available on the book s eResource New to the Seventh Edition Features chapters on emerging and contemporary theories that connect directly to issues of power and contrasts new models against more established counterparts New chapters reflect sweeping changes in how readers and writers communicate in a digital era Slimmer volume is complemented by some chapters from previous editions available online **The Reading Race** Donna Awatere Huata, 2002 Author exposes the inadequacy of the present system of teaching reading in New Zealand schools and proposes a clear effective solution using systematic phonics *Essentials of Assessing, Preventing, and Overcoming Reading Difficulties* David A.
