The Alchemy of Light Urszula Szulakowska, 2021-10-01 This study concerns the late Renaissance metaphysics of light in its adoption to a Paracelsian alchemical context by John Dee Heinrich Khunrath Michael Maier and Robert Fludd Their alchemical theosophy is contextualised within Protestant reformism of the 1590s to 1620s specifically that of Valentin Weigel and Johannes Arndt This results in a re assessment of the Rosicrucian movement which challenges the existing historiography and problematises the character of the movement The volume includes fifty illustrations from alchemical treatises of the period the emphasis being placed on Khunrath's *Amphiteatrum Sapientiae Aeternae* 1595 1609 In an innovative manner the study investigates these images using analytical tools drawn from semiotics structuralism and post structuralism This method yields an unusual interpretation of the geometry optical diagrams and spatial structures employed in such alchemical engravings

Philosophies of Technology Claus Zittel, 2008 The essays in the present volume attempt to historically reconstruct the various dependencies of philosophical and scientific knowledge of the material and technical culture of the early modern era and to draw systematic conclusions for the writing of early modern history of science The divisive transformation of humanist scholarly culture the Scholastic school philosophy as well as magic in the form of a philosophy of practice is always associated with the work of Francis Bacon All of these essays in this volume reflect the close interaction between technical models and knowledge production in natural philosophy natural history and epistemology It becomes clear that the technological developments of the early modern era cannot be adequately depicted in the form of a pure history of technology but rather only as part of a broader cultural history of the sciences Contributors include Todd Andrew Borlik Arianna Borrelli Thomas Brandstetter Daniel Damler Luisa Dolza Moritz Epple Berthold Heinecke Dana Jalobeanu Jürgen Klein Staffan Müller Wille Romano Nanni Jarmo Pulkkinen Pablo Schneider Andrés

Evidence in the Age of the New Sciences James A.T.

Lancaster, Richard Raiswell, 2018-10-24 The motto of the Royal Society Nullius in verba was intended to highlight the members rejection of received knowledge and the new place they afforded direct empirical evidence in their quest for genuine useful knowledge about the world But while many studies have raised questions about the construction reception and authentication of knowledge Evidence in the Age of the New Sciences is the first to examine the problem of evidence at this pivotal moment in European intellectual history What constituted evidence and for whom Where might it be found How should it be collected and organized What is the relationship between evidence and proof These are crucial questions for what constitutes evidence determines how people interrogate the world and the kind of arguments they make about it In this important new collection Lancaster and Raiswell have assembled twelve studies that capture aspects of the debate over evidence in a variety of intellectual contexts From law and theology to geography medicine and experimental philosophy the chapters highlight the great diversity of approaches to evidence gathering that existed side by side in the sixteenth and seventeenth centuries In this way the volume makes an important addition to the literature on early science and knowledge formation and will be of particular interest to scholars and advanced students in these fields
