Where Rivers and Mountains Sing Theodore Levin, 2010-11-15 Theodore Levin takes readers on a journey through the rich sonic world of inner Asia where the elemental energies of wind, water, and echo, the ubiquitous presence of birds and animals, and the legendary feats of heroes have inspired a remarkable art and technology of sound making among nomadic pastoralists. As performers from Tuva and other parts of inner Asia have responded to the growing worldwide popularity of their music, Levin follows them to the West, detailing their efforts to nourish global connections while preserving the power and poignancy of their music traditions.

Hayden, United States. Army. Corps of Engineers, William Franklin Reynolds, 1869 **Mountain Rivers Revisited** Ellen

Wohl, 2013-05-28 Published by the American Geophysical Union as part of the Water Resources Monograph Series Volume 19. What are the forms and processes characteristic of mountain rivers, and how do we know them? *Mountain Rivers Revisited* is an expanded and updated version of the earlier volume *Mountain Rivers*, which answers these questions and more. Here is the only comprehensive synthesis of current knowledge about mountain rivers available. While continuing to focus on physical process and form in mountain rivers, the text also addresses the influences of tectonics, climate, and land use on rivers, as well as water chemistry, hyporheic exchange, and riparian and aquatic ecology. With its numerous illustrations and references, hydrologists, geomorphologists, civil and environmental engineers, ecologists, resource planners, and their students will find this book an essential resource. Ellen Wohl received her Ph.D. in geology in 1988 from the University of Arizona. Since then, she has worked primarily on mountain and bedrock rivers in diverse environments.

Mountain Rivers, Mountain Roads: Transport in Southwest China, 1700-1850 Nanny Kim, 2019-12-09 The commercialized economy of late imperial China depended on

efficient transport, yet transport technologies, transport economics, as well as its role in local societies and in interdependencies of environments and human activities are acutely under-researched. Nanny Kim analyses two transports

systems into the Southwest of Qing China through the long eighteenth century and up to the mid nineteenth century civil wars The case studies explore shipping on the Upper Changjiang in Sichuan and through the Three Gorges into Hubei and road transport out of the Sichuan Basin across northeastern Yunnan and northwestern Guizhou into central Yunnan Specific and concrete investigations of a river that presented extreme dangers to navigation and carriage across the crunch zone of the Himalayan Plateau provides a basis for a systematic reconstruction of transport outside the lowland centres and their convenient networks of water transport **The Exploration of the Colorado River and Its Canyons** J.
