C. Jeaffreson, 2022-10-27 **Rail, Steam, and Speed** Christopher McGowan, 2004-11-10 From October 6 through 14 1829 in a small village just outside Liverpool England ten thousand spectators gathered to witness one of the most remarkable events of the Industrial Age a battle among locomotives that became known as the Rainhill Trials Five machines were entered in the

competition the horse powered Cycloped attained a top speed of only five miles per hour while Perseverance which looked like a giant iron bottle standing upright atop four wagon wheels creaked along at a walking pace But the three way race between Robert Stephenson s Rocket Timothy Harworth s Sans Pareil and the crowd favorite John Braithwaite and John Ericson s Novelty astonished the gathered crowds The unfamiliar clank of machinery huge billows of steam and unprecedented speeds of thirty miles per hour thrilled the crowds during the trials carnival like atmosphere The Rocket won the competition though it had been claimed that the machine was not the superior locomotive Rail Steam and Speed explains why and offers an absorbing account of the trials people and science that gave birth to steam locomotion The purpose of the trials had been to find a locomotive that could maintain a speed of ten miles per hour for a round trip totaling thirty five miles the distance separating Liverpool and Manchester which were soon to be linked by the world s first passenger railway But what was achieved during those nine days became a benchmark of the Industrial Revolution Bringing the excitement of this great drama to life Christopher McGowan introduces us to such pioneers as George Stephenson who started as a colliery boy and finished as the father of the railways John Ericsson a Swedish Army officer who invented a new kind of locomotive in England but spent most of his life in the United States where he built the Monitor for the Union Navy and Richard Trevithick whose eleven year adventure in South America included winning and losing several fortunes deserting Bolivar s army and escaping the jaws of a crocodile He encountered George Stephenson s son Robert in a Colombian hotel in one of the most bizarre meetings of the age But the real stars are the locomotives themselves McGowan shows how locomotives work and how they were developed from the gargantuan beam engines condensing low pressure steam inside enormous cylinders to the small high pressure driven engines of the maverick miner Trevithick He adapted the engines to power road carriages but atrocious roads led him to build an engine that could run on rails And so was born the world s first steam locomotive and modern transportation
