Social Aspects of Crime in England between the Wars Hermann Mannheim, 2019-03-11 Originally published in 1940 This ground breaking work formed the foundation for modern criminology becoming an academic discipline within UK sociological studies It concerns the history of crime its causes and treatment in England during the preceding twenty five years or so Mannheim through this and later studies went on to found the criminology department at LSE The book offers an evaluation of the criminological implications of the War and early post War period as well as an examination of the practical working of the new penal machinery built up by the Reform Acts passed just prior to the War The author produced a scientific account of the post War state of crime beginning with a critical examination of the structure and interpretation of English Criminal Statistics followed by a survey of the principal criminological features of the period between the two Wars Significant aspects are dealt with in a separate chapters four devoted to problems of work and leisure Unemployment and Strikes Business Administration Alcoholism and Gambling four others to those of certain specific sections of the population Juvenile Delinquency Female Delinquency and Prostitution Recidivism This is a fascinating read for both the historian and the criminologist

An All-Consuming Century Gary Cross, 2000-09-14 The unqualified victory of consumerism in America was not a foregone conclusion The United States has traditionally been the home of the most aggressive and often thoughtful criticism of consumption including Puritanism Prohibition the simplicity movement the 60s hippies and the consumer rights movement But at the dawn of the twenty first century not only has American consumerism triumphed there isn t even an ism left to challenge it An All Consuming Century is a rich history of how market goods came to dominate American life over that remarkable hundred years between 1900 and 2000 and why for the first time in history there are no practical limits to consumerism By 1930 a distinct consumer society had emerged in the United States in which the taste speed control and comfort of goods offered new meanings of freedom thus laying the groundwork for a full scale ideology of consumer s democracy after World War II From the introduction of Henry Ford s Model T so low in price that no man making a good salary will be unable to own one and the innovations in selling that arrived with the department store window displays self service the installment plan to the development of new arenas for spending amusement parks penny arcades baseball parks and dance halls Americans embraced the new culture of commercialism with reservations However Gary Cross shows that even the Depression the counterculture of the 1960s and the inflation of the 1970s made Americans more materialistic opening new channels of desire and offering opportunities for more innovative and aggressive marketing The conservative upsurge of the 1980s and 90s indulged in its own brand of self aggrandizement by promoting unrestricted markets The consumerism of today thriving and largely unchecked no longer brings families and communities together instead it increasingly divides and isolates Americans Consumer culture has provided affluent societies with peaceful alternatives to tribalism and class war Cross writes and it has fueled extraordinary economic growth The challenge for the future is to find

ways to revive the still valid portion of the culture of constraint and control the overpowering success of the all consuming twentieth century **Research Memorandum on Social Aspects of Relief Policies in the Depression** Reuel Clyde White, Mary K. sharing insights for research decisions arising from that experience Readers will develop the skills to create solid research questions perform literature reviews identify appropriate data sources and methods conduct research analyze and interpret data and translate the resulting knowledge generated from the research process to a wider audience all core parts of the research process by developing their knowledge and creating confidence in their own decision making skills After explaining the unique and often complementary strengths of qualitative and quantitative methods students focus on what methods are best suited for finding answers to the research questions that interest them Major types of research including experiments case studies surveys quasi experiments ethnographies focus groups participatory action research and archival studies all receive significant coverage The text illustrates how these methods are enhanced by integrating them with 21st century technologies and combining them in mixed methods projects Chapters on constructing a research proposal and disseminating research bookend the process with concrete steps in between to support students designing their own original research projects Study questions at the end of each chapter encourage students to think critically about the research process and how the choices a researcher makes will broaden or constrain what they can find By the end of the text social and health science students will feel confident in undertaking ethical and thoughtful research
