the importance of the role of the teacher in mediating this practice With insights taken from a comprehensive set of transcripts taken from actual classrooms the volume focuses on the convention in native tongue literary study in which teachers and students read a novel shared over lessons combining periods of reading aloud with those of questioning and discussion In so doing Gordon seeks to extend existing methodologies from literary and social science research toward informing teaching practice in literary pedagogy and address the need for a theorization of literary pedagogy which considers the interrelationship between text in print and text through talk Transcripts are supported with comprehensive analyses to help further explicate the research methodology and provide guidance on implementing it in the classroom This book is a valuable resource for scholars in language and education literary studies narrative inquiry and education research

Leland, Mitzi Lewison, Jerome C. Harste, 2017-11-03 Inviting multiple ways of critically engaging with literature this text offers

a fresh perspective on how to integrate children's literature into and across the curriculum in effective purposeful ways. Structured around three mantras that build on each other: Enjoy, Dig deeply, Take action, the book is rich with real examples of teachers implementing critical pedagogy. The materials and practical strategies focus on issues that impact children's lives: building from students' personal experiences and cultural knowledge to using language to question the everyday world; analyze popular culture and media; understand how power relationships are socially constructed; and consider actions that can be taken to promote social justice. Written for teachers and teacher educators, each chapter opens with three elements that are closely linked: classroom vignettes showcasing the use of literature and inviting conversation; three key principles elaborating the main theme of the chapter and connecting theory with practice and related research on the topics and their importance for curriculum; Other chapter features include key issues in implementation; suggestions for working with linguistically and culturally diverse students; alternative approaches to assessment; and suggestions for further reading. A companion website to enrich and extend the text includes an annotated bibliography of literature selections; suggested text sets; resources by chapter; and ideas for professional development. Changes in the Second Edition: Voices from the Field vignettes include examples from inspiring educators who use trade books to promote critical thinking and diversity. Updated chapters include information on new technology and electronic resources. New references in the principles sections and new resources for further study. New children's books added throughout the chapters as well as to the companion website.

Towards a Critical Sociology of Reading Pedagogy Carolyn D. Baker, Allan Luke, 1991-01-01 Through critical sociological appraisals of literary theory, research and pedagogy, this volume presents challenges to dominant psychological approaches in reading research and to mainstream discourses about reading and writing pedagogy. Bringing together the recent work of literacy researchers in Australia, Europe and North America, the volume offers novel critiques and theorizations from within political economy, neomarxist and critical theory, ethnomethodology, interactive sociolinguistics, poststructuralism and postmodernism. The volume is arranged in four sections: The Politics of Pedagogy; Reading in Classrooms; Reconstructing Theory; Reading the Social. This collection is provocative and innovative, offering clear alternatives for conceptualizing literacy for conducting literacy research and for reconstructing the discourses and practices of reading and writing in schools. The volume is addressed to a broad audience of researchers, educators and students.
