Rob Krier On Architecture:

Rob Krier on Architecture Rob Krier, 1982 **Rob Krier on Architecture** Rob Krier, 1982-12 *Rob Krier* Rob Krier, 2021 As an architect urban planner and sculptor Rob Krier has created a multifaceted oeuvre which is presented here in a comprehensive manner for the first time After graduating Krier first worked with O M Ungers and Frei Otto before setting up his own studios in Vienna and Berlin He later taught at the Vienna University of Technology from 1976 to 1998 and as a visiting professor at Yale University in 1986 Drawing on a wealth of historical models and archetypal patterns he developed new typologies of streets and public squares as an architect and urban planner and was responsible for numerous urban development projects throughout Europe These included the perimeter block development on Ritterstrasse for the IBA in Berlin the residential complex on Breitenfurter Strasse in Vienna the Kirchsteigfeld district in Potsdam and numerous projects in the Netherlands **Rob Krier , Architectural Journal 1960-1975** Rob Krier, 2015-01-01 How does one become a recognized architect Where does the inspiration come from and how is it transformed into buildings streets and cities With his Architectural Journal Rob Krier takes the readers on a fascinating journey guiding one through pivotal moments of early stages of his career as an architect With a sense of humour empathy and charm Krier tells a story of his professional path starting with holidays spent with his grandparents images colors and smells that shaped his future choices He talks about his triumphs and stumbles giving an intimate insight into the architectural profession deprived of any pretence to eternal greatness and heroic narrative The journal encompasses 15 formative years of Krier s career starting from architectural studies in Munich through trips and temporary settlements in Luxemburg Stuttgart and Lausanne Krier s memories are accompanied by theoretical texts Here he touches upon architect s responsibilities importance of historical legacy and exhorts to boycott ugliness in the name of beauty Striving for something else than pure functionality in architecture Krier calls for poetical approach so characteristic for his work stating Poetry is in the breath of the building the aroma that exudes from all its nooks Rob Krier is one of the most influential architects and urban planners of the second half of the 20th century His theoretical writings deal with the idea of town planning informed by traditional notions of harmony civic space and community **Rob Krier** Rob Krier, Deborah Berke, Kenneth Frampton, Institute for Architecture and Urban Studies, 1982 *Rob Krier (Paper)* Rob Krier, 1993-07-29 Architectural monographs no 30 **Rob Krier , 1993 Rob Krier. Ein romantischer Rationalist. A Romantic Rationalist** Rob Krier, Ursula Kleefisch-Jobst, Ingeborg Flagge, 2005-07-25 Presented here in all its manifold aspects are over four decades of Rob Krier s work including a complete list of works **Focus: Rob Krier , 1977 Cité Judiciaire Luxembourg 1991-2008** Rob Krier, Ann Holyoke Lehmann, Dankwart Guratzsch, 2010 Text in English German Rob Krier perhaps the only urban planning artist among Germany s architects has for the first time in 30 years completed a major urban project in his home country of Luxembourg With regard to its authorship this is a true family project With the significant contribution of his brother L on to the

masterplan for the site which is situated opposite his parental home Krier has in his own words fulfilled a youthful dream Krier's son in law and office partner Christoph Kohl was involved in the execution as was his distant relation and Luxembourgian contact architect Jean Herr The concept reaches far beyond Luxembourg's borders in its significance as Krier's crew has formulated something of a manifesto for classical European urban architecture Rather than a further high rise for this European city an entire quarter has been created with public roads lanes and squares in which the various judicial departments are distributed across eight buildings The plot structure small sized units and traditional plasterwork faades with their three dimensional sculpted details all enhance the quarter's vitality as does the masterful treatment of spatial divisions This new approach is decisive in solving an ever more complex construction problem in contemporary urban planning the integration of major administration complexes into the existing make up of the city In Luxembourg the Kriers have succeeded in providing model evidence that even today this task can be achieved by means of top quality architecture without having to forfeit anything in terms of the modernity of equipment the parsimony of economical execution the reduction of energy consumption or in the basic demands of public proximity With this publication Rob Krier has created a novelty in architectural literature It is the first volume in sketchbook format of a series which document the design process from the first hand drawn sketches right through to realisation Here the entire spectrum of the creative process and its irrepressible joy for variation are revealed

Architectural Composition Rob Krier, 1988 It is my aim to rehabilitate an architecture that has become dishonoured and disgraced Rob Krier is a unique voice in today's architectural discourse through his commitment to developing a relevant and pragmatic theory of architecture based on his own experience and observations of architectural practice and opposed to the easy abstract theorising so common in contemporary architectural writing Together with his brother Leon he has perfected a form of presentation in which the potency of his thinking finds its perfect counterpoint in detailed drawings and sketches which argue his case visually through the power of example Following the success of his widely acclaimed Urban Space a work which looked at the problems of our cities from a historical theoretical and practical standpoint Krier now applies his particular highly influential mode of didactic criticism to contemporary architecture in a continuing search for fundamental architectural truths Architectural Composition is both a theoretical and visual analysis which clearly illustrates the creative process which informs Krier's vision and praxis The culmination of a lifetime's thought and experience by one of Europe's most important architectural theorists it is without doubt a major achievement and will become a standard work of reference for both students and practising architects

Figures Rob Krier, 2013 The architect is at all times also an artist How otherwise would he be able to tame the three dimensionality of space and subdue the urges of physics and structural mechanics with the creations of his fantasy This creativity is however mostly restricted purely to its own field Rob Krier born in 1938 in Grevenmacher Luxembourg is an exception Since the beginning of his career in construction he has always seen his love of art as a vocation one which he

nurtures parallel to his work In his Pictorial Journal 1972 1975 Rob Krier describes how his twin passion for fine art and architecture emerged The text is restricted to a minimum The pictures are less colourful more composed The daily scribbles dominate mainly sketches and drawings of people and animals buildings landscapes objects and drawings of people and animals buildings landscapes objects and also fantasies The volume is rounded off with a detailed r sum **The**

Architecture of Community Leon Krier,2009-05-08 Leon Krier is one of the best known and most provocative architects and urban theoreticians in the world Until now however his ideas have circulated mostly among a professional audience of architects city planners and academics In The Architecture of Community Krier has reconsidered and expanded writing from his 1998 book Architecture Choice or Fate Here he refines and updates his thinking on the making of sustainable humane and attractive villages towns and cities The book includes drawings diagrams and photographs of his built works which have not been widely seen until now **The Work** Rob Krier,2021-07-19 As an architect urban planner and sculptor Rob Krier has created a multifaceted oeuvre which is presented here in a comprehensive manner for the first time After graduating Krier first worked with O M Ungers and Frei Otto before setting up his own studios in Vienna and Berlin He later taught at the Vienna University of Technology from 1976 to 1998 and as a visiting professor at Yale University in 1986 Drawing on a wealth of historical models and archetypal patterns he developed new typologies of streets and public squares as an architect and urban planner and was responsible for numerous urban development projects throughout Europe These included the perimeter block development on Ritterstrasse for the IBA in Berlin the residential complex on Breitenfurter Strasse in Vienna the Kirchsteigfeld district in Potsdam and numerous projects in the Netherlands Elements of Architecture Rob Krier,1992

Figures Rob Krier,2013 The architect is at all times also an artist How otherwise would he be able to tame the three dimensionality of space and subdue the urges of physics and structural mechanics with the creations of his fantasy This creativity is however mostly restricted purely to its own field Rob Krier is an exception For years he has seen his love of art as a vocation one which he nurtures parallel to his work in construction Fine art should stand in dialogue with architecture and it is Krier s ambition to have iconographic themes brought into the latter so that they might speak equally to both the occupants of a building and to bystanders moving them to thoughtful reflection In his contribution to the European Embankment project in St Petersburg Krier recently demonstrated the power of architecture and fine art to cross fertilise The architects in charge of the urban development of this district are Sergei Tchoban and Evgeny Gerasimov Krier designed the fa ade for a 132 metres long building on the Newa riverbank one that looks across the water onto the rear fa ade of the Hermitage The vibrancy of the architecture is enhanced by its sculptural ornamentation based on the Balzac theme The Human Comedy In this regard Krier modelled over 50 figures in white clay as well as around 65 linear metres of reliefs The short poems that comment on the sculptures also centre on the theme of mankind and its interrelationships in society

Figures Rob Krier,Guy Kirsch,Nadine Krier,2013 In his Pictorial Journals Rob Krier describes how his twin passion for

fine art and architecture emerged Born into a household of gifted artists and craftsmen he came into contact with art and architecture as a very young boy and took his own first steps in painting and sculpture in his early years His enthusiasm for the architecture of Rome cemented his determination to become an architect Krier tells of his grammar school years in Echternach and his university studies in Munich in words just as enthralling as his first taste of professional life with Oswald Mathias Ungers and Frei Otto His autobiographical notes are accompanied by numerous sketches drawings and sculptures which were produced during this period and in which the author s multifaceted experiences find artistic manifestation

Civil Art Vincent van Rossem,1996 In a polemical essay Vincent van Rossem sketches the post war history of architecture and urban planning During and after the disintegration of the Modern Movement in the 1950s and 1960s a number of books and essays dealing with the architecture city relationship were published Since then much of that formal theorizing has filtered through to day to day practice resulting in a modification of the rigid principles of functionalist urban design The author describes these developments and shows taking The Resident as a concrete example how criticism of the architecture and urban design fostered by the Modern Movement has led to a different approach to urban renewal The Architecture of the Facade Randall Korman,2022-12-30 The Architecture of the Facade provides a comprehensive study of the facade as both a physical and cultural artifact highlighting its significance as a critical component of the civic realm and arguing for the restoration of the art of the facade as both a subject of study within academia and an aspiration within the profession at large As the principal surface of mediation contextualization and representation the facade carries the lion s share of responsibility for containing the internal environment and confronting the outer world And yet in recent decades the very question of what exactly a facade is has been raised by the dramatic changes in building technology advances of parametric design and the ubiquity of autonomous buildings The Architecture of the Facade addresses these and other related issues The book is organized into 12 chapters with each chapter focusing on a particular aspect of the phenomenon of the facade such as those of wall the frame transparency and the role of the facade in civic space Korman also discusses proportional systems the language of composition the role of precedent the importance of context and much more Over 350 photos and diagrams provide readers with a variety of examples of artful facades throughout history Online teaching resources that accompany this book include a course syllabus a glossary and a Pinterest tack board of facades This book will be of great interest to students in architecture studios as well as instructors and professional architects interested in facade design
